(Note: Please be cautious in chanting of mantras as some of them involve complex pronunciations.)

The name of this New Year is **Sri Hevilambi**.

Astrological Prediction for the year:

This year there will be wealth that will be created globally. At the same time, there will be lot of tensions among the nations across the globe. The tension might even lead to a situation close to war. People in some nations will remain in constant fear. Hence, we should all play our part in ensuring global peace through our prayers and self-betterment.

There will be lot of unexpected changes that will happen in the world. There are some nations in the world that have plundered, looted and accumulated other nations for selfish means and it is time that they repay for the sins committed. That means the nation as a whole has to face karma for its past actions. So it is time that such nations answer for their deeds. On the other hand, there will be some nations which will improve a lot. In India, foundations will be laid for very good changes to come in future. Some activities to bring down the nation's and government's image might take place and we should be careful of that.
