Hearty fraternal greetings and good wishes to all the brothers and sisters who are relating to this talk this evening and a very happy and Merry Christmas. The whole globe celebrates 25th December as Christmas Day, the birth of Christ while in the esoteric circles it is very, very well known that Christ was born on 22nd December during the midnight hours. Somehow the month of Capricorn right from 22nd December and even earlier from 16th December till 1st January, the entire humanity is kept in a joyful mood thanks to the evolution of the festival of birth of Jesus the Christ. Birth of Jesus is one dimension which happened on 22nd December. The birth of the Savior is another dimension which is happening ever since the beginning of the creation and the advent of humanity. They coincided and it has come to be that it has become a period of celebration. Celebration can be two ways- an inner celebration or an outer celebration. Depending upon the evolution of man, there is a festival of grand light within from 22nd December onwards, which is truly seen from ancient most times as the birth of the Savior. Then, the birth of Christ also coincided with the date relating to the birth of the Savior that is 22nd December and Jesus the Christ inspired through his life and his teachings, which always remained simple and attracted simple people all over the world. Christianity is one religion which is easy to follow and it was more appealing to the masses than to the intellectuals or even evolved souls. It is like a huge kindergarten that was opened by Christianity, developed a kind of faith of God which has its own positive dimension from the angle of humanity. This faith of God is nurtured by the Hierarchy to ensure that from the faith they also follow the law of nature and slowly evolve from just

being emotional Sixth Ray people to Fourth Ray and Second Ray. This is how the ascent is planned by the Hierarchy from every Sixth Ray movement.

Sixth Ray movement is very common among the masses, be it Christianity, be it Islam, be it Hinduism. Be it any -ism people with lesser minds, if they get into the faith thereafter, they can slowly get into the law. The faith seems to be an inlet for humanity to walk into the Path of Evolution. All good Christians have slowly become inquirers. Mostly in the West, even in our groups if we see, they have all been good Christians before that have joined into Wisdom. It is found to be a good way that religions eventually help people to get into the Universal Wisdom when they tend to be inquisitive and self-enquiring. As long as self-enquiring is not there, man cannot evolve. But all religions seem to be, all over the globe, have been the kindergartens that have recruited humanity into faith from a state of utter materialism. Some kind of miracles, some kind of stories, these are the things that the masses get attracted to and then they fall into a rhythm, into a discipline. They believe that there is a God and then who that God is, everyone has his own idea until they enter into the Path. Once they enter into the Path, the Path reveals things. Sixth Ray is seen as a huge field for the Hierarchy where they find enquiring souls to enter into a state of enquiry relating to God from the Faith of God.

Therefore, among religions that we have on earth today, Christianity is the most followed religion and then comes Islam and then comes Hinduism and Wisdom comes at the last in all this. Even among all Hindus you cannot say they are all Vedic. They claim to be Vedic but they are just utterly faith-based, belief-based, superstition-based, tradition-based. This is all very common. We have to see in humanity these layers. Seven layers of humanity are there so we find people with blind faith. We find people following tradition and seeing that it itself is God and they have their own self-conditioning. Slowly, following them over incarnations, the Soul starts enquiring, 'What is all this about?' When that starts then the game starts. Until then there is a huge platform of religions. Everywhere, everyone has his own faith, his own understanding of God and his own way of doing things. All this is seen as a huge network of kindergarten. So Merry Christmas, Happy Christmas, this is one thing where everyone participates. This is what I am seeing from the children to the oldest persons all participate in this Christmas business. It is not a business actually; it is a festival. I should say it is a Festival. People also make business out of it but then this festival, firstly, there is a lot of lightening on the planet. Lightening the planet has its own impact. So much lightening is happening on the planet and these lights give joy and so much of display of five-pointed stars which never happens on the planet except during this time. And it is in relation to the sun sign Makara or Capricorn. Subtly or even unconsciously, the subtle things are connected to the things that are happening. So, they all relate to the five-pointed star. And then there is lot of jubilation and distribution of gifts which normally people don't do otherwise, isn't it? It is not that we pick up the old things from our house, pack them well and give them away but this concept of giving gifts within the family, giving gifts to friends and distributing cakes, chocolates, this principle of sharing and distribution all this is happening at this time until 1st January. That means that the first 10 days, first 10 degrees of Capricorn from 22nd December to 1st January, the first 10 degrees of Capricorn are jubilantly spent by humanity at large which is also appreciated in the Higher Circles because all become children during this time.

Then there is another dimension for those who follow the Path of Wisdom because Capricorn is the 10th sun sign, a sun sign for fulfilment. Number 10 is a distinct number and in the zodiac, it is the 10th sun sign. 10 is a number which gives you the message, 'Stand aside.' Stand aside- that is Number 10's message. All numbers from 1 to 9 are single numbers. When it comes to 10 it is one standing aside as a 0 or the creation. So, you can be standing aside and observing and experiencing the creation. Then only you are fulfilled. That is the dimension of Number 10. Capricorn offers it every

year because there is the energy that prevails in Capricorn is the energy where you create and then you stand aside and experience what you have created. You create your life, normally, you are sunk in it, isn't it? We weave. We weave our web around us like a spider and we are stuck in it. That is what normally happens in life. But the Wisdom is, you weave a beautiful thing and you stand aside and enjoy seeing it. You are a Master of your own creation. You are a master of your own creation when you know how to stay aside or be an observant where you are also creating what you intended to create for yourself and for the benefit of the surroundings. That is the beauty. That is the mastery. That you are creating something for which your energy is given but you are always standing aside from it. You can create a family, stand aside, observe the family. You can create a profession, stand aside, observe the profession, support it, give your energies to it. To the family you can give energies. To the business or profession, you can give energies. You can give energies to a group. Always, you can stand aside. that is the beauty of Capricorn. Normally, in Astrology they say, 'A Capricorn prefers to be alone.' But alone is a different term. All in one is one dimension, lonely is another dimension. But Wisdom says, 'Yes, you have to be always standalone.' You have to stand alone from all that you create and all that you relate and when you stand alone, you are free. This is the very Divine from whom everything came out. The very Divine from whom everything, the whole universe came out of Him. The Cosmic, the Solar, the Planetary systems came out of Him. So much has come out of It. He is in it and he is also out of it. That is the beauty of the 10th sun sign. He is in it; He is also beyond that. That is the beauty which is expressed in Purusha Suktam. God creates with His energy the whole system and He supplies all His energy. We are also His energy only, coming out and we are eternally being there but essentially, there is no difference between us and He. We say He for want of language but it is not He, it is not She, it is It or That whatever you say. It is difficult to speak when it comes to Metaphysics, isn't it? Therefore, having come out of all the energy from which everything came out in all that it is there and also beyond that. Tato Vishvang Vyaakraamat. That is how it is said. Ati Kraamat means he stands out. You create your life but you be beyond that. You should be master of your life. You cannot be a slave of your life. Create, create, create but be not a slave of your creation. It can be family, it can be profession, it can be social activity, it can be spiritual activity. Let it be any activity, stand aside and enjoy it. That is the beauty of the 10th house and that is where man is made. It is known to all that it is made in the image and likeness of God. (The Seal of man), how it is said is, "the seal of God on the face of man", that is how Capricorn is expressed. The seal of God on the face of man. On the face of man there is the seal of God. No other specie has this facility. You too can be as much as the Creator. As much as the energy that has created the Creator. That is what you carry with you. That is what you are. Your primal energy is undefinable. From out of it, there is the spring up of awareness, there is the spring up of life force. And there are so many intelligences that have developed in us which we regularly use. Stand aside and observe them. Let them work. Cooperate with them. With every intelligence in you, you can cooperate, if you know that you are beyond all that is part of you.

That is why the Aditya that we speak of, we slowly have to come to this topic no? Christmas, I see linking with Capricorn. Everything has to be in tune with God's plan. This is what I feel because nothing happens in creation without Divine plan. We, according to our understanding say this should not happen, that should not have happened or that should not have happened. Like that we keep on saying with our little minds. But whatever happens, happens according to Divine plan. What we see in this plan, from the Divine angle, everything is moving forward. Everything is moving forward but we don't see that it moves in gradations. We say seven gradations for simple understanding and we also say 49 gradations. 7X7 gradations. Humanity is one word. But in this humanity, there are 49 gradations of understanding. All are moving forward and those who are with little understanding like kinder, like children, they are all in religions. They are as much in every religion, not only Christianity or Islam. Some of them even tend to be very emotional. All these emotional beings are in all religions,

in all religions, without exception. If he is emotional, he is a child. If he is able to think, he is growing to be an adult. If he is able to think better and then in a manner to think for himself and for others, still better state. This is how a gradation is there among humanity. Even in our groups we see very emotional persons. Isn't it? All these emotional persons shall have to be taken care of. There is a Master for it. There are army of teachers on the planet that keep on teaching them about various dimensions of faith, belief, tradition. Certain things are really very funny and very not acceptable to reason. All is included because in the game it starts with it. So, this Santa Claus business, how interesting it is to people. When we know we know that it is Saint Nicholas. There was a saint who was dedicating his life to distribute things. Saint Nicholas becomes Santa Claus. Santa Claus becomes something else. Like that, Saint Cross becomes Santa Cruz. We have an airport in Mumbai. It is called Santa Cruz Airport. If you ask people in that airport what is Santa Cruz, they don't know anything. When we go to places and when we touch certain names we ask them, they generally cannot tell you why it is so. But when a man is into enquiry, he will get into etymology of the name relating to the place. That is where Wisdom starts. Wisdom starts when there is an enquiry inside. This place is called Vishakhapatnam. Why is it called Vishakhapatnam? Not even 10% of the population of Vishakhapatnam know why it is called Vishakhapatnam. Those who know also know that there is a Visakha- Ishwara temple in the city so it is Vishakhapatnam. If you go further deep, there is a temple in the sea relating to a Kumara in this sea, who is called Visakha. There is still deeper understanding that there is a point in the sea here which is connected to Visakha Valley in the Himalayas. This how do you know? It is only through enquiry these things come. This enquiry nature will slowly have to come into every group member if they wish to follow Wisdom. Wisdom is not to be followed like religion. Wisdom is meant for understanding. What is the yoga that Master CVV gave? Very few can explain. They will do the part of the yoga but what are the details of that yoga? Very few will know. What is the Wisdom Master EK has given? Very few will know. But they worship Master EK. So, are they faith-based or are they wisdom-based?

So, What I wish to say is, Merry Christmas is a good beginning for a grand finish for the humanity for fulfilment. And it is a sign of fulfilment. The Entire zodiac which commences in Aries but 10th month it touches Capricorn and man finds himself to be an image and a replica and in likeness of the One in all dimensions. It is a matter of finding himself. And mind you, you have to find yourself. There are teachers who keep on giving wisdom. We have the best teachers right from Lord Maitreya. They are most proximate to the Prime Energy. Why Lord Maitreya? Why Lord Koot Hoomi? Why Lord Morya? We set them high because most proximate to the Prime Energy. They keep on receiving the Plan and manifest it. They are all realized souls and they realized by virtue of practices. By virtue of practices not by just following something in a superstitious manner. A man with superstition can go only up to a point and the faith will also get questioned when he meets a crisis and his crisis is not answered. Isn't it? When he is in trouble, many questions will come. When there is no trouble, is it one way. All faith is gone when continuously you get troubles. Isn't it? But then the faith dimension is put off and enquiry dimension has to start. When you start to be an enquirer, then you become an aspirant. An aspirant will turn out to be a disciple. This is from Jignasu to Jnani. Jignasu means he is an aspirant. Jnani means man of Wisdom. What is Wisdom? The Wisdom of God. Theosophy. Theosophia we say. Theosophy, Theosophy people say but very few know what it is. Theo-Sophia. Theos means God, Sophia is Wisdom. This kind of understanding, we need a lot to understand in relation to even the words that we use. In this process, the more and more you relate to the symbols and then to the colors, then to the sounds, you move forward. All that can be done as an internal work not as an external work. Just being with a thing over decades will not help you unless there is an internal enquiry and investigation. You know that the disciple is a scientific investigator within himself. He has to meet his own psyche and see how many things are there in his psyche and how many things that are undesirable which require to be eliminated.

This month of Capricorn is presided over by an Aditya called Bhaga. Bha-ga. Let me come back to the subject relating to Merry Life Teachings. Bhaga is the Aditya. Bha stands for light. Bha stands for Light and Ga stands for movement. Aditi or the root matter or the Background Consciousness which is the basis for all the creation. We see that creation is made of several layers and there is a background Pure Consciousness which is supported by Existence. So, Pure Existence to Pure Consciousness. That Pure Consciousness is called Aditi from out of 12 dimensions of Adityas have come. Among those Adityas Bhaga stands first. Bhaga stands first because it is from that dimension...when we count from here 1,2,3,4,5,6,7, 10 comes last but when we count down from the other side 10 is first, isn't it? Atyathishta dashangulam, we say in Veda. The One who comes down is number 10 that is how it is said. That is why Number 10 is a perfect figure, complete figure and the number relating to God. Like that people say. God is an energy. At every stage you find- This is God, this is God. But then you go further and further and further and further and you find that you cannot define God. To you, your Teacher Himself is God to start with, isn't it? The Teacher who gives you wisdom is God, isn't it? Then slowly, he reveals to you what God is. And wants you to get into it. It is like when you come to a temple the very first door is Temple. You open the door; another door is there. You walk up to that. Like that there, door after door, door after door, door after door, you open and you go on and on and on and on. You go into a state where it is a boundless energy. When you come from that side, the very first emergence is from there, remember the emergence. It is a word which is used everywhere. Emergence. Emergence as you see is emergence to you. Even for that emergence there is a background. Because how can something emerge without anything behind? How can something emerge without something there behind? How can your pulsation function without something behind? You go behind, then you find something, you go behind you find something, until you go to that point where you find the Background Consciousness. In our invocation Master EK gave us, 'May we live in the Awareness of the Background.' Background Awareness is what background? The Background you have gained now and you keep on gaining, gaining more and more and more.

There is a point where you meet the emergence of Gods. Emergence of Gods, the dawn of Gods. That is what is called Bhaga. In Puranas, Bhaga is referred to as that state of awareness where all Gods emerge. This Gods emerge means there is a huge hierarchy of Gods. There are Adityas. There are Rudras. There are Vasus and then there are so many subsidiary Devas that have happened. For all that there is a Background Light which gave a movement. Which gave a movement just like our sunrise, it gives a movement. That is what is called etymologically, the meaning of Bhaga the push that it has given from the unknown to the known. From the unknown to the known. That is why the Vedas and Puranas and Astrology speak of Capricorn as the dawn of Gods. But before the dawn of Gods there is a huge story if you go to Genesis. If you go to Genesis at every step there is a dawn meaning a beginning. Beginning everyone knows according to his own comprehension. But if you to go the ultimate understanding there is no beginning and there is no ending. In your process of understanding there are stations. In those stations this is from the other angle if you say, Bhaga is the first push by which the Gods came out to fulfil the Plan. Deva yagnam tanvanaha. It is these Gods who cook the Prime Energy which we call the Unspeakable, Unknowable, Unnamable, Nameless Formless, this-less, that-less, seeming nothingness so many things we say for want of words. We make our own acrobats about that Absolute God of whom nothing can be said. That is cooked by these Devas. That Prime Energy is cooked to prepare various other Intelligences and then the Cosmic System, the Solar System and the Planetary System and then they fill the beings. All the beings they are only pulsating principles of Light. Pulsating Principles of Consciousness they are. They are all given different bodies, in different planes of existence. While the creation came out some 30 million years ago according to some understanding, the humans came out around 18 million years ago. So much later the humans, in the sense, the souls are there but the human forms are not there.

So, when the human form is prepared, then it is called the fulfilment of creation. The creation, the creative activity is fulfilled. Now it is a matter of sustaining that creation. Creating is one dimension, sustaining is another dimension and then eventually it gets into dissolution. Eventually it gets into dissolution. We are in the sustenance dimension now. Creation has happened and it continues to be. The Creator is always at work to see that it is intact. In that dimension we are, but what has happened and what happens every time in Capricorn is, there is the advent of Gods. Advent of Gods to support the creation, to maintain the creation. While creation is happening on one side, on the other side it gets dissolved but they make sure that the figure is not changed. The apparent creation remains. There is a creation happening, there is a dissolution happening. In between there is an apparent creation. In that apparent creation we are existing. And it looks so real. This is because there is such a balance between the First and the Third Logos activity. That is a dimension. Coming to the topic, this Background Consciousness it gives a push. That is where Mahat dimension gets a push. Mahat we will come to when we come to Aquarius. Capricorn is a push from where the three, the Trinity dimension of the Gods, they emerge. They emerge. When they emerge three varieties of beings come out and then there is a permutation and combination among them and then the whole creation tends to happen. It is a story by itself. But what is now relevant for us is, Capricorn is the dawn for Gods. It is dawn for Gods and for humans the birth of Gods is in Capricorn, birth of humans is in Aries. And The Gods touch down to gross matter in Cancer and for the man the touchdown is in Libra. Therefore, the scriptures say, Man falls in Libra. Don't think that all Librans are fallen. It is not like that. It is the dimension of that sun sign that in Libra it touched down, in Aries it started for man. For Devas the beginning is in Capricorn and their fall is in Cancer because they enter the realms of matter at that time. Meaning, they are in much more lighted planes in the Higher Circles. If you take the creation as seven planes of creation, the fourth plane is the middle plane. Thereafter, there are 5th, 6th, 7th there is a touchdown happening. 7th is the final. In any system beyond there is a point where matter takes dominance over spirit. That is where light tends to be low. Where the spirit is dominant over matter there the plane of existence and the beings that live there, they are more lighted. This is how it is.

Coming to Capricorn we are with a state where there is a wave of Devas that jump into the creational activity and that is a great advantage for us to relate to them and then gain our own swing into a swing of evolution. The creation has double swing. It has a swing towards involution and a swing towards evolution. Involution or evolution, it is a swing. We are tending to evolve. There are also beings who are tending to involve. That is why the conflict is. In human society the conflict is, there are involving people, there are evolving people. The evolving people, instead of complaining about creation if they make an understanding, they find their own way to live and to move and move into the light. But most of the people, even those educated or even among the aspirants that we have, they have lot of complaints about creation, about this social disorder. All kinds of disorders they see and they are worried about it. We should know, it is to be like that. It is the Divine plan. In the plan there are less-evolved people. There are more-evolved people. The more evolved people either should help the less evolved people or set them aside and find their own way to evolve further. There is no Wisdom in complaining about the creation. You can never complain about what is happening around you in creation. What is happening today on the globe, if you complain, you are not a student of Wisdom. Because there is the ultimate statement that All is in Divine Order. Things happen according to a Divine Order which you cannot perceive unless you grow in your awareness. Most people who live in critical attitude are the ones who have not understood and they are not willing to understand. Certain things cannot be changed according to your liking. On the contrary, they go the other way because there is a movement of involution happening because there are beings who need to experience to evolve. Then there are people who are evolving.

Therefore, some books say that for some time the recruitment from animal kingdom to human kingdom, now, for the moment, is stopped. God knows. Not all theologies accept it. Not all theologies accept it. But there is a Master who said, "For the moment evolution of animals into men is stopped for a while because these men are not moving forward." It is also a matter of debate. If it is so, it cannot be like this. If you see some other philosophy, there is no such thing said. It is all one's own belief and movement. What I wish to say is, there is a push that comes from Capricorn. It is a push for all. When a push comes, it is a push for all. In that push, in the cyclical movement, those who are involving, they further involve and then come to evolution eventually. Those who are evolving would evolve provided they know the scheme. So, all that plan relating to creation can be conceived only in Capricorn. That is the beauty of Capricorn. That is why it is the Mount of Understanding. There are different ways of understanding Astrology. Because we see that there is a Capra climbing the mount - that is the symbol for Capricorn- but to each person, according to his state of evolution it means different. The sign means different. To Moses, Capricorn means something. To Jesus Capricorn meant something, isn't it? Because both are Capricornians. Rama, he is an Avatar. It is a different thing. What is Capricorn you cannot decide. According to your evolution, it offers. It has all the dimensions. As I said in Anshuman, you have all the Goodwill relating to you coming to your aid in 9th sign, Anshuman Aditya. When it comes to 10th sign, it is a different dimension. It is a dimension where all are pushed. Wherever they are, they are pushed to the next station. So, it is beneficial to all. For those who are taking to higher evolutions, it takes them beyond the peak. Beyond the peak what do you have? The Aquarian sky. Isn't it? That is why in Capricorn you can experience Uranus, you can experience Neptune, the Piscean Lord of Neptune, the Aquarian Lord of Uranus and the Capricorn Lord of Saturn. All can be experienced in Capricorn. Why? Because it is a sign which contains all other signs in it. It is a sign that contains all other signs in it. That is why in the Vedas, this sign is specially praised.

Then the Aditya is called Bhaga Aditya. Bhaga means as I said, the Light making a movement. Ga is the seed sound for movement. Gam Ganapataye Namaha, we say. Ga. Ga for Bha. Bha receives a movement and this movement of Gods brings in a push for the creation to move forward for the cycle to come, for the year to come. That should be one understanding about Bhaga. Another dimension about Bhaga is, Bhaga, when he was in creational plan there was a time that he himself, it is a principle or an intelligence, but in Puranas it is said that he tended to be egoistic. The beauty is anything emerging from the Prime Energy, there is a point at which every one of them, including the Trinity, they lose sight of the Background. There are stories in Puranas where the Trinity itself lost sight because they felt themselves to be something more important. When you feel you are more important you miss your link to the Background. Isn't it? The ego can emerge at any moment in creation from Mahat. Mahat is an Ahamkara by itself, isn't it? It is called Mahat Ahamkara meaning, the Universal Personality. At every point there is emergence of ego by which the background is lost sight of. We very easily lose sight of our background. This kind of a thing happens to everyone in every station. The Puranas say even the Trinity have lost the view for a while. For a while. Creating consequences. They had to be redressed again by an avatar. Either by the First Logos or by the Second Logos. It happened. What is exceptional is, the one who never disconnects himself to the background. This Bhaga who is clearly pushed, he felt, 'Oh, I am the one who gave the push without which...This kind of feeling comes to all of us. Even us who are such insignificant beings, we feel so big about ourselves, you know? Where do we get this feeling? It is there in the system. We do also get it. We are so small, so insignificant. About others we can see that, about us we can't see that. I can say, 'Ah that man is no good,' but to feel that you are so insignificant in the whole universe is utter humility, utter humbleness. Sometimes we lose sight of it. Why sometimes? Many times. It happened to Bhaga that when the creational process is happening, he felt so. He felt so. So, he

couldn't see well. When you are into ego you can't see as you see before. Therefore, what happened is, his eyes they had to be plucked. There is a story about Bhaga. His eyes were to be plucked because he has completely become oblivious to the Background from which everything is happening and he is only a projection of that background. We are such a projection when we trace back only, we know what a small, minutest projection that we are in the whole universe. So, he lost sight so when he lost sight of It, his eyes have to be plucked to see better. That is why the Puranas say that there is a dimension of Shiva called Kala Bhairava. He comes and plucks out the eyes of Bhaga in a sacrifice called the Yajna of Daksha. That is how it comes. This is the only story relating to Bhaga, rest of it is fine with Bhaga. In Puranas when it comes to Bhaga only this is the incident they speak of. Rest of the creational process about Bhaga it is all fine meaning, he has been conducting so well that the work is going on well and the dimensions are functioning well and tenth house is 10th house. You could stand aside means to stand with the Background and conduct the work for the benefit of all participating in it but not involved in it. To influence but not to involve in it is the state of yoga.

We can give an impact without getting involved. A good impact. just like a magnet does. A magnet remains but its impact keeps on helping the other iron pieces around, isn't it? It is not involved. But if we are doing things, we are involved into everything and we are caught in it. That is why normally the symbol given to us is a spider caught in its own web. Isn't it? Spider's web. It builds a beautiful web but it is caught in it. What is the use? We build a life and become slaves of that life. Isn't it? We build families. We bring out children. We develop professions and then we cannot come out of it because we never know how to come out of it. How to stand aside with your awareness. That is mastery. That mastery comes here. Therefore, this is one dimension which is given relating to... There is Another dimension of Capricorn, it's the Great Boar. The avatar of Great Boar happened in Capricorn. Capricorn the avatar of Great Boar some other time I will explain to you, takes about 3-4 classes to explain. It is but the two fiery breaths that come out like two light waves to bring out the matter from abyss to form the globe of creation. Because the space is a globe, Time is a circle and a globe emerges in a circular form and that emergence will have to be conducted by whom? It has to be conducted again by the Divine. He comes out as a Great Boar and conducts it. What is given in the story looks to be very simple but the process is very intricate. Two, fiery breaths come out. And then Two lights emerge out of it. And these lights come out like the tusks of the wild boar and it brings out from the abyss that which is the matter form relating to the creation in various grades. It is all globular because the whole creation is globular. It is a globe. Space is globe so therefore all that comes out of the globe comes in globular forms. That is how it is explained. That dimension of the Great Boar is also belonging to Capricorn. It is another dimension. We know from the story of Buddha that the cause for his departure is the bone of a boar. The bone of a boar.

Then, we have another dimension which we have to explain about this awareness is, it enables you to fulfil whatever you think as fulfilment. Every person has his own understanding of fulfilment. To someone if he has a good family, it is a fulfilment. To some others, material wealth is a fulfilment. To yet others, if he has a good fame, it is fulfilment and if you are highly recognized in the society, it is fulfilment. Or if you are a doctor, if you become a great doctor, it is a fulfilment. For a teacher, if he finds that he has done well it is a fulfilment. Any kind of fulfilment that you define for yourself that fulfilment comes to you from your 10th house. Your 10th house plays the role of Capricorn. This dimension of fulfilment is in Capricorn. That is why, just to remind you, December Call comes in this month. May Call is preparation for fulfilment. December Call is for fulfilment. The two are included. The two are included. One starts in Gemini; another starts in Capricorn. 29th December is in Capricorn. 29th May is in Gemini. We don't know. As we dwell more and more into wisdom, more and more dimensions of actions that have happened at global level will be revealed to us. Never think that what you have understood is final. This is important. Never take to yourself that your

understanding is final. Understanding leads to further understanding and then further understanding leads to further understanding. There is a statement in Masonry: Understanding leads to misunderstanding also. Understanding can lead to misunderstanding from which you have to come back again to get into right understanding. It is an eternal process until you have found the truth in you. When can you say that you are fulfilled? When can you say that you are fulfilled? Only when you find the Truth, you are fulfilled. That is why I say when we are in the journey, in the journey realizing the Truth in you as You are, is the ultimate. Knowing one master, knowing another Master is not Truth. The Masters want us to know the Truth. Linking to one Master from another Master and then building a religion around him is ignorance. It is not Wisdom. Building a religion around a Master is ignorance. Around Christ there is a religion which is an ignorance. There is a religion about others, also ignorance.

Religions are there. Lesser understanding religion comes. Greater understanding, you walk out of religion. You don't have to declare: I have walked out of religion. You quietly move out. Let the God be there. You move out. Many Christians, many Christians are there, no? Ever since the advent of Wisdom in recent cycles quietly moved towards Truth. Towards Truth. But all our groups in the West there are people who have moved out of religion. I can very proudly say that and they are after Wisdom. They are after Universal Principles. They are after Universal Laws. We, in India, stuck with religion. And we claim that our religion is universal. No. The Wisdom coming from Vedas, the Wisdom coming from Puranas, the Wisdom coming from Bhagavata, Bhagavad Gita, yes. It is universal. Your understanding of Wisdom is completely religious. Meaning, sectarian, circumscribed, limited, cannot let you grow. When you do not wish to grow you do not break your own present understanding. The understanding should lead to greater understanding. Staying where you are, feeling already comfortable, so you stick to it. That is not the way. That is where you have to get into the universal laws as are given in the scriptures, reiterated beautifully in the books of the Hierarchy. The Hierarchy thought fit to bring back the Wisdom in English as a fresh effort because English happens to be a global language for the times to come. That they decided 100 years ago or 150 years ago. They prepared their disciples also to get into English. Then they also wrote through them like the Law of Alternation, the Law of Pulsation, Law of Periodicities and so many laws which rule this universe. What is it that people with religious approach know about it? And they are all functioning in us. How much are we learning to know about ourselves? Therefore, Capricorn is a sign where you get the devic cooperation to find your own understanding expanded in better ways. The World Teacher Trust stands for Universal Wisdom. It does not stand for promoting any religion. Universal Wisdom can be found in man because man himself is a universe. Every man is a universe. So, see the universe in you and relate to the universe outside. This beauty is in Capricorn.

Another thing that I looked into, just went through Google to find, that is anything said about Bhaga. I found that Baghdad is a city which is named after Bhaga. The city of Baghdad, it was a place of learning at one time. Constantinople, Baghdad and others we say, they are old places of learning. Baghdad is Bhagavata. That is how it is. I thought I will also inform this. Why not? Because it is made available. Get into the dimension of Capricorn which is given in the book on Spiritual Astrology by Master EK and the book Esoteric Astrology by Master Djwhal Khul. Try to understand the concept that they have given. Meditate upon them. Ponder upon them. Then you will find a greater understanding of the energies that are presented to us in the month of Capricorn. Otherwise, it remains the same for us all the time. Capricorn means Christmas. Capricorn means New Year. Capricorn means Guru Pujas. That's it. What more we have understood about it? Capricorn is the month in which a great initiate has decided to leave his body. In Mahabharata there is the Grand Sire whom we call Bhishma. He was all-knowing person, all-knowing person. He came from...he is one of the eight Vasus. Vasus means the Devas of materialization. There are eight Vasus bringing in eight

kinds of materialization to see what is happening here. Matter takes to eight transformations to be what it is here. In these eight gradations, he belongs to one of the eight. He has come down to earth during the time of Mahabharata meaning the dusk hours of Dwapara and beginning of Kali. He came before. He was believed to be an avatar because he was so accomplished. He was believed to be an avatar because he was so accomplished in every wisdom and in martial arts. He was a great warrior and a great emperor. There was nothing lacking in him. He had the boon to depart from the body whenever he wants. We may have read the story of Bhishma in Mahabharata. He is the one who is the grandfather to sons of light and sons of darkness and he witnessed the whole game. He was there and he stood aside all the time. He stood aside and he went on advising them but the plan was otherwise. It is a very peculiar story. That perfect man, he also decided to leave in the 11th ascending moon phase of Capricorn. When he was to depart, he decided that it was the time to depart. When he was departing, Lord Krishna himself came and stood by him. Why I say is, the importance of Capricorn. The knowers know how important Capricorn is and how it has to be utilized by the disciples. It is the most sublime sun sign and the Aditya is Bhaga. He gives the push.

Funnily, at the world level, at the level of the world, where it is all a kind of different understanding, we are making merry, isn't it? We make merry like children which is acceptable from the divine angle. From the Divine angle all is accepted. For a disciple, he has to decipher which way to go. For us, from Solstice onwards it is a 30-day period where you can keep on working because you get the best push from the sun rays on a day-to-day basis. So, we keep moving further, further and further. May that happen to all of us. By this I am not dampening your spirit of Merry Christmas. The idea is not to dampen your spirit of Merry Christmas but you should know that there is Christmas inside. There can be birth of Christ inside. Birth of Soul is birth of Christ. There can be the growth of Christ inside. From infant Christ we can be growing inside. An infant Christ grew up to 12 years in Israel. Later, he left and he came back after 30 years and he did what is to be done according to the plan and the impact remained. Three years of working in Israel, 2000 years and still his influence is there and it is a high influence on the planet. What is it that he has done in three years? Every other Master has done it but the impact. Why is it so? No one knows. Why is it so? There are Masters who work for 30 years. There are great initiates who work for 60 years. They have all given great wisdom. Why because this is the impact of Jesus the Christ is on the masses. The masses their number is very high. Always. Always. So, let them grow. Let them make merry. We make merry in the Antahkarana. That is what it is. We make merry in the Antahkarana right from 22nd December which is the true birth of the Savior. We knew the Savior is born. You make merry inside. You find your own Christmas inside. You find your own gifts inside. There are so many gifts on the way to Light. Be thankful and move forward. Move forward. It is a way. It all depends on our attitude. Is your journey towards Light? Or is your journey towards matter? That's it. Both ways it works in the world. Therefore, in the outer world, Capricorn is full of joyful activity outside. It is all vacation time everywhere. Isn't it? For the disciple, yes, he makes his own merry. That is how Capricorn is. I doubt if I get another class about Capricorn but I will try to find some more dimensions linking Capricorn to Cancer because that is where we build another bridge. Building the bridge between Cancer and Capricorn is important. Just like I spoke of building bridge between Gemini and Aquarius and Sagittarius to Leo a bridge. All these bridges are important.

Some other dimension I will try to see because on 1st of January, next Saturday we have a program here. 8th of January I am with you for a different reason. We do our valedictory relating to our online Indian seminar which is meant for our groups in the West. So, around 16th of January I find a chance to relate to you further in relation to Merry Life. In the meanwhile, make merry according to what you think is best. Go ahead and enjoy the Christ in you or the Christ outside or both ways you can do

it because Yoga is an equibalance between outer life and inner life. Let us grow in both ways. I wish you all to grow in all dimensions. Namaskarams to you all.
