Hearty fraternal greetings and good wishes to all the brothers and sisters who are relating to this program from various parts of our globe. As you may have noticed, I'm seven minutes early to the class today, maybe on account of my anxiety to see you all in response to your anxiety to see me. It works in both ways. Maybe we'll not get into the subject until 7 o'clock. The class on Aditya Mitra which relates to the month of Gemini, we'll exactly commence at 7 o'clock, not to disappoint those who come on time. Until then we'll have some pleasantries.

I was extremely happy to see some of you during the May Call. All of you have come only to see how the frame of the Master is, and how the system is functioning. Is the Master intact in the body? Is something to be done? With so many questions in mind many people have come, and I'm extremely thankful to the Spanish group who said, "we just come to see you, we don't even need to listen to you. We wish to see you three days and then get away". I felt so very touched by the statement of the group from Europe, specially. And among the European groups, the most represented group is the Spanish. I also have a brother from South America, who came all the way just to see me. He lives in Argentina, works in Brazil. Came to India, and India greeted him with Covid. We treated him with

homeopathy and he was ready to attend to the May Call proceedings. These are things which touch us deeply. Because just to see a Teacher for the May Call, he comes from Argentina, he is working for a group in Brazil, and he came all the way from that part of the globe. Came to Bangalore, went to Kodanadu, and there it was waiting- the Covid was waiting to catch him. He took it up, did not fear. He informed, so we gave just one medicine, *Arsenicum album*. He was very confident that it would cure him, and it cured him. He came for the May Call, participated. That shows what fiery aspiration that members carry in our group, that from all over the world they are willing to travel. Travelling across the oceans, crossing the continents, reaching an insignificant place like Vishakhapatnam, and trying to see and listen. When you see the whole thing, you are amazed. Who is conducting it? What is conducting it? How people are moved? They are uprooted from their local conditions, frequently they are put to trouble. In all these thirty years, the way our group members moved from place to place, from nation to nation, from continent to continent, and willing to listen even now. The group that came for May Call had asked me, "Are you planning for January or not? Do you plan to receive us for January or not?", this enthusiasm truly enlivens even a dead person to come alive and do things. I'm very grateful to you all.

Merry Life is also being responded to by many Indians though it was originally meant for the Occidentals. So slowly, they are learning the inner side of things which I have been speaking through Merry Life. Merry Life is not a class where we speak of fundamentals of discipleship. Fundamentals of discipleship should be taken care of by each one of us, how to use our body, our senses, our speech and our mind. Merry Life classes are meant for inner contemplations, visualizations. In Occult Meditations as you all see (N: Master shows the book), Master CVV touched upon everything, everything about occult. And then, we have been dwelling upon certain grand dimensions relating to the rulers of the zodiacal signs. We started with Indra in Leo, and we have covered from Indra to Vivaswan Aditya, Twashta Aditya, Vishnu Aditya, Anshuman Aditya, Bhaga Aditya, Pusha Aditya, Parjanya Aditya, Datta Aditya, Aryama Aditya. At least I should remember if you all remember or not. Isn't it? For a teacher it is a great advantage to teach the students. He has to recollect what he has said. Repeated recollections happen in the teacher. So therefore teacher becomes more and more familiar with the inner dimensions of wisdom which eventually gives him a greater ability to contemplate and unfold things inside. So also with the students who also work with them. In case they work with them, they would also gain this knowledge. And we relate in wisdom, everything to man, because man is the micro cosmos while God is macro cosmos. There is no other to relate. Man relates to his Source, and the Source responds according to his relation. And he has the world around to relate to. He can relate to the world around, he can see the Plan of God in the world around, he can also relate to God within himself and experience the whole universe within. So, in that context, we have come into the month of Gemini.

This fortnightly teaching has really put us to a difficult situation in the sense that continuity has to be ensured by the Teacher and also by the student. The whole work is in continuity. The Wisdom remains with us and we are continuously in connection with it. So, continuity of consciousness is better held when it is frequented. When it is less frequent, we gather other things from the surroundings and in the meanwhile whatever is gathered disappears. But anyway we are in the month of Gemini. We met for once in Taurus, where I spoke to you about the descent of the Word that emerges in Aries. The Word emerges in Aries, it occurs. The Will of God occurs in Aries, and it happens around the Passover because the previous cycle concludes around the mid of Aries. That's where the Passover happens for the beings who have conducted themselves well in the previous cycle. This is an annual circular path in which beings can be lifted up to higher planes, and every time, Passover is an excellent period to pass over to higher circles. Then the Word descends thereafter, for the next cycle. As the earlier year passes over, concurrently the Word descends for the new cycle.

The descent of Word also happens in Aries, which is around Passover in the Western system, and in India, we take it as the constellation Kritika. The importance of Kritika is –Kritika means it is a scissor- in a circular movement of energies some point is chosen for the descent of energy. That is called “the scissors”. It is the constellation. Then, as it proceeds Kritika, the descent happens. That’s why in Vedic system we have one calculation of constellations from Ashwini. Another calculation is from Kritika. The two systems do exist, and it is only by intuition a student of Wisdom knows which is applicable for a particular purpose. Not all can be put into paper, much Wisdom remains at the level of intuition. And a student has to gain that intuition through his practices, and make his instrument fit to receive the Word. The Word descends in Aries, in Kritika, and passes through in Bharani, Rohini. In a vertical manner the Word descends. We have been speaking about the descent of the Word in Taurus. For want of one more class in Taurus, I had to just give away a paper giving the importance of the descent with Gopa and the descent of the Word, and how this sound, “Go” consisting of Sun - Jupiter combination was slightly explained on a paper just to give it out before May Call because thereafter, May Call has come, after the May Call some other events. And we have gathered today once again for a Merry Life class and we are in the month of Gemini.

The month of Gemini is ruled by Aditya Mitra, so this is the beginning of the class for today. I terminate after 7 am, getting into subject. Mitra Aditya is as much important as every Aditya, because that is where the Word touches the lateral sense from vertical sense. From verticals to lateral, verticals to horizontals, we say “verticals meet horizontals”. We make meditations but we do not synchronize, synthesize, and get the real purpose for which Grand Masters like Master CVV have given so many meditations in Gemini which are all relevant for the Heavenly Man to meet the man on Earth. We know that Gemini is the month where humanity is initiated, or where Narayana meets Nara. If you say, according to Vedic system “Narayana meets Nara”, we can also say “the Word descends and takes to a lateral step”. And there is the double sign in Aries, the first mutable sign in Zodiac is Gemini, and the Word that has descended in the month of Aries, reaches Taurus where men who are already accomplished they would be able to receive the Word even during the Full Moon time of Taurus. That’s where the festival is.

The people who can relate to Taurus Full Moon, or Vaisakh Full Moon, are those in whom the Sun energy is well attuned. They live as I AM. Men in Taurus are expected to live as I AM relating to THAT. THAT I AM is the status of accomplished man. THAT is represented by Jupiter. I AM is represented by Sun. So Jupiter and Sun together, they form the sound “Go”. “Ga” is the sound of Jupiter, “O” is the sound of the Sun. “O” is a composite sound, where you have “A” and “U”. “A” and “U” make it “O”. So, “Ga” is in Sahasrara. “O” is in Ajna, they make it “Go”. Or you can say GAU also. The cow is also originally called Gau and it has become Cow in English. It became “Cu” in some other language. So the understanding of the sound is, Gaa at the head, Sahasrara, A-U which makes it O in the Sun center, exalted Sun is at Ajna, those are the accomplished ones. They relate only THAT I AM, THAT I AM, THAT I AM (N: from Ajna to Sahasrara and vice versa). THAT I AM is their song. And we the students work from Brow center to reach THAT. And we are expected to reach the Brow. From Throat to Brow is all one energy system that functions. Therefore, when we get into Gemini, as the Word descends, it touches the human system. And the human is called Nara, meaning “the son of God”. It is also indestructible. Nara means Na-ra, meaning “non – destroyable”, and the name of God is Narayana. Narayana means “the prime energy” which moves in circular path of six months downwards, six months upwards; in a cyclical path it moves, and he touches beings in the month of Gemini. These beings are humans. The beings in Taurus are those who are said to be living in Go-loka. That’s why Taurus is filled with cows, bulls, calves, and then all everything to do with the world of

cow or the plane of cow, meaning it is a plane which is in between the Earth and Heaven. That's where we speak of Shambhala and so many other things.

So, when it comes to Gemini, Mitra Aditya, Mitra is inseparable with Varuna. Mitra and Varuna are inseparables. And Varuna rules Cancer, Mitra rules Gemini and Mitra brings in the Word and develops the lateral sense. That's where you have the One becoming two. "The Word gains a lateral sense" means it is one energy becoming two. That is where we have in the Gemini everything being formed from Brahman to Atman. These are all things which are generally not spoken. Brahman to Atman; the prime energy tends to take to a form. That's where you have the Cosmic Man happening. The Cosmic Man who is referred to in different theologies in different ways, basically He is referred to as "male-female God". And in Hindu system they call Him "Ardhanari", meaning, "half male-half female". Likewise, there is also Adonai, and in every system there is this male-female. The Word tends to be lateral and in Cancer it tends to be more lateral. When verticals touch horizontals, horizontals get into a circular movement. Verticals have up and down. The Law of Attraction and Repulsion, the Law of Economy, the Law of Synthesis at the top of the head, these are all you have to –if you are in love for Wisdom–, you should be able to, net them and connect them.

I know there are students in our groups who work on linking up things and finding the beauty of the functioning of energies in different manner. That is where Wisdom is truly revealed. At other times they only remain as disjointed things. You need to join them. That requires intense love for Wisdom. When you have intense love for Wisdom, when you have intense love for Truth, when you intend upon realizing yourself, then only this kind of chemistry happens that you are able to link up things. Otherwise, you have, like so many vegetables, disjointed. You don't know how to cook them into a good dish, and make it tasty by eating it. Wisdom is, you are given ingredients and you have to make the necessary cooking of it in you, through your intense love for Wisdom. Then things reveal, what are said by the Greater Ones gets revealed. Otherwise they are all different things like in the market, so many vegetables are available. What's to you?

If you are at your Aryama center, you are with the plane of cows and that's where the shepherd, the cowherd, by the Christ or Krishna, the Blue, the beauty of the Blue, all is revealed in that Aryama Aditya field, which pervades over Kritika and Rohini and then we get into Mrigasira where there is movement, and that movement leads to Mitra, and Mitra Aditya mostly functions with the constellation Ardra. Please make note of it. Ardra in Gemini is the one that causes the relation. It is the relation that is important. There is the vertical descent, and then there is the relating to. The entire energy of Gemini is how to relate to the world, how to relate to the other man. The science of relating to another being, the science of relating to your own source. This relating to, is a great dimension. This relation is what is called, truly speaking, "the Love". It is the impersonal Love, it is Love of God, which is also expressed as love towards beings. Love towards not only humans, love towards animal, plant, planets, minerals, anything. Just it's a matter of Love flowing. That is Shiva, pure Love. And through the Love that is demonstrated in Ardra –the constellation of Ardra is presided over by Shiva and Shakti, according to Indian understanding, or male-female energy, –it is from Him there is the lateral happening of the Mother. The Mother comes out of Him, and the two form the basic Cosmic Person. Ardra is said to be the greatest quality of the male principle and also the female principle, and that is the basis for the rest of the Zodiac. It is pure Love for beings, it descends, and then it is later Varuna that takes the whole game, drawing energies from Mitra. Mitra's work is that, the unbound energy is measured in Mitra. Mitra means measure. The energy which is boundless, which is beyond, when it descends, it is measured and the Word is measured, that's what it is said. That's why Mitra Aditya is also called as the measuring one, the Great Geometrician. Mitra is therefore seen as the one who measures the whole energy. The numbers are formed, the sounds are

formed, the shapes are formed, everything Mitra brings in and gives a geometrical system to the whole thing. "Our Lord is a Grand Geometrician", we say. The Scriptures say that God Himself is a Great Geometrician.

This geometrical aspect of God happens in the month of Gemini. That's where mathematics, all these subjects come in. So Gemini is the one where the Word takes to a measure. The Word that has descended from higher circles *via* Aries and *via* Taurus, it gets measured. That is what we say the Word descends from Para to Pashyanti, from Pashyanti to Madhyama. Or we say, from beyond to perceptual level, from perceptual level to conceptional level. Conception means, you are holding it. Perception means you visualize it, it is immeasurable. Then slowly, you bring it into conceptional level. From the conceptional level, Varuna takes it over. In the next month -that is in Cancer- he commences his work in the last part of Gemini itself with Punarvasu, the constellation, meaning it has come back to this Earth once again. But the major work of Mitra is with Ardra. That's why among all the constellations, some constellations have a greater significance. Ardra is the quality of the Mother. *Ardram, Pushkarinim, Pushtim, Pingalam, Padma Malinim*, like that. And Ardra means A-Rudra, meaning the entire Rudra energy is manifest there. So it is male-female energy. You do not have to worry about the names in various theologies, just understand as it is given in the New Age teaching. From Aries to Taurus, from Taurus to Gemini, from Datta to Aryama, from Aryama to Mitra, the Word travels. When the Word travels to Mitra, then you have conceived and you can express it. Expression happens in Gemini, and the Throat is the center, and humanity has to raise up to the Throat center, to pick up that Word.

Humanity has been given the body and the body has the facility to speak. Only humans can speak. Other species cannot speak. And we are given this facility to speak, and this speech we have to get rid of it. The speeches that we make in various languages, they are no speeches. They are noise. They carry tremendous darkness. We say that in our invocation also. Isn't it? "May it fill the darkness of noise we do". We keep on contributing to the darkness with all ignorant speeches coming from lower system, from Muladhara, Swadhisthana, Manipuraka, high up to throat, it has to be cleansed. The lower part has to be completely cleansed to receive the initiation that is meant for humanity in Gemini. We know from the books Gemini is for initiation of humanity. But every time Gemini comes, Mitra Aditya is at work. Do we get initiated? We don't get initiated because we are in the old ways. Old ways of using the body, old ways of using the senses, old ways of using the mind, old ways of using the speech. Our tongues are not fit enough to speak that which is coming from the Higher Circles. The divine Word cannot be spoken by all. Why? Because the instrument is not prepared. If you try to play music upon an instrument where the strings are not well set - in a musical instrument like violin or vena, if the strings are not well set, no music can be played on it. Isn't it? So also the human instrument shall have to be prepared to meet the Word in Gemini. To meet the Word in Gemini, it requires tremendous discipleship practices. That's where discipleship becomes very essential, and this discipleship is said to be in 49 steps. There are so many ways of saying it.

That's where Pentecost comes in. I have in a very lighter way asked our members from the West, "what do you understand about Pentecost?" because we easily speak about Merry Christmas, Merry Pentecost, Merry this, Merry that. What is merry about Pentecost? I have asked my dear sister Sabine Markgraf, "what exactly do you mean by Pentecost?" Then it went in rounds and rounds and rounds. Pentecost is an initiation in the month of Gemini. All knowers think of initiating in the month of Gemini. May Call is also in Gemini. And Moses gave the initiation in the month of Gemini to those who followed him. It is not that we forget the ancient system and the zodiacal system, the functioning of various Adityas through the various zodiacal signs. We just forget about the whole thing and limit the entire thing only to Jesus and his disciples. That way we are doing great injustice

to the Ancient Wisdom. Many things that Jesus did, coincided with the zodiacal functioning. His birth, his Passover, and then initiating the disciples. Knowers do like that. Knowers begin with the Winter Solstice, because that's the birth of the Savior. Capricorn speaks about the birth of Savior from ancient most times. Aries speaks of descent of the higher energies and ascent of beings into higher planes. Taurus brings in fresh energies. And then you go through the whole cycle which is regulated by the Adityas via the zodiacal signs, and there are constellations that give greater detail about them.

When it comes to Gemini, you have the constellations called Mrigasira, Ardra and Punarvasu. And this Punarvasu is in the last 4 degrees of Gemini. 13 degrees of Mrigasira, 13 degrees of Ardra, you can see the wheel yourself. In the middle of Gemini there is the reception of the Word from higher circles. And then it is transmitted to Varuna. There the work starts. That's where we have the double sign of Gemini, where you have, the imperceptible Word becomes perceptible for use. Imperceptible Word tends to be perceptible for use. Existence tends to be Awareness, this double nature. Electricity tends to be power. Everything gets measured, numbers form, sound takes to its symbols, there are varieties of sounds. Before we understand, and impregnate ourselves with the divine Word, what is important is that we prepare to receive the Word. To receive the Word, there are 49 disciplines. These 49 disciplines are 50 disciplines and not just 50 days as it is said –that the disciples from Passover to Pentecost, in 7 weeks they received the fiery tongues. God knows if they have received or not. It depends upon how much every disciple prepared to receive the Word. The Word of God, when received by man, it functions through him, then thereafter he is said to be the anointed one. Anointed by the Word, and the Word speaks. The Word conducts itself. The entire human system dedicates itself to the conduct of the divine Will of God, through the Knowledge of God, and the activity of God, which these three signs represent. Aries, Taurus and Gemini represent the Will, the Knowledge and the Activity relating to the Universal Soul or whom we call God. Man becomes fit to receive it, provided he works out these 49. They are given in Lalitha Tantra. 49 steps or even 48, in some tantra they say even 50. "*Pancha shat peetha roopini*" is one of the names given to the Cosmic Mother in the tantra of Lalitha, which means, "the Mother permeates the whole system with 50 centers", and I'll let you know how it is. The 4 petals of the Muladhara, the 6 petals of Swadhisthana, by that it is 10. The 10 petals of Manipuraka, 20. Then, 12 petals of Anahata, makes it 32. 16 petals of Visuddhi makes it 48. So when you come up to 48, when you cleansed all these petals, meaning Muladhara, Swadhisthana, Manipuraka, Anahata, Visuddhi, and you have prepared your Throat center as an extremely pure center.

Throat is the center where magic happens. Magic from invisibility to visibility. Whatever you think of, only through the throat you express. Then only it is manifested. So until throat it is all silent, from above. Beyond throat it is all silent. Below the throat it is an expression. So 48 petals have to be cleansed. And then, there are two petals here, at the Brow center which makes it 50. So these 50 you can find in the book of Leadbeater, you can find in the book "On Healing", in all our books we find each etheric lotus, the number of petals, the color of the petals, the sound relating to the petals, and when all these petals are covered or cleansed, and they are connected, that is what is called garland. And if you see, it is only, as I say, our intent, "deep intent". The Occult Meditations in these times in the month of Gemini are all relating to that only. Hunter is garlanded, is kept on throne, is given a crown, and the hunter becomes a saint, so you have to have this preparation. From May Call, if you follow the Occult Meditations, the ascent of man is eagle, isn't it? You have to move forward. So, 48 petals plus 2 petals, 50 petals have to be cleansed and you have to be at the Brow center to be able to receive the Word that descends. That happens in the month of Gemini and it is cleansing the 50 petals which relates to the 50 days. And then it is reduced to 7 times 7, and it is also further reduced to say it is on Sundays, isn't it? Please note it happens when Sun is transiting Ardra, it can happen.

When Sun is transiting Ardra, Ashwini, leaves it. Bharani, leaves it. Krittika is the beginning for this purpose. Krittika, Rohini, Mrigasira. 40 degrees, 40 days are over. Then comes Ardra. In the Ardra period, this happens around 49 to 50 days' time. That's where the Sun transit of the constellations should also be studied by the students, not only the Sun sign. That's where the importance is, what Sun sign constitutes what constellations. When it comes to Gemini, it is about Mrigasira, Ardra, and a bit of Punarvasu. So we should be able to note them. Not only Gemini, but also where is the constellation, because that constellation has a special impact with Sun energies that visit us. Likewise, Moon energies also. Moon we are now learning to follow, but see how Sun is for. In India they speak of the 14 days of scissors, which is called Krittika., and they've frightened a lot about Krittika because that is the scissoring time where the energies of Sun are so strong in the end of Aries and beginning of Taurus. Thereafter it is a great Summer here. Then later it will be followed by rains that come up at the end of this month. It is all in the scheme of things that from fire to earth, earth too air, then we get into water.

Now, coming to Mitra, he is the one who measures everything for the year. He measures and gives it to us. He is the measuring one, and later Varuna works with it. For example, I have made some... (Master reads some papers) Existence, Awareness – Awareness is boundless but it has to be measured to bring it into action, isn't it? Likewise, electricity is everywhere. We measure it and bring it to our purposes. Isn't it? Measuring and then later the measured one is conceived. And the conceived one is delivered. The delivery happens in Cancer. Birth of souls happen in Cancer. Birth of souls happen in Cancer, but before that, the perception, conception, what kind of energy, how much you can receive, firstly the male should be able to receive. Whatever he can receive only he can receive. Even for a mundane example, it depends upon the energy of the father. The quality of the father decides the quality of the energy he brings in, and then, the energy of the mother that can contain it. Later, the delivery is there. So also the Prime Energy is first measured. Mitra is the measurer. Varuna is the container. If you wish to have milk or water, anything, you need a container. Without container the content cannot be held. And what the container can contain, only that much, the content is given. Isn't it? What we can contain, so much wisdom only is given. We can't receive all wisdom. Why? Because the container is small. Make your container big, then you can hold it well.

So, Mitra is the measured one and he measures everything according to the existing system, because if he doesn't modulate, the planetary system cannot bear. Gemini decides. That's where the grand geometrician is there, that is where the cosmic man is there. If you see the writings of Master Djwhal Khul in relation to Gemini, he expresses the heavenly man as forming from Sagittarius to Gemini and beyond, because the whole thing starts with Mula in Sagittarius. And in the reverse order, from Sagittarius to Gemini, we cover from Muladhara to the Throat center, up to the Brow center. That's where the whole personality is. From Mula backwards, that is from Sagittarius zero degrees, Scorpio, then Libra, then Virgo, then Leo, then Cancer, then Gemini. So that's the reverse order. So, don't only see things as is given, you can work with these energies with different relation. And my idea through Merry Life Teachings is to put you to various types of correlating these energies. So from Gemini to Sagittarius there is a reverse wheel by which you meet the Word, provided you have cleansed from Muladhara to Brow center. From Muladhara to Brow center, to cleanse it there are 50 petals consisting of so many centers, which are represented as the lotuses. Before they become lotuses they remain as chakras only, meaning whirlpools of energy. Whirlpools of energy condition us. When they unfold into lotuses, they give us upliftment. So from chakras to padmas. It's also there in Occult Meditations. From chakras to padmas we move on. So 49 steps. If you see, in Kumbhakonam Master CVV has set up a vertical column of lights with 49 different lights. He gave different terminology for it which is entirely new. He brought his own terminology, but what is essentially important for us is that

we, as disciples, have to keep our personality completely clean in all these 49 steps where you have gained the energy of the five centers that we have from Visuddhi to Muladhara.

A man when he speaks, one knows whether he has the Word or not. Not all can carry the Word. When a man speaks, it is very easily known, does he carry the Word of God or does he not? Not all can bring in the Word of God. Not all can bring in the Word of God unless he has completely cleansed his personality and he has set his vibration of speech at such a level that he is able to receive from Higher Circles. That's what we say, in a musical instrument the higher centers and the lower centers represented by the seven strings, when they are in order the music comes out. So you represent as disciple a part of the musical system which can be played by the higher centers, provided we conduct our discipleship process with outmost care and outmost devotion. Then, only you have that intuition. Intuitionally, people receive. Intuition reception is called the Word. Then it expresses itself as a plan, and conducts itself. And it gets the knowledge also on the way. Knowledge comes from Aries to Taurus, in Gemini you are forming it, and then you express it. This is where Aries, Taurus and Gemini are considered to be most important Sun signs of the year, the primary Sun signs relating to the zodiac. And it concludes with Cancer. Aries to Gemini is one fourth of the cycle. Aries to Cancer is one third, four Sun signs. So from one cardinal sign to the other cardinal sign, the whole magical work from Higher Circles happen. This is what is depicted in the Indian system as the work of Ra-ma. Rama means, "Ra" stands for the Aryan energy, "ma" stands for the Cancer energy. That we will come to when we come to Cancer.

I spoke of Cancer many times in the West, but today we are speaking about Gemini, where from imperceptibility to perceptibility, from perception to conception, and that's where the whole work is, the container and the content, and the male and the female. The energy tends to be male-female because it is tending to express. That's where Mitra and Varuna, one becomes the two. Whenever it takes two different dimensions, that's where the first mutable sign happens, and from there the work happens. That's why all White Magic or the largest of magic, largest of higher magic, they all belong to Gemini and its opposite sign Sagittarius. Gemini-Sagittarius is a great axis, about which Master Djwhal Khul speaks so very clearly, elaborately, in the book Esoteric Astrology. And there are some more hints given in Spiritual Astrology by Master EK. But Mitra, the Aditya, please note, is the one who conducts all this, and Mitra means friendliness. The relation with the other, the second is formed, and then the first dimension of Mitra is measurements. Second dimension of Mitra is friendly relation. See, male-female are equals, they are never seen as one superior to the other. In all Wisdom Science, the male-female emerge as two from One, and they are equals, they are never said to be who is earlier, who is later. The Vedic system speaks of Para-Shakti and Parama-Purusha, meaning both are beyond, and they manifest at the same time. This manifestation of Pure Energy which is potential of male-female, it tends to be a male-female energy in Gemini. Male-female energy when it is formed, then the Cosmic Person happens. So therefore, the head of the Cosmic Person is located beyond Gemini according to Master Djwhal Khul, while his feet are in Sagittarius, where the constellation is in Mula. So, every month they have their own related practices.

Mitra, when the second is formed, what happens? One energy that becomes two, they are friends to each other, and friends are equals. Note that, friends are equals. Among friends there is no such thing as one superior, one inferior. That's where the whole problem in religion they have put down that which has become two. The male- female is a simultaneous formation. But then when women are considered secondary to men, the whole truth has fallen. The religious structures have lost their significance when they are not able to realize the equal dimensions of male-female principle. And that the female came from male, and male is superior, and even God is called as He, it's all lack of expression. When it is THAT, it is neither male nor female. Isn't it? We say TAT. TAT is not male or

female, THAT is not male or female. Truth is not male or female, it is together. Truth taking to a form, and taking to male-female dimension, it is concurrent. Therefore, the Mother worship or the Father worship have to be on equal basis. No one is superior to the other. In fact, when it comes to further descent, it is the Mother that presides over the whole Creation. Father remains at all times, stays put supporting the Mother. That's why the system says Siva supports and Shakti keeps on weaving the whole thing. Will supports Knowledge with the help of the Third Logos, keeps on weaving the whole Creation. We have to make this basic understanding. Without this basic understanding, picking up certain concepts and toying with them, will not help us to realize the Word in us.

The whole work is, it is the Word in flesh and blood. When the Word is in flesh and blood, it expresses. Then it is said, the One has entered into, formed himself a sanctuary and expresses himself. We have to make this sanctuary. So Gemini is the place where it happens. That's where the fundamental quality of Mitra is equality and friendliness. That's where Maitreya also represents this sign. Maitreya is said to be ruling over the sign Gemini. This is a different story. When I have another class I'll explain. So, Mitra is the one that relates to the perceptible universe. Before that there is from imperceptible levels the Word comes, it is impregnated and then it is expressed. So when we think of friendliness, the immediate friendliness is with Varuna. Mitra and Varuna, they are inseparables. They are the two Aswins, and Varuna conducts everything, Mitra supports. Even in the descent of energy relating to what Master CVV received, repeatedly I speak of Varuna bringing down the energies, isn't it? It is *via* Varuna, Sirius, that is the Heart center, *via* bla, bla, bla, bla, that is another story. The Varuna does the whole work. Varuni is the energy that flows through the whole spinal system. Mitra remains, supports, up to the tip of the vertical column Mitra supports. Varuna conducts. One is proton another is electron; like that we can say. So make this understanding in Gemini that there is something immutable, stable, and there is something mutable that conducts the whole chemistry. So, Gemini does all the chemistry relating to the year. There is one stable energy and one mutable energy. That's why Gemini has this mutability, the mutable part always plays around in connection with the immutable part. The immutable is God, is called Ishwara, the mutable is called the Nature or Parvathi. So, mutability and immutability together, they conduct the whole work, and the work is completely done in such friendliness, and no one is disregarded or downgraded. Downgrading and upgrading is only in the human mind. Beyond that, there is no such thing. At higher levels it is all friendliness. And so many modifications are carried out by Varuna.

The energy of Varuna conducts so many modifications in our system throughout the year. That's why we speak of VV, isn't it? The VV is Varuna energy. We say Cosmic Vertical Vibration. This Vertical Vibration conducts the whole restructuring of the body. That's where the energy is given once again through May Call for us, and from ancient most times it is the same process. Don't think someone has recently brought something new. They fall in tune with the Higher Plan and accordingly deliver things. And the more and more we understand that everything is in tune with the ancient order, in due and ancient form – there is a saying in Purusha sukta "*Yatra Purve Sadhya Santi Devaha*" meaning, according to the past, the visionaries, the seers, they bring down things in the same manner. If you are to bring out this program to you, the persons who are working with this electrical system they do the connections in the same way. If you do it in another way, it will not function, isn't it? Such is the work from Mitra to Varuna and how attentive we should be in relating to it. We, as the containers, try to receive the content which is coming from Higher Circles. And the content every year is differently sent out, according to the time plan. Every year has its time plan. So, the content is sent and that content, the advanced that are ascended beings among humans, whom we call Ascended Masters, those are the ones who already received it in Taurus, around the full moon of Taurus. And those who belong to humanity, we can receive it at large in the month of Gemini. That's how it can work, and that is what Mitra Aditya does in cooperation with Varuna.

This combination of Mitra and Varuna in the month of Gemini, is very important and it is the first mutable sign, meaning, it takes to changes. Gemini brings in the related changes, and thereafter the whole system has to be worked out understanding the male-female dimensions of every sun sign, male-female dimensions of every sun sign. Every sun sign has its male dimensions and its female dimensions and that we'll anyway cover with the Adityas stories. Our Aditya stories come to conclusion with Varuna Aditya when we speak of in Cancer. By that we would have covered all 12 Adityas in a very –I don't say detailed way-, but in a way that can stimulate you to relate and know more. It is a very sporadic way of presenting, because in between so many other programs we have somehow been able to conduct these 12 Adityas from Leo, starting with Indra. So from Indra when we come up to Varuna, the 12 Adityas get covered. And this is where the two energies, their relation is what is called inseparable relation. I said about Mitra being a measurer one, measuring energy, then I said Mitra means friendliness, equality, and they, at all levels work in equal, the spirit of equality is there. That's the high, which is also called Love. See the Cosmic Mother, Parvathi and Shiva, or Radha and Krishna, we have so many stories about it. So this is the inseparability, friendliness, and Love as it prevails. And Gemini is not only presided by Mercury, it is also presided by Venus. That's where the beauty of Gemini expresses itself through speech. See, speaking can be in varieties of ways. There is an artistic way, an art of speaking. Apart from art of living, art of speaking. Not all can speak well. Only those who carry the Word can transmit the Word in a manner that other get attuned to it and fall in tune with it and get into it. It is an aspect relating to Venus dimension of Gemini. There is a Mercury dimension of Gemini. The Mercury dimension of Gemini is to bring in the content in a systematic manner. When it comes to expression through music, expression through poetry, expression through even speeches in a very artistic manner, these are all qualities that come up in the month of Gemini. So this one becoming two, and they being inseparables in Gemini, there is an air that is produced. That air is called "Jara". We have a story in Mahabharata about Jarasandha. Jara is an energy, it cannot be separated. That's where male-female cannot be separated in Creation, they are together, because one itself has become two, and in two the one exists.

The two becoming one is the process in Yoga. The two becoming one is a process of Yoga. That's where even in Occult Meditations -I don't know how many of you regularly see the daily Occult Meditation which we transmit through various apps- Earth married heaven, woman married man, all these things that you get in Occult Meditations relate to Gemini. So, when human nature is in association with the divine Nature, that's the marriage. That I have explained to you through the story of Nala for some months. Nala and Damayanti, how they could become one, and then attain the Truth. So, two becoming one is the truth; one becoming two is for the play of it, for the experiencing of it. So from Gemini onwards it's a matter of the Word descending and experiencing in the world. And then the principle relating to Jara is expressed in terms of numbers. Ja-ra is also called Ya-ra. Ya and Ja are interchangeable sounds. Yamuna and Jamuna, Yesu and Jesus, Ya and Ja, in every language you find it. When it comes to Ya it is one, and when it comes to Ra it becomes two. So, one becoming two and the two together form an elemental in air. That elemental number is in one way 21 and in another way it is 12. Numbers are counted from the other side also. From left to right it is counted, from right to left it is counted. 12 becomes 21 or 21 becomes 12. The essential thing is, the air in Gemini is the air that causes the bondage, the bond between one and two, becoming very inseparable. They can at best become zero. When the two become one it is all unspeakable energy. They become two, so the bond between the two is that air, the mid-air which comes to Gemini from Aquarius. That's where the play of Uranus is most important in the month of Gemini. So I speak of Venus, I speak of Mercury, I speak of Uranus. Uranus is the inseparable thing that keeps the male-female principle together. And in togetherness the whole Creation is prepared. And the whole work is the work of interrelating between the two.

The whole creation is seen as a play of the male and female energies in different levels. That's how Gemini gives grand dimensions, and the whole work is conducted under the supervision of Mitra Aditya. This Mitra Adityam, the male-female principle, their inter-attractiveness should be understood through that energy; that inseparable bondage is what is called the constellation Ardra. We say in Sanskrit, Ardrata means your heart drops for the fellow beings. This is the ultimate relation. The ultimate relation to a co-being is expressed as Ardrata. And it comes from the constellation Ardra. And the constellation of Ardra is in Gemini. So, the descent of the Word via Krittika, Rohini, Mrigasira to Ardra is what is being conducted as an annual ritual, and it continues to work out for the 12 Sun signs. For the moment we are working with the Ardra Aditya and we are in it now. Sun is in Ardra constellation. And in 5th June we have Pentecost, isn't it? 15th April we had Passover. So from there we count since we know the numbers, and then say 5th June is Pentecost. Why is it so? The simple point is, there is something coming from higher circles and you prepare yourself clearing the 49 steps to meet it. Then Pentecost happens in you. Pentecost has to happen in the human, for a son of man to become a son of God. And it is an ancient most ritual. At every time in different parts of the globe, different groups of people received it and they presented it in their own language, but the phenomena is the same. Phenomena is the descent from Aries to Taurus, Taurus to Gemini, and the man raises from Sagittarius to Gemini in the reverse order, clearing the centers in him. Then in him the Word manifests. The Word of God manifesting upon the tongues of the beings, they become fiery tongues. We just don't become fiery tongues because we sit on Pentecost day or we prepare for Pentecost day. Preparing for Pentecost day means, clearing all the 49 centers in you. 49 centers are posited in the 49 petals that you have in your own ethereal centers from Muladhara up to throat and beyond, up to Brow center. Please note this. Do not go by peripheral understanding, go by deeper understanding and try to work them out within you. That would be doing a great job when we conduct ourselves to be able to receive the Word.

It is not a small thing to receive the Word of God into you, and then to get impregnated by it. And then you conceive it, you take to the pregnancy of the letter, and then you deliver it either through speech or through work. Then it becomes White Magic, not otherwise. When the two meet, the White Magic happens. When the two do not meet, nothing happens. That's why Narayana and Nara together deliver. Arjuna and Krishna together, they deliver. "*Yatra yogeśhvaraḥ kṛṣṇo yatra pāṛtho dhanur-dharaḥ*". That's how it is, when Arjuna is completely alert with his bow –bow is the cerebrospinal column- when you are with it, when Arjuna is with it, then, the Word of Krishna descends into him. "*Nārāyaṇaṁ namaskṛtya naraṁ chaiva narottamam*". Narayana connects to Nara when Nara is ready. The Word is always there, but there has to be a receptive receptacle. Isn't it? Broadcasting centers are there in the higher circles. Receiving centers, we should be able to receive. That reception can happen between throat and the Brow, if you have kept the whole system clean. That is where Gemini plays a great role, Mitra plays a great role, and Maitreya is presiding over it. Maitreya is presiding over it, He connects us up to higher circles. He connects us to Krittika, Kumara Krittika, Rohini and Krittika, they belong to Kumara centers. Aldebaran, Ajna center. So He connects. What is the great service that is happening, that we, through the Hierarchy are able to connect to the near systems! So the ability to relate to this, the entire work is in Gemini. And Gemini, with its solstice, 21st June it gets into Cancer, isn't it? So, that's where it goes up to even beyond Ardra to Punarvasu, up to 21st June.

So, take it seriously, because we meet only 14 days after, according to the new rhythm. We are now on 11th June, so next time by the time we meet, we'll be already in Cancer. Isn't it? So, make use of the rest of the days to connect well. Before you connect well, because it cannot happen over one year or two years. It can happen over a few lives, depending upon how much you have prepared and

how good you use your word, the speech faculty. How sublime is your speech? How silent are you? When you speak, does light come out? When you speak, does darkness come out? Isn't it? So, it is all, the whole alchemy is at the speech level, at Gemini level. That's why Gemini is also said to be the sign of alchemy. Be alert of the speeches. Be alert of use of speeches. Instead of these speeches making for nothing, you can utter forth sacred sounds; you can sing sacred songs. Use the throat to keep it as clean as possible. That is the ultimate of discipline for discipleship. That should happen with all of us, and we should be fit enough. Each time when we walk into the month of Gemini we should be better prepared to receive the Word. That should happen to all of us, and I thank you for having lend your ear to listen to this. It is a great responsibility to speak. Speech is a great responsibility. It cannot just be used away. It is the best energy that human is given. A lot is said, a lot is written, and we have also presented it in the book "On Sound" and in the book "On Healing" and kindly get to this, the discipline relating to utterance of speech. The first occurrence is Above, then it is uttered forth vertically, then it gets into lateral sense at your Gemini point. So be very, very, very, very attentive relating to your speech. Thank you one and all for your patient listening. I have overshoot by about 13 minutes and I look forward to see you again a fourth-night.
