Felicitation Ceremony on the occasion of Conferment of Honorary Professorship by AU and Successful Completion of 56th Tour to the West

Hotel Daspalla – 14th July 2013

Message by Master K.Parvathi Kumar

For any discourse I give, there are always 3 mics - One for future generations to hear, one for you who have gathered here and one for those hearing from other places online. So I am bound by 3 mics always when I speak :). Someone asked me “Are you always tied with these wires?” I reply “Even the being cannot stay in the body if he is not tied to it by the 3 qualities.” The being always looks for freedom but he is bound in the body voluntarily and leads a life. When he leads a righteous life, there is no worry of freedom and also it leads to ultimate happiness. The experience of staying in physical is different from that of staying above physical. Complete experience is possible only when one stays and works through a physical body. Working through this body in the right manner, one can experience happiness in all 7 planes. Now coming to the present.

Hearty fraternal greetings to all those on the dais and to all those who have gathered here. I am very happy many elderly people and elite members have gathered here to bless me.

I want to tell you all one thing. I told this to many, but they are not believing me. I am not so intelligent or not so very talented person. Right from childhood, I did not have any plans for my future. The only thing I believed in my life is that everything goes as per the divine will and I just followed in the way the divine took me. I had complete faith in divine. So I believe that even this felicitation ceremony is an act of divine.

The professors of Andhra University have lot of love towards me. It is also due to the divine blessing because I did not do anything to them in particular. If you do a great favour to someone and that person likes you very much, it is common but if someone likes you without any reason, it is definitely a divine blessing.

This year I was invited to the annual valedictory function of the Commerce and Management department of Andhra University (AU). Everyday I see how the divine functions. This honorary professorship is also a blessing of the divine. That day, the principle of Arts and Commerce College of Andhra University, Sri.Prabhakar raised a point that I should be given honorary

professorship and immediately Dr.G.S.N.Raju, the Vice Chancellor said that he would confer honorary professorship on me if I accept. I do not generally accept honors or awards from everyone. But this honour comes from Andhra University, which I consider to be the mother of my education. So I felt that it is a will of the divine. The divine puts you into certain situations always observes you from inside. Whenever someone praises or criticizes you, it should be seen as divine and you should remain silent. I always follow this principle.

The place that I like most in Vizag is the Andhra University campus. Whenever I have sometime I try to visit that campus. I studied there for 5 years. I had many good experiences during my period of study in the university. Even today, there is a grand consciousness that keeps flowing in that campus like the flow of Saraswati. I received lot of there, when I moved in that campus, there both inside and outside.

All this is the splendor of the Lord as described in Purusha Sukta. So from childhood with no reason or logic, I had complete faith in the Lord. Logic is not important but conscience is important. The conscience is far superior than logic. If you do acts with conscience, the events that happen develop into a logic. We can develop a logic after a series of events happen but they do not happen so if you plan with some logic. So I do not believe in logic much. I believe in the energy, the background consciousness that runs each one of us. It is not us. If it is you, it should have been under your control but it is not.

The energy that wakes us up is the one that is always present in us and takes care of us all the time. It presented us with many opportunities in this world. For us to utilize these opportunities and fulfill our duties in this world, what is required is sraddha. There is education relating to inner aspects as well as outer aspects. The outer aspects help you function in the outer world but they do not help you inside. They do not help you know yourself. There is more splendor inside than outside. The splendor inside is 10 fold that outside.

Where do you go when you sleep? Do you know? We just know that we are sleeping and that we are waking up but we do not observe what happened in between the 2 events. Only an ardent aspirant has the interest to inquire and know such things. Through such an enquiry, one knows that there are many subtle invisible planes above us and the beings in those planes guide us in this physical plane. All the thoughts and acts that happen in this plane are manifested from the higher plane. It happens in 4 stages – Para, Pasyanti, Madhyama and Vaikhari. Any activity or thought begins as a seed in the subtle plane and manifests on the gross plane. A Rishi is one who can see it happen in both the planes. One should remain a mere observer in all activities to be able to see the background of everything that happens.

I always try to see the background of all the events that happen. I see that everything changes around me and I have always remained the same. Nothing belongs to me and nothing is done by me. Everything just happens to me and there is ONE who functions through me and even through all of you. He is permanent and we are also permanent but all that gathers around us is

not permanent. The Lord and the being are permanent. We should try to be alignment with the Lord. In this manner, if your life is useful to 10 people around you, your life is said to be fulfilled. '10' does mean only 10 but multiples of 10. We just say 10 because it is a complete number. So more the number of people benefitted by you, the more you should be happy and see the divine in all that happens. I used to practice this from my childhood. I used to get many beautiful experiences.

When I was awarded honorary doctorate, it was very much unexpected because as per the rules honorary doctorate is not awarded unless one is 60 years but I awarded at an age of 51 years. The the Vice chancellor put up an application that I may be conferred with honorary doctorate. He said "I felt like putting up an application to the Governor though I knew that is it not possible as per the rules. But the Governor accepted and signed this application first and only then he signed the other applications." Does it happen if we want it to happen or if we plan it? It is only because of divine. So if the Lord decides, nothing can stop his will. It is said, if the divine wills, even a dumb person can speak.

When I first joined the university, I could not talk in English as I did not study in English medium in my school. In college, my professors encouraged me a lot and I slowly started speaking in English. In just 2 years, I started speaking fluently in English and one of professors also used to ask me to take classes sometimes to the other students. I had such encouragement from my professors and the university. So I am very happy and privileged to be given this honorary professorship.

One is very lucky one if one has grace of the divine working through him. Not all may be so lucky. I am lucky enough and I am telling all this because you should know that all this is the work of the divine and not me.

I am also happy that Dr.Vijaya Kumar is also present here. He takes my instructions to the core and he follows them without any doubt. I told him when he came to me for consultancy on taxation "There is a self Esteem in paying higher taxes." He took my word and he became the higher tax payer in Visakhapatnam for 5 years. He is a great person with many ideals and a very elite member of this city.

Before going on the tour, I told him "A good ranker in Engineering is not getting jobs in our country" referring to the resume of a girl who came to me for a job. He replied "Give me that resume and I will take care of her."

The youth of today have very great skills and their skills are 10 times greater than the skills of our generation. Their energies are to be channelized properly otherwise it many have a very negative impact. There are many skilled youth in our country who are unemployed and this scenario needs to change. Our skills are better recognized and appreciated in other countries than in our own country. They have lot of respect for our family structure.

The people of all nations have great respect towards Indians. We don't know much about our Indian culture and its greatness. A German professor told me "We are looking towards India to uplift the humanity on the globe." So we should realize our potential and channelize it. We should know how to control our minds. Only our Buddhi can control our mind. The mind should function in alignment with our Buddhi. Otherwise it will have a negative impact on our lives. There are many people in other countries who wish to follow the Indian way of life and have great respect for Indian culture and Indian Scriptures. They ask me to teach the same when I go there. I was invited to even nations like Cuba, St. Sebastian, Paraguay, etc. about which we generally do not hear in the world news. They are so much interested to know the grand wisdom coming from India.

So we should remember that all is divine and everything is done by him. We are just mediums to him. Lord Krishna tells Arjuna "Even though you can shoot arrows with both the hands at the same, you are just a medium."

Now in brief, I will try to give some of the details of my 56th tour.

Every person has a divine Ashram within in his heart centre. It shines forth with golden light. One who enters that Ashram would be able to meet all the Grand Masters working in Subtle Ashrams on the planet. I gave some discourses on this topic in 1991 which was later brought out as a book after 20 years. The book 'Ashram' was released and distributed in both Spanish and German.

Astrology is the most important key to knowing the Vedas and the Ancient Wisdom. It is like an eye to the human body among all the senses. It helps us to know ourselves and the impact of planetary energies on us and how to work with them to grow in consciousness and fulfill ourselves. I was giving related teachings pertaining to each planet for many years and later books were also printed. The books 'Jupiter' and 'Saturn' were re-printed in German.

Also the book presenting the yearly activities of WTT global was distributed.

In Spain, a lady Gynecologist was given an award when she spoke in a convention on 'Universal Peace' based on the teachings given by me. Also WTT was given an award along with her.

(Master showed all other things like books, crystals, etc. that were distributed during the Seminars in Germany and Spain).

So after touring in 3 countries, I came back today morning. I presented briefly some of the details. I do not want to talk more because many elite members have been sitting here for a long time. They have many responsibilities and their time is very precious. I thank all of you for coming here and staying here for a long time.

-Swasthi
