

Meeting of Solar and Spiritual Astrology of East and West

2 Evenings in Paris

With Master Kumar, organised by Thot

Paris, 24 and 25 June, 2014, from 18h to 21h

Centre of the Brahma Kumaris, 74 rue Orfila - 75020, Métro Gambetta, Métro Jaurès

- * Spiritual Astrology: The Real Science of the Soul
- * What can Astrology give to the World in this Time of Crisis of Planetary Evolution?
- * Which is the Place of Astrology in the New Age ?

Speakers: Fanchon Pradalier-Roy (FPR) & Samuel Djian-Gutenberg: SDG)

(These notes are only for personal use. They are incomplete and might contain mistakes, lp)

Tuesday, 24 June 2014, evening

Thot opens the conference, saying thanks to the Brahma Kumaris offering the venue.

After a short meditation Thot introduces the 3 great masters of planetary and solar astrology, Charles Vouga, he did a profound research on the 3 planets, Uranus, Neptune and Pluto. Dane Rudhyar was a prophet of the human science. Dr. Krishnamacharya wrote a book extraordinary called Spiritual Astrology. It gives keys and directions for the path of yoga for understanding the word Scriptures the wisdom.

Tonight we have the honour of having with us 3 great followers of the 3 Master, FPR, she met ...the partner of Charles Vouga and worked much on the new astrology. SDG, has also studied astrology with... (the lady of Charles Vouga) and Dane Rudhyar. And our guest of honour, the Master Parvathi Kumar, the successor of Krishnamacharya, has travelled a lot with Krishnamacharya and continues the tradition of the teaching of synthesis. The vision is to create the fusion of East and West. He knows very profoundly the teachings of the Tibetan Master Djwhal Khul and the teachings of Krishnamacharya, which complete the teachings of DK. The teachings of DK are more for the group consciousness and the one of M. EK is greatly an individual astrology. He is also a Master of Wisdom and of Meditation.

The theme of the evening is, Astrology as the science of the Soul. What can Astrology give to the World in this time of crisis of planetary evolution? Which is the place of astrology in the New Age? FPR begins, then SDG and finally M. KPK.

FPR works in the line of Charles Vouga and his partner, Germaine Holley (?) The greatest discover of the 20th century is that man is a solar system. (Ch. Vouga). The spiritual astrology is the science of consciousness, and allows us to work on the fields of the growth of consciousness and experience. There are 3 components: symbolism: archetypes; Consciousness: Psychology, energy/soul

And the science of cycles (time): matter/form.

Ch. Vouga has worked in the USA in the 30ies and has received his principles of astrology by mediumship. He has done experiments. He has done relations between the collective and individual planets. And he has shown that the cross is the model of consciousness of the soul. He worked especially on Pluto and Neptune. When you have Neptune on the top of the ladder you don't know where Pluto is in the depth. In between is the battlefield of life. He proposes as symbol for Pluto the inversed symbol of Neptune: Pluto the subconscious, below of us, and the Neptune above us

supra-conscious (Neptune), transconscious (Uranus), subconscious...(Pluto)
(Graphic) (speaking too fast)

SDG: Germaine et Charles Vouga.

Sri Kumar:

Metam Me ...

Hearty fraternal greetings and good wishes to all the brothers and the sisters that are gathered here.

In tune with the Plan, we are all here this evening to dwell in the science of life called astrology. Astrology is called in Sanskrit Jyothir Vidya, Joythi is light, Vidya is science, it is the science of light and its purpose is to realise the Light.

Realise the light within and to realise the light outside, then man can function as a soul with personality as vehicle. Therefore from ancient most times astrology is regarded as the means of the basic means to attain light. According to Veda there are 6 keys to light, among these astrology is the chief key. The Veda says,... among the 5 senses that we the eye is most important. It is the middle principle, the eye, it transmits light and receives light, it is through the eyes that we transmit whatever is within. We receive light through the eyes of others. We speak to others looking into the eyes. It is called transaction of light. We seek light from within and without. We have the joy of transacting light and that light can be better realised through the science of astrology.

The science of astrology uses many keys to realise the light. Every planet is capable to give us the needed system. The planets in the solar system work in symphony and we have the music of the solar system.

The Sun is the king of the solar system, and he is the reason for much light we receive and we are also a sun and we have the planets in us.

From Jupiter to Saturn we have the ability to expand and consolidate.

From Mercury to Venus we have the ability to comprehend and experience and we have Moon and Mercury.

Moon enables reflective ability and Mars enables us to reach the necessary transcendence thanks to the force. If Mars is in the lower triangle he is devastating, if he is in the higher triangle he brings down the divine dimensions. He is Kumara in the higher circles and a warrior in the lower circle. From fighting outside let us fight inside. We have fought enough outside; we have to fight within the nature that reacts on the darkness and ignorance. Mars is force and whatever is the passion, it opens the way in that direction. If you direct it to the inside it opens the way up. If we apply the Martian energy into us the horizontal tends to be vertical.

All the planets have their beneficial aspects and also the mundane aspects. Therefore the 7 planets in the solar system shall have to be related to the human system. By that man realises that he is a son of God. He realizes that he is an image of God. That was the chief work with astrology in Vedic times. We regularly receive the energies of the different planets and when there is harmony in the solar system there should also be harmony within us. Therefore we need to find where these planets are within us. When you see the centres of the planets within us and consciously relate to them in us and relate them in us the antahkarana sarira is formed within us. The cord of life is in us, the system cerebro-spinal system relates all the planets within us. There is the positive node above the diaphragm and the negative below the diaphragm. If we relate the lower triangle with the upper triangle the upper triangle slowly prevails over the lower triangle. When the lower triangle receives by reflection the light of the higher triangle, the personality gets infused by the soul. Then, one becomes soul-infused personality. When you are a soul infused personality through oneself the light transmits itself according to place, group and time.

Spiritual astrology transforms through right practices a mortal man into an immortal man. Man lives mostly with the help of the mind reflecting the outer world. That mind has its moods, it has phases of waxing and waning. This differs today from tomorrow, ever changing quality belongs to the mental. The minds are all born out of moon, the reflective principle. The changing mind in a changing world. Neither the awareness nor the consciousness of man is stable and the nature is ever changing. In an ever changing world you are able to experience and make the best experience. Staying in mind we try to make experience, we are on an unstable platform. On an ever changing platform you can't well dance. We need a stable platform. Therefore Moon has to relate to Mercury. Mercury in Sanskrit is called Buddhi and called Budha its planet. Man who is a manasa, mind, he has to shift his awareness to Mercury or Buddhi. When he remains in mind he is bound to die.

By relating to Mercury he causes the needed ascent, then he tends to be immortal. This is due to the change of identity. The identity that each human carries is related to his personality, that I am Indian, man, human, that is all personal identity. "I" has neither nation, sex, not limited by form. Man is to his personality. By shifting his personality into mind he transcends the personality. As personalities we are different, as souls we are one. As per the comprehension we carry, the comprehension has to change for the better. The lower triangle with the help of mind always tries to gather, mind knows how to gather, more and more, it is never satisfied. If we get something it plans for something more. And again when you get it, it looks for something more. It is an endless game and in this process you die.

There is a saying in the scriptures that a dog has found a knife with blood on it. Maybe better a tiger. It saw the blood and started licking and got more and more blood. As much as the sword is licked as much blood he is getting. That is how the mind works. Mind works so intensely with the help of Mars. The position of Mind according to Indian astrology is the solar plexus. The position of Mars is in Sacral, and the position of Saturn is in the base centre. Mars and Saturn give the related force until the man dies. Then whatever is gathered Saturn wants to consolidate; he realises that all that he gathers doesn't come with him. No one could ever take anything with him when he departs from the body. Mind forms a triangle with Mars and Saturn and keeps on working to gather from objectivity and the Story is like the story of the one who died licking the sword. So many die on a daily basis. We also die unless we make the change. Astrology helps to make that change. The astrology that helps you to make the change not to die is spiritual astrology. You change your abode from mind to Buddhi. Buddhi is the light of the soul. The soul is the Sun of man. The soul is called Atman. Each one of us is a sun.

In the scheme of evolution each one of us is a future solar system. We are a sun and have the other planets in us. When the higher centres are not active it means they are in the shade; that is the work of the positive node. Positive node causes a shade on the higher triangle. And according to Indian astrology it is better to have a relation with the negative node because it causes a shade on the lower triangle. Each time when we are released from something from the world, some are released from vocation; some are released from impediments of obstacles of the lower self. It is the work of the negative node. Therefore we call Kethu as the means of liberating, Mukthi. Astrology can be better used with light to have experiencing the light within and for realising the self or the soul.

The lower triangle, the lower three centres below the diaphragm is called Makara in astrology. The sound Ma stands for Moon, the sound Ka stands for Saturn, the Sound Ra stands for Mars. Makara means, the crocodile. Each one of us is caught by the crocodile. When you are in the waters of desire, the Makara bites you. The Makara is the being that has the best grip in water. No one can release himself from the grip of Makara. Therefore there is a way to get out of the grip of Makara by relating to the higher centres in us which are centres of Love, Light and Will. The will of the higher triangle reflects as desire in the lower triangle. The love impersonal of the higher triangle reflects as desire, the comprehension of objectivity which is the mind opens. When Mercury is reflected then you see the light also in the outside. Then we say all is light, light is Yoga.

All this becomes a reality when the thought is transferred. This transfer is most important otherwise mind continues running after objectivity. Another illusion of the mind is that by gathering knowledge from books, it makes you believe that you are enlightened. The more books you read, the more you get confused. What is important is to work within, to draw within, to turn the mind inward. Mind is not only lets you see into the objectivity but also into subjectivity. Mind is objective and subjective. You may have known the God Janus in Greek and Roman mythology. One head looks forwards, the other backwards. The mind that sees without can see a different world within. The Veda says you find the inner world 3 times more splendourous than the outer world. All that we see is only one fourth. Three times that you have divine and immortal world within. That is why astrology is the chief key to work with. We now accept hundreds of theologies, we accept reincarnation, we go through incarnations but we die and forget. There is no continuity of consciousness. If you have the continuity of consciousness you can be progressive. Whatever we have learned and remember we don't repeat the same but take to the next step. When we lose the continuity of consciousness we

do the same thing again and again. We have eaten the same thing many times, We have heard many things the same time. We have done the same routine of growing, learning, marrying and dying many times. For how long? How long would you do it is the question that rises within all of us.

In the plan of evolution, every human get conscious that he does the same thing all the time. Cannot there be a better way of doing it? Shall we go around like a donkey around the mill? When we relate to the higher centre, then it is cyclic. We build an alignment between the higher and the lower centre. These centres exist from the head to the end of the spine. That is the lighted path within us and they are all connected. This is the royal path when all the centres are related. That is an autobahn. The higher centres can come down to the lower and transmit around. The lower can be received to set them high through transformation and transcendence. When the higher and the lower are connected your residence, changes from solar plexus to heart. That is the first steps that astrology suggests. Let there be transference of your dwelling. We have a lighted house when we are in the heart. We have not so very lighted houses when we are in the solar plexus, there is some light but not so much. The light of the mind is seen as the bed light in the room. We keep a bed light only to see what there is around but not much. The light of Buddhi is like a flash light. We have a much greater range of comprehension and we realise that we have been living in a very shady house when we have the full light in you.

We are now in the house of Cancer, it is the 4th house. The message is, don't just live with Moon, the Lord of Cancer. Bring Jupiter, then you have a very great light in your house. That is why in India we celebrate Cancer full moon as the full moon of the Teacher, we call it Guru Purnima. We have sun and moon in Cancer making a triangle. The presence of Jupiter is like the presence of a magnet. Jupiter is a permeating consciousness. When you meditate the centre of Jupiter - which is on the top of your head in Sahasrara - and visualise light coming through Ajna and throat to the centre of Cancer in you it enables you to gain a better personality than before. Each one of us, our personality is our house. House is the personality, whether it is a dark, a semi-dark or a fully lighted house. To light the house would enable you to transmit light into the surroundings. When there is full of light in you it shines into the surrounding. This can be done with the help of invoking the energy of Jupiter into your Cancer centre. And you are already Sun, each one is sun, we are in the month of Cancer, then the awareness would naturally be the consciousness in the Cancer centre. The expansive consciousness of Jupiter can see better in the mundane world and conduct the activity until Capricorn.

In Capricorn again there is the mount where you start ascending. This is how there is a way to relate to the planetary energies in us and meditate. Energy of Jupiter can be related to the energy of the base centre, where there is Saturn. When Jupiter visits Saturn, the Saturn that conditions and crystallizes us is liberated. Visualise the bridge between thousand petalled lotus and the base centre. That is why for esoteric reasons the Lord of Cancer, Jupiter, is meditated in the base centre, Ganesha. Likewise Ajna centre can be related to the sacral centre, you get the energies of the Kumara to the energies of Mars. Mars is Kumara in the higher centres and force in the lower centres. Mercury can be related to the moon, from heart to solar plexus. You see an age-old science given for working out the bridges between the centres, that is building the antahkarana. This is very well described in Esoteric Astrology by Master DK. A change can be conducted by regular building of antahkarana and meditation. Then you become an aligned one. The upper and the lower in you are aligned so that the energies that come from the higher circles can conduct the plan in the lower circles and the lower circles can be inspired to take to the higher circles. You bring the energies of devas to the earth to cause the ascent of the mortals to the immortality. There is a ladder in you what is called Jacob's ladder in Old Testament. Jacob's ladder enables the devas to descend and to the mortals to ascend. That is one dimension of spiritual astrology, there are thousands dimensions.

Another aspect is to take to the attitude to give, to share and distribute, than to gather, accumulate and keep. All we have shall have to be shared with the surrounding live. Then only the energies from higher circles will dispel the energies in the lower circles. Material has the tendency to imprison the spirit. Material divides, the mind that is mundane knows how to

divide and get, to manipulate. Spiritual astrology says, a mind that gathers is an ignorant mind, a mind that distributes as much as it gathers or more would enable the man to release himself from the mundane plane. Man means, the one who lives in mind. Man is the word that came through MAN, the mind, this came from the founder of our race who is called the Manu; from Manu we gain the mind.

That Manu has a mind that is subjective and objective. We are only educated to get the objective mind and not to get the subjective mind from the childhood. Therefore we have to go to school to help humans to develop the subjective mind from childhood. Objective mind has no ability to turn to subjective if he doesn't use certain practices. As much as the mind looks outside, experiences touch and taste and smell, through all the 5 senses it can experience objectivity by it; it has the potential to experience the subjective. The centre of solar plexus is the 10 petalled lotus. Most books show the 10 petals in the same direction and only one book it is in the right way, it is in Letters on Occult Meditation where he shows the 10 petalled lotus with 5 petals upwards and 5 petals downward. For an intelligent student it confirms that there is as much a subjective mind with 5 senses for the inner and 5 senses to the outer. We educate from childhood only towards the outside and nothing towards the inside. It has developed only towards the outside and the program to gather more and more. The subjective mind remained unattended and unnourished and it cannot see inside, listen inside, feel the fragrance inside, no taste for the inside is developed. The inner centres can reveal you the experience; when you train the subjective mind, then you are the same active as towards the outside. The 5 petals that are upwards oriented in the solar plexus can receive the light of Buddhi. Regularly there is the impact on the subjective mind; it cannot impact the objective mind. If you turn to the other side you cannot see it. The way you angle your mind decides.

Aristotle said to his students, which way do you angle your mind? If the mirror is shown to the earth it reflects the mundane, turn it the other way and it shows you the light of the sky. Mind is mirror; it reflects where what you orient it. Turn inward and then relate to the light within. There is the headlight of beauty above. Constant meditation with the headlight in you enables the subjective mind as much as it can receive on a daily bases. Jupiter in Sahasrara, Sun in Ajna, Mercury in the throat, together reflected give the beautiful experience of Venus in the heart. The more these three planetary energies are reflected in you, the more the consciousness of Jupiter, the illuminating concept of Sun, the Mercury that gives you discrimination, the second sun in the solar system in man. Mercury has 6 times more light than the earth. When all that light is reflected on the mind then you have a different understanding of light. As much as we related to all the centre in the upper part of your body the reflective energies which exist in Mars and Saturn, Jupiter's counterpart is Saturn, Mercury's counterpart is Mars, when the higher reflects in the lower there is an electromagnetic effect that the lower is put to order then you experience the beauty and immortality of Venus.

Venus in Vedic astrology is the giver of immortality. It causes resurrection from death, release from death. This is how – I'm only speaking of one of the many, many ways you can work with spiritual astrology. But to work with it, you cannot work the contrary in objectivity. When you are trying to invoke more and more light into you, if you gather from the objectivity many things and thoughts, you are only doing the contrary.

It is like a frog in the well, he sees the light in the sky and wants to move up to see the light in the sky. The sky that he sees is circumscribed. It wants to ascend, it ascends by 2 meters during the day and by the night it slips back 3 meters. Those that try to work with the light shall have to consecrate not to gather but to give. Otherwise all the effort that you make to gain the light is counterproductive when you engage in objectivity. Let there be sharing, giving a part of your life. Distribute whatever you can. There is only one giver, the sun. The sun gives all the light that comes to it, it doesn't save something in the bank. As it comes from the central sun it distributes, distributes. That is why he is shining; he is in the firmament, the king of the solar system. We are also suns; we cannot be otherwise what the sun is doing. Let us transmit light, let us transmit life, let us support life, let us help the surrounding. That is called in the East Yagna. In all that you do you only orient to the benefit for the other. Don't look to what you have got but what you have given. If I have bought this

shirt, in the price that I give there is a large community that is benefitting. The farmer who grew the cotton, the weavers who weave the cloth, the tailor who has cut it. With one act of your payment you have helped so many. If you have this attitude you don't look for discount, you don't fall into the trap of business, "buy one and get one free". Let us get one and give one free. That is the platform on which we can work with spiritual astrology. Without that we would be like the frog in the well.

Another example is given in the Scripture. An elephant walks and takes earth and puts on himself dust. He keeps on wrapping the trees and putting the dust. It has also the tusk, with the tusk it gathers dust and throws it up. After a while it feels irritated by all the dust, goes to the lake, cleanses himself but again comes out to do the same thing. That is why till today, it is said. "Why an elephant doesn't understand why it gets dirty again?" Like this, many aspirants adapt many spiritual practices but don't gain the needed light when we continue our old habits by gathering with the help of mind. Since we have 2 minds, the objective and the subjective, if you want the subjective to be more active than the subjective, release, as much as you releases the material so much you gain the inner light. That is how the spiritual astrology enables each one to realise that death is a myth. It enables the personality to realise that the sun shines in Solomon's temple. 3 suns shine, the light of the heart, of the Ajna and of the Head shine in the person. The light of Sahasrara is called OM, the light of Ajna is called SOL and the light of the heart is called heart. That is how the temple of Salomon is with us. SOL OM AN. The Solomon, you don't have to do the physical action, it is a visualisation. This knowledge is not new, it comes again and again according to the need and the time, what I say is not new, it is there since the beginning, there is no new knowledge, no new wisdom. When we know it, it is new to us. Paris is not new to you but for my friends. First time I came to Paris in 81, 33 years later I give an astrology course here, it is all in accordance to the Plan.

I tell you one dimension and if possible I continue tomorrow, it is very important. That dimension is the dimension of Uranus. The Saviour has come to be, when Uranus has contacted the planet. Uranus is the sun to the Sun, Jupiter to Jupiter, the World Teacher to the World Teacher, it is a grand energy. That grand energy since this energy is on the planet there is a significant change on the planet. The first noticing of Uranus was in 1835, with the coronation of Queen Victoria of England. She is the one who put an end to colonialism, letting freedom to the colonies. She is the one who has stricken the bell; that is the beginning. Madam Blavatsky has caused a great extension of the knowledge contained in the Himalayan ashram, she gave the root races, the many changes from the very beginning 1881, she caused an expansion of human knowledge and gave in detail cosmo-genesis which has been hidden in India. The hidden light of India was brought out by HP Blavatsky. An in her narration, she covered nearly all the theologies of all parts of the world. And she predicted before she left the body that at the beginning of the 20th century there is the visitation of a very great energy from the South, South means the south of our system. To the south of our solar system we have Sirius.

This solar system is guided by Pleiades and Great Bear. Pleiades play the role of mother to our solar system; Great Bear plays the role of Father to the solar system and Sirius the role of the Teacher. You find these details in Initiation, Solar and Human, and also in Esoteric Astrology. Madam Blavatsky has foreseen that there is a great energy that would be coming into our system from the south of our solar system and that it would transform the planet and the planetary beings and it is an inter-planetary beings and it will fulfil the prophecy that humanity would transcend mortality to immortality and would transform the matter to be etheric. Man also tends to be etheric. And since this energy is the incoming energy, it would really do good to the planet and to the planetary beings this would happen in the beginning of the 20th century.

The followers of HPB were inspired by this information and thought that if they could prepare a few beings, it could be an avatar functioning on the planet. Therefore they chose a pure soul on the planet, gave him a strenuous training and told him that he would be the avatar to be and the humanity would profit at large. It was taken with the accord of the parents and put to austere practices to relate to light due to these practices and was awaiting this energies

but the Divine had another plan. That is how the very venerable Krishnamurthy was mistaken, it did not visit him; it visited another person.

The energy visited an advanced initiate from the Ashram of Master Jupiter and took place in a village called the Aquarian Angle. In the local language it is called Kumbhakonam. Kumbha is Aquarian, konam is angle. He took birth, coming from Master Jupiter's ashram which is in the Blue Mountains of South India. The energies came from the Supra-cosmic plane via the supra-cosmic intelligence which we call Varuna. The energies of Varuna are worked out by Uranus. These Varuna energies entered into the Sirius system and from Sirius they are transmitted to the central sun of Leo called Regulus and entered into our system we call Halley's Comet, It entered into our system in 1910. The energies when the tail of the comet was almost touching our planet on 31 March 1910 there was the advanced Master from Master Jupiter's ashram who could receive it and it was light a thunderbolt there was a great light falling on his house with a great sound. The neighbours thought the house is gone. The family in the house must have died. They came running to the house and they saw the initiate in his house completely lighted. He was in deep meditation. The neighbours could not disturb him.

In due course he expressed that these energies are a fresh influx from the cosmic Uranus. And they would cause transformation of the human consciousness from the mortal to the immortal and also profound transformation of the mineral, plant and animal kingdoms and allow humanity to shift from mind to buddhi. This initiate introduced these energies to cause transformation. Uranus' energies have come to be with us; they would allow the related transformation to be caused in the planet, this one find also in the books of Alice Bailey. I will continue with the topic with Uranus, Neptune and Pluto and how the new age is introduced on the planet and how Hierarchy is helped on the planet. We will continue tomorrow and I will answer your questions tomorrow. Some it was answered and some more will be answered tomorrow.

Meeting 2, Wednesday, 25 Jun. 14, evening

Metam Me...

Hearty fraternal greetings and good wishes to all the brothers and the sisters that are gathered here by the will of the Lord.

It is the will of the divine that enables us to gather in a place and deliberate on certain aspects of wisdom. It is a great opportunity to be in Paris. Paris is a global city. It is built in tune with the 7th ray energy. You see all masonic symbols on the structures of this city and many astrological symbols. Most of the old buildings have the masonic wisdom. It is well supported by the river which flows north-west. What is flowing towards the north or east are considered energies towards the spirit. Paris is the capital city of France and represents its incarnation in terms of energies. The Eiffel Tower is a great symbol of spirituality. I may or may not but I went up every time. 7 times it has happened. The Eiffel Tower is a great symbol of the spinal column. It has 4 pillars on the 4 directions. They represent the 4 petals of the Muladhara and from there is the upward movement structure up to Ajna where there is the headlight. And that light shines forth in the night all over the city.

The overlooking aspect of the human is in his Ajna centre. We also call it the throne of man. There are 2 thrones, one is in the heart and one is at the Ajna. The centre in heart is considered as the Lion's throne, and when it is in the Ajna... When we ascend to the heart we are called Yogis and when at the Ajna we are called Raja Yogis. This means a king of Yogis. That is the goal set for humans. Thereafter to relate to the extra-terrestrial and get into the higher systems and for the higher system to get into us there is the Sahasrara, the 1000 petalled lotus. If we wish to get into the 1000 petalled lotus, we must no more relate to the world. This is Samadhi. This aspect is not yet built on the Eiffel tower. Otherwise it would get into another dimension. That is the goal set in 1889. It is a goal set for France in 1889 that the French raise in their awareness from solar plexus to Ajna. And the first step is to move to the heart and then to the Ajna. When you move up there is a middle level.

The first lift takes you to the heart. The second lift takes you to a long journey via the throat to the Ajna. Staying there, closing your eyes and meditating gives the blessing. When he returns he feels the highness. Up there you are much in the light, and below there is shadow. Every day, thousands move up and come down but if you do it as a pilgrimage, it would have a different impact on all of us. Every great city is not to be seen as a tourist but as a pilgrim. The approach is as a pilgrim and for this the life has to be organised as a pilgrimage.

The Hierarchy, the men of light, who have attained the head centre know how beautiful it is when men rise to the heart. They stay on the planet to help men to rise to the higher centre. They could have moved to Venus. The Lord of the planet whom we call Sanat Kumara has arranged a residence on the planet on the second ether of the planet that we call Shamballa. When someone from Venus comes to earth, stays here, he finds it is better to stay with him than to go to Venus. The Masters of Wisdom are giving a tangible touch to the humans. All Masters of wisdom have taken the responsibility to take the energy of the planet into them and to modulate the vibration to be in accord with the higher realms and to cause an upliftment to the planet.

In this context, the energies of the planet Neptune are received and modulated by the World Teacher whom Theosophy calls Lord Maitreya or Christ or Jesus the Christ. Christ is the foremost on the planet in terms of light, love and will. If we wish to get into the bliss of existence, the World Teacher can be a channel for us. Triangles bring the related energy to us. When we create a triangle with the higher angle by itself, then there is a manifestation of higher energy. All of creation is made by triangles. Two persons cannot create, a third is needed. One is the will to do, the second the wisdom to do, and the third is the action. If anyone is missing it won't work. If they work together, the manifestation is happening. That is why an equilateral triangle manifests in an effective manner.

The grand 3 energies that have introduced themselves into our system are a triangle. This has been presented by the two speakers. It is Neptune, Uranus and Pluto. It is that triangle that will lift the humanity into the New Age. But the planet by itself can't do it if we don't relate to it. If we don't relate to full moon we don't have the full moon. If we don't relate to an energy system that energy system does not relate to us. If I don't relate to Thot or Samuel, they are not in rapport to me. In this union another energy has a great importance. Through Thot and our Sister and Samuel is another thing happening, the holy Trinosophia. Sophia is wisdom. Trinosophia is the wisdom of triangles. When the triangular work is in relation with the divine it is holy. The whole wisdom is the wisdom of the network of triangles. We should create a triangle and then get the benefit of it. Leo cannot create it by itself unless it relates to Aquarius and (Sagittarius/Aries?) Leo is very individualistic, he wants that others relate to him. The lady of Leo, the Lady of France is very beautiful, it is very beautiful but expect others to relate to her. She does not relate to others. This makes it a characteristic egoistic.

A very beautiful lady does not relate to anyone. What happened? No one relates to her. Leo requires to relation either through Sagittarian countries or to Arian countries or to Aquarian countries as the male counterpart. The relating to is missing only for one reason. It was decided 150 years ago that English shall be the global language. When you do not connect to the global language, you stay disconnected with the global communication. If that communication is lost, then the connection is lost. The France is very intellectual, they have a very clear view of a problem but they are far away from the related energies. It was prophesised that there could be a marriage in the Aquarius, represented by France and India. India is seen as the Aquarian energy of the Scripture and a marriage is expected in this age. As I said, the lady is otherwise, it does not relate well. And the man in Aquarius is still in preparation. He is still studying. He has not completed his university. How can a marriage happen between the two? The lady does not look for the man; the man has another priority than the marriage. That is how the marriage between France and India is missing a cycle between France dispensing the light and India hiding the light.

The lady was looking for it; this is in the Destiny of Nations. Now the man is ready, as said by the 2 earlier speakers, from 9th May on the man is totally made. It is because we have gained a leader in May from 9th to 16th who has completely Aquarian energies. He is saintly; his view is universal but not individual. So the time has come for the man but there is another lady preparing from Gemini to make the marriage. The drama is very beautiful. The nations with a

predominant Gemini energy are fast approaching India. We have to see what the lady will do. In 1926, when Sri Aurobindo got initiated, he had made a symbolic relation with France and therefore there was the French lady who related to his movement of the supra-mental consciousness. He would have developed into a great relation had there been the mediumship of Mercury, that is language. Even today, I tell all Europeans, respect your language but also learn English. We do that, we respect our mother tongue, our national tongue, but from the age of 3 years everyone learns English. If you wish to be a global language you have to learn English, it is the language of global level communication. If we don't lift up to the global level we can't communicate globally. This is the explanation to what happened to the light of India and the proposed marriage between France and India.

Coming to the point of triangles. Uranus is the one who connects Pluto and Neptune. That is the work about which I have been speaking yesterday at the later part of the talk. There was a supra-cosmic energy visiting. It was picked up by the higher dimension of Uranus in the superior plane, Varuna, it is the same sound. It was transmitted through the Sirius system; he is the teacher to our solar system. That energy was picked up by Uranus from Sirius. From the central sun of Leo we call Regulus, the energy was transmitted into our system via Uranus. As it entered our solar system, a comet brought it with it. That comet when moving around the orbit of our earth, when its tail was about to touch our earth, on 31 March 1910, a grand Master from Hierarchy relating to the Sirius had taken birth before to receive. I didn't reveal the name yesterday because I wait. I wait until this morning. This Master is called CVV. The energy that was to be received was received by this great Master who knew the whole plan. He knew the solar and cosmic plane – what kind of adept one should be? Knowing the plan, he took birth 42 years before He was born in 1868. He lived a life of great splendour. He was a master of Vedas at the age of 18. He mastered the English language, his mother tongue and the local language, the Tamil and Telugu. Apart from these he learned Sanskrit for the Veda and then he learned English. In tune with the Plan, he became a member of Theosophical Society. I come to that later. He was a master musician and an erudite of Vedas. When he sings even the birds and animals looked at him. He was a mayor of the city. And his major hobby was to invite the people of the city for big dinners. He often offers meals of 16 dishes. That is the splendour he carried. All this he was doing in awaiting the energies.

Great beings descended from higher circles. It is not easy for us to contact these energies. We need the support of the triangle. That is the importance of Hierarchy. The Master received the energy like a thunderbolt and assimilated the energy for 60 days. Many members of Hierarchy visited him during the night hours to put themselves in line with the energy and with Master CVV: The Masters of Himalayas made a triangle with him and the energy. Thereafter the revelations through the books of A.A. Bailey came. This stimulated the energy we call the atomic violet vibration, meaning the 7th plane of cosmic plane. Not the highest but the lowermost plane of the physical cosmic plane. It is called our physical plane. This violet cosmic vibration he assimilated into him and therefore he was acclaimed as CVV. So he was acclaimed as Master CVV: He worked with this energy and he found the purpose of this energy to transform man from mortality to immortality. From mortality to immortality he found the limitations that existed in the system. Saturn, the planet, is a dimension of Pluto. Pluto is the higher dimension; Saturn is the lower dimension of Pluto. What we call Pluto, we call in English in the Puranas as the Lord of Death, Yama.

Saturn does not transcend death, he concretises and crystallised. The death of the soul in matter. Unless you related to very high energy like Savitri - Savitri means the energy of the central sun - you cannot transcend death. The energy of central sun can only be contacted in the head; it cannot be contacted in the heart. Therefore you have to relate first to the Ajna centre. It is not possible to come out of the body. Therefore Aurobindo has brought out the concept of Savitri. When Master CVV received the energy he declared and gave an advertisement in the newspaper: "Those who do not want to die can contact me." That is an Aquarian approach, contact my address in Kumbhakonam. People thought maybe his brain has gone abroad. But he demonstrated it. 18 times he demonstrated his departure of his body and returned. If you know the life story of Sri Lahiri Mahasaya also demonstrated it for the benefit of his grandson that he does not die when he goes out of the body and comes

back through the process of Yoga. In the 6th and 7th step of yoga one can release the body and gain a body of light. Therefore the path of yoga is to ascend to high..... through a process of pranayama and meditation.

The Master said, "This energy gives the fulfilment of yoga faster." Instead of one by one transcending the mind and the death, there will be groupal transcendences. Because group consciousness is Aquarian, while Leo is individual consciousness. That is why from individual to groupal one has to grow, you cannot be all alone. You have to relate to group. That is why the teaching of Master DK to A.A. Bailey was about group meditation, group study, group service. It is not that the society is for us but we are for the society, it is not that the group is for me but I am for the group. I don't eat for myself but for the group. I don't think of my needs but for the needs of the group. This group consciousness is an essential aspect of Aquarius. Until one learns to serve the group, the centralised energy would not be distributed. Man is more and more suffocated when living for himself. Expansion has to happen but it does not happen until you serve to the environment. Let the energy from the centre to the circumference permeate. Group consciousness is another dimension of this energy. Thus the man is released from his dimension. As your range grows through service the more ... that is why he insists to group service, meditation, study. If you wish to grow in your awareness, let your hand be towards below.

Therefore he made an arrangement with Pluto, with Saturn. He said, "I have an agreement with Saturn and Pluto: "I have an agreement with Venus. I promise that I cause transcendence from mortality to immortality. He gave the sound as the key for meditation. That is how is CVV. On one side, if you utter forth the sound CVV a kind of transformation starts within yourself what you might observe. He starts slowly functioning from the heart into the lower triangle. I spoke about the crocodile which is the lower triangle. He causes a reorganisation of the mind. Mind relates to Mercury; then Mars relates more to the inner fight than to the outer fight. When the energy comes down to the muladhara and excavates the energy of matter from muladhara. He says, "Kundalini emptied". The serpentine energy is living subterranean and covered by matter, and through the cosmic violet vibration it goes to every dimension of the body through transmutation. There is a transmutation of cells slowly going to transformation and then to transcendence. He speaks everything in English, not in Sanskrit or the local languages. He gave many mantras in English, which was a great surprise for the Indians because they thought it has to be in Sanskrit. Master said, "Mantra is a combination of sounds which effectively works." It is a chemistry of sound that causes the needed transformation. It has nothing to do with language. In fact all mantras are combinations of seed sounds. There are 45 seed sounds arranged differently for mantras. When you say kham, it has no meaning in any language, Gam, lam, ram, it becomes a mantra when we intonate it. The Master said, "The work I bring in is the work with sound."

As I said yesterday he is the Master Jupiter. Jupiter works through sound and through triangles. Sound relates to the 5th ether, we call Akasha. Therefore he said, "If you wish to relate to any planet work with sound." Every planet has its related sound. When you relate to the sound, it relates to you. There is a sound by which Samuel and I relate. So every planet has its sound, he gave all the key sounds afresh. The book Spiritual Astrology is a direct dictation from the Master to Master EK on the etheric plane. Master EK was born in 1926 while Master CVV left the body in 1922. Master CVV contacted Master EK just like Master Morya contacted Mme Blavatsky. Through master EK Master CVV expressed the quality of the energy which expressed through him. The book Spiritual Astrology is a direct expression of the energy of Master CVV through Master EK, just as Master DK expressed through Madame Bailey. In that book all sounds relating to all planets are given, the sounds, colours and number relating to all planets have been different. It is slightly different from the traditional astrology. Master CVV said the astrology of the New Age will replace the traditional astrology. Natal charts are no more relevant when you can relate to Uranus.

A great astrologer from Madras was a disciple of Master CVV. He brought him his natal chart and said, "There seems to be a point of death in it." Master CVV said, put your natal chart on the attic, the roof. Your chart no more works." When Uranus works, other planets do not. They work in tune with Uranus.

I wrote a book on Uranus and on the Aquarian Master where you can read a lot about it. In Aries it is not the Sun, it is the state of Uranus working through the sun. In Cancer it is not the moon but the energy of Uranus via the Moon. Through most of the planets now Uranus is working, like through most of the governments the American government is working. The planets like it. In the book of Uranus I gave how the planets are overtaken by Uranus.

It is like one working for 7 planets. It builds the whole antahkarana. He said, "Every planet is with me why you work with other planets." Therefore I said yesterday he is Sun to Sun, the World Teacher to the World Teacher, the Lord of Death to the Lord of Death. This is called by Master CVV THE MASTER. And he said that he is a medium for this energy. The energy finds its own expression and vehicle and causes the transformation. It would be very soon global. On one side it is working from the macro level, on the other it is working from the micro level. It is like making the tunnel from both sides. The Master predicted about all this that would happen through quantum physics, he gave so many expressions which seemed to be crazy. He said the man will invent aeroplanes and later would fly in a matter of 240 years. We can disappear in one place and reappear in another place through a sound code. He said there would be explosion of atom bombs and also said that there would be many things lifted up into the ether like e-mail, credit cards... He said that he would release the soul from the conditioning of the form. The energy of Uranus is an interpenetrating energy.

He is the one that builds the bridge between Pluto and Neptune, this works through sound. When you utter the sound and look within and observe in a matter of 12 years there is a tangible transformation. The Master said, once you sit in meditation and invoke and observe I shall transform the mental matter. The matter which is filled in mind is transformed and transparency is made. Man is self-regulated and would attune to the energy of Pluto, the Lord of Death. He said, "Whosoever follows the laws of Nature and fulfils the purpose of life, I shall not cause death with him." It is so with Pluto since the oldest times. There are many stories in India of transcendence of death. All those have volunteered to follow the laws of Nature, one for many and not many for one. If you are for many, there is a purpose for your being here. If you are for yourself, you have no purpose. The lord of death is not satisfied. The story of Savitri is in relation to that and the story of Parikshit in Bhagavata and of Naciketa in Upanishad. The Lord of Death is Yama, the meaning is, regulation in accordance with nature, Dharma. When dharma is ignored death comes. This energy allows to attune to dharma and to transcend. Another beauty expressed is, he lets not your past karma affect you. This is a new dimension of Uranus. He neutralises your past karma. Due to past karma you come back with the same tendencies and characters. When all the negative traits are cleared with the energy of Uranus, when a student has become a good student there is no need to destroy him.

He has made agreements with Pluto, Saturn, Venus. Therefore the yoga we follow is the yoga of Uranus, what we call the yoga of Master CVV is nothing but the yoga of Uranus. It is the energy to lead to the bliss of existence and permits you to be on earth with the right understanding. Bent or break is another understanding. Either you follow the law or you are forced to follow the law.

Nations are forced to follow the Nature; you cannot follow outworn religions or traditions. If the student is good the teacher does not need the stick. He says he would let you relate to the masters to whom you belong according to your ray quality. This is a postman that delivers you to your related Master.

There is a lot to say but I prefer to say what I have been experiencing since 42 years. My Master was an Uranian Master, Master EK; I was just a chartered accountant. Through meditation only everything has been learnt. Throughout I speak about the various wisdoms is from the inner not from books. I was put to teach all over India, 9 countries in Europe, many American and Central islands, including Cuba. I'm more in places like Panama, North America – it is the energy, I'm ask to relate and people ask to give the yoga, details of Cosmo genesis, science of sound, symbolism meditation, hundreds of books came through. I often wonder how the books came. Did I do it?

In tune with the Plan we all met here. Uranus is the forerunner of the planet, and he is the saviour of the humanity and this planet. I don't speak now of the avatar network, I conclude here. If you wish to ask any questions, they are welcome.

One information, all groups I contacted all over the globe are either theosophical groups or from Alice Bailey. It is either Arcane students or theosophical students where I came into contact, in Europe, North and South America, including Cuba. That is where I see the continuity of Blavatsky, Bailey and Master EK.

Q. Madame Blavatsky is advising meditation alone and Bailey is working with the group.

A: When Mme HPB was working, the energy arrived after her. She left the work in 1891, the energy has descended in 1910, and Mme Baileys' work started in 1919. It is Master DK who brought the groupal aspect when it came in, so the groupal aspect of meditation, service, study came in. it is the earlier version to sit alone in a room, now we meet in a big room as a group.

Q: You speak about triangles, Is it in relation with impair numbers, odd numbers? When there is an odd number the connection is not good.

A: It is always triple. Spirit, soul and matter put together, even in matter atom, proton neutron and electron.

On a human basis in a relation you are already in a triple relation. When there is a relation, the knowledge to relate, the will to relate and the act of relation is there. If there is no will there is no relation, without knowledge there is no relation, if there is no relation activity nothing happens, Vidya, Gnana, Kriya we say in Sanskrit. If we are three and the other is not 3, it doesn't happen. If the other person has no will, no knowledge or no action, nothing happens.

Q: Why to transcend death rather to transcend life?

A: Transcending life, if you die, there is a continuity of consciousness. If you transcend death you keep continuity of consciousness, you have continuity of life on another plane, because life is on the physical, causal and the plane of... When you are reborn you don't remember anything. We met yesterday and if there is a distance to it; what was there yesterday cannot be related to today. The continuity of life is an upspring of consciousness. The seed of awareness or consciousness is in the forehead. And also light springs from there and installs in the heart.

There are 2 threads in the body, the cord of light and the thread of life. If the thread of life is cut we call it death but if the thread of light continues, the life continues even in the subtle and causal life. When there is form there is life. From the pure consciousness life springs. Therefore what is important is what we retain consciousness when we depart from the body. Mostly people become unconscious before the death. Also because of disease people get away from consciousness. Consciousness of the higher levels of consciousness, if you are in contact with it, you can modulate the life. If we have become too old we can change the body, like an old building we have to break. The form we change, we take to another form, a much better form. When you are consciously dying life is with you and you are out of form. Then in due course, you build a new form through the right parents through your vibration.

When we speak of death, we speak of death of consciousness. That is what we make an understanding but it is so also in higher planes. We are units of pulsating consciousness. The life enables us to relate to a form and function, when that form is no more useful and there is no more purpose, there is a way to get away from the form that is the science of life and death. Another dimension of Uranus energy is that it brings energy from higher circles that bring back life to people. Master CVV has given life to his wife, disciples and other people and he departed at a time which he decided. Life departs from consciousness. Life includes consciousness. What is important to continue with consciousness? A yogi retains his consciousness even in sleep, he gathers his body on the bed and works with the subtle kingdoms.

These are dimensions of yoga. Thank you.
