

Dear Members of World Teacher Trust, Hearty fraternal greetings and good wishes.

1. We, the representatives of humanity are advised to be pioneers in setting the new world order. Corona Virus is nature's hint that we should learn to be clean inside and outside. A clean life is fundamental to human progress. Outer cleanliness, social distancing, individual needs of adapting to clean air, water and nature are but essential. Likewise, elimination of malice within is also recommended. It is laudable that within WTT there is no incidence of Corona infection.
2. Master Tibetan hinted 80 years ago that aspirants should get familiarize with Science of Touch and Vibration. We cannot touch anything and everything, much less to speak of hugging and kissing. One can greet each other in the Eastern way or Buddhistic way where the touch is only through looks and not through bodily contact. Practicing The Science of Touch and Vibration enables retaining one's own vibration and improving upon them by daily cleansing of the physical, emotional and mental bodies. Touch is avoidable with animate and inanimate forms.
3. Every touch results in exchange of vibrations in between two energy systems. In this context it is but relevant to say 'beware of touch, touch not that disturbs the three planes in you' — physical, emotional and mental. Touch of family members, kith and kin is allowed since the vibrations are familiar.

4. Disturbed vibrations are like disturbed waters, where mud gets mixed. Constant, consistent and uniform vibrations are like settled waters where the water is clean, while the mud settles down at the bottom.
5. Touching of plants and trees shall have to be tender. Be grateful to a tree when you pluck a flower or a fruit and be gentle. Such is the gentleness demonstrated by the Noble Ones. Cut not trees indiscreetly.
6. Your relation with animals including pet animals is advised to be one of much awareness. Know that, when there is a pet animal at home its vibrations fill the house. Its hair-fall dampens the ambience. While you may treat the animal with love, kissing and hugging the animals and sleeping with them in the bed has inevitable repercussions. While the animal gains your vibration you too gain its vibration. Kissing the animal (like cats and dogs) has imperceptible impact on your vibration. Avoid killing animals and eating animals if possible.
7. The Science of Relating to the surrounding to the nature, plant, animal, human and Deva kingdoms is a complete science by itself. It opens imperceptible doors into the subtle side of life.

“Let laws of right relation be learnt.”
