"58th Inter-continental tour briefing"

By Master Parvathi Kumar on 27th of September 2014, at Hotel Daspalla, Vizag.

My salutations to Sri D.V.Subba Rao garu who served Vizag city as the major. Also my fraternal greetings to Sri Vijaya Kumar, Sri.K.S.Sastry garu and all those who have gathered here. After witnessing this function, I feel that my responsibility has even more increased and it is necessary that I need to work better than now.

Every year I go countries aboard and give teachings on aspects of Devotion, Yoga, knowledge and practice. To be able to travel in this manner every year, I believe, is due to the blessings of the Hierarchy of Masters who are guiding me to carry out this work. I am fortunate to have born in a family where I could learn that the aspects like Devotion, Sraddha, dharma and such aspects are very important in one's life, at a very young age. The atmosphere in which one leads his life during one's childhood has a great impact in the direction in which one leads his life. I could understand the Divine principle and devotion at a very young age due to the grace of my father. I understood that the Divine principle can be witnessed in all at all times and it can be worshipped in any form and name and at any time without any restrictions. I also understood that Divine is also present above all forms apart from permeating all forms. So I could accept all forms of Divine and worship and I keep relating to all forms of Divine propagated by all theologies.

With this foundation, I came in touch with Master EK and my life went a complete transformation from that time and it helped me in working towards fulfilling the purpose of my life. Each person has a purpose to fulfill in each life and one should work towards knowing that purpose and fulfilling it. Then there will be no conflicts in life and also no personal karma.

Another principle which I believed and followed is renunciation of starting an act. I was greatly inspired by Rama's life in this aspect. Rama never planned anything in his life. He let everything happen and just responded according to the situation. I decided to follow the same principle in life. I never did anything in my life as per my will. It was not my will to study CA, to become a partner to C.P.Rao garu in my profession, to marry Krishna Kumari and so on. It all happened as per the Divine will and I just let everything happen through me. I just remain an observer to my activities. I even wonder at times how this much of work is happening through me.

One day, Master EK asked me whether I would be able to accompany him to the West and I immediately agreed without worrying about my family and profession because I believe that if we are prepared to do something good, everything will be taken care of.

So I started travelling abroad in this manner. I went along with Master EK 3 times and then on I kept travelling to many countries wherever the requests came from. Nothing was planned by me

and everything just happened. I never thought that I would write so many books and it just happened.

If observed closely, all the things that happened in my life would not have happened if they were planned by me and it can only happen by the grace of the Master and the Lord. It happened so right from childhood because the marks I got were always more than what I would get based on what I studied. So if one keeps worshipping the Divine and submits himself to the Lord, the life of such a one happens splendidly.

Everywhere I go, I speak about the ONE Divine principle which is presiding over and permeating this whole creation, the various ways in which the Divine principle can be worshipped, aspects relating to Cosmo Genesis and Anthropogenesis and also the practices the one should follow to transform their lives in ways prescribed by the Ancient Wisdom to realize oneself and to realize the Divine. The knowers tell us that one should lead their lives for others and not just for oneself. It is the only way by which one can transcend death and stand immortal. One who works for oneself is not protected by nature but one who works for others is protected by nature at all times. The stories of Savitri, Markandeya, Nachiketas, etc. tell the same.

Value education is that which teaches you to live for others and not oneself. Education should give you capabilities to serve your fellow being in a better way. Education is not for earning for yourself and for your comfort. Remember that your profession or business is not for your sake, it is for the sake of the society. Otherwise the profession or business binds you and you cannot come out of it. If you are prepared to serve others, your health is also taken care of. So whatever you do, orient towards the giving part in it.

In Europe, there are about 10 countries where groups have formed with an aspiration to learn and follow the teachings that I give. Similarly there are about 9 countries in South America and 3 countries in North America where groups keep inviting me again and again. There are some groups formed even in nations which are not known popularly in the world. It is also due to the advent of modern means of Communication that the teachings spread out far and wide.

This time, I travelled to North America. I visited Miami first. The name is actually Miama which means the “Mother of maya” (illusion). There is a civilization called Maya and that was born at this place. It is a very ancient civilization and Miami is a very sacred place. There are a special variety of Conches available at this place in very large numbers which signifies the holiness of this place. This was one of the few places that remained after the dissolution of the great Atlantic land by the oceanic waters. Mayans used to worship the Sun and used to celebrate festivals relating to the movement of the Sun like the Solstices and Equinoxes. They possessed many magical powers as well.

So in this sacred place of Miami, a seminar was held with people gathering from many places. The topic of discussion was how to live in attunement with the cycles of time. I gave teachings on this topic relating it to the aspects of Devotion, Knowledge, Yoga and renunciation because giving information is not sufficient if these aspects of practice are not touched upon. There were also some Q&A Sessions to clarify any aspects which the audience wanted. All these seminars were also broadcast live and there were also some questions coming from people who were hearing remotely.

Then I went to California. This name was given by the Spaniards. Its earlier name was Yogastan. It is also called Golden land because if one meditates at this place, it can grant him the vision of Golden light. Objectively, people go to this place in search of gold but this place has greater significance subjectively. In the past, at the time of Mayan Culture, lot of prayer, meditations and rituals used to take place in California. There are many pyramids at this place and around which were constructed in relation to the movement of Venus. Mayans used to have their yearly calendar based on the movement of Venus. Those pyramids were called Venus pyramids. They also followed cycles of the moon and sun and performed rituals accordingly. To understand the subtle aspects in the construction of those pyramids, one needs to have knowledge of astrology. So Mayans used to worship Time in this manner. These forms of worship have gradually faded away with the advent of age of Kali. Both knowledge and devotion is required to be able to remain in alignment with the Lord. With the fading of both, egoism has taken the front seat in present days.

The history of man on earth dates back to almost 18 million years and during all these years, the land and waters have undergone many changes. There were times when the present Pacific Ocean as completely occupied with land and then later there was land occupying the present Atlantic Ocean. Some of the places along the West coast of American continent are present from those ancient times. They are very sacred places. If one visits America, these places are to be visited without fail if you have this kind of inclination. All this knowledge of Anthropogenesis is secretly given in our Puranas and we are fortunate that this knowledge has now been revealed to us by the work of Madam Blavatsky through the Secret Doctrine. The story of 7 races of humans on earth is also given in detail. We are presently now in the 5th root race called Aryan race which was preceded by Atlantian, Lemurian and Hyperborean times. The birth of Hanuman, Ganapati, Dattatreya on earth took place at the time of Lemurian times. Even the human bodies went through many transformation from time to time. There were humans who were as high as 28 feet. At a time, we had 4 hands, we had head in stomach and so on.

So this place of California was a part of the land that used to occupy the present Pacific Ocean. Grand Master Kapila was born at this place. It is such an ancient place. I spoke about the significance of the place of California and I stayed there for 11 days.

We also visited a mountain by name Shastha. It is a Sanskrit name. What it suggests to us that the ancient name was preserved and remained so even now. There are tribes of people belonging to the ancient times still living at some places there. Shastha is one of the names of Lord Ayyappa (or Subrahmanya or Kumara). Ayya means Shiva and appa means Vishnu. He was born to both Shiva and Vishnu. Vishnu and the Divine Mother are one. It means the one who has born the Cosmic Person and Cosmic name. It is Kumara. This place Shastha is one of centres presided over by Lord Sanath Kumara. So we visited that mountain and conducted prayers there. There is lot of violet colour present in the space around that place. Violet is the colour that links the visible and invisible worlds. It can be observed at that mountain and even it can be captured on a camera.

There are many Indians residing in California. There were some Indians who attended the seminar in Miami as well. In California, there were 75 Indians and 75 members from other countries who attended the group life. Many aspects of wisdom were discussed during the group life there.

One should have knowledge relating to the creation and it helps us in experiencing the Divine. Without knowledge and experience, there is no happiness. So we should keep gaining knowledge to the extent possible.

The purpose of discipleship is to travel within and then travel upwards from there. Once you enter within, all knowledge that is required to carry out your activities in the objectivity is revealed to you from within. In the path, you realise yourself and the Divine. Master CVV promised that he would lead us in that path and he promised immortality and realisation of Brahman to each one who follow his path sincerely.

Also remember that there is nothing greater than to lead a life for others. There is nothing that stops you if you keep working for others. All obstacles in your life are eliminated.

"Out of smaller duties properly performed evolve greater responsibilities that culminate in world service" said Master DK. As you keep on discharging your duties, more and more responsibilities are bestowed on you and all the capabilities required to perform those responsibilities are also bestowed upon you. Your life moves as per the Divine will.

So we should submit ourselves to the Divine will and move forward with a preparedness to serve the fellow beings. Then everything turns out to be splendorous. Preparedness is very important. Once you stand prepared, everything starts manifesting through you.

Remember that everything is Divine and it enables you overcome all limitations in your life and will lead you into unlimitedness. Gradually we move unto HIM and remain in HIM. The Lord is present everywhere and in everything and we should submit ourselves to that omnipresent principle. You should transform from the state of "God for me" to "Myself for the Lord". Then you remain in HIM and live in HIM. Everything becomes HIM and it results in your immortality.

So remember that the primary objective is to travel within and remain in alignment with the Lord at all times. A Master wants each one of us to achieve that objective. Once you remain in constant alignment with the Lord, he moves aside just like a priest after performing the marriage of a bride and groom. This is one of the prime objectives of The World Teacher Trust. The World Teacher Trust has been formed to lead its members towards immortality and realization of Brahman. If we forget the main objectives and indulge in many other activities, it is meaningless to be a member WTT. The other activities are for helping us achieve primary objectives. So we should all aspire and work towards achieving that objective. We should keep studying the knowledge given by the Ancient Seers and move forward in life without any fear.

So this discourse has come out in this manner. I just now realized that it has become very late already and all of you have shown lot of patience and forbearance in hearing me all the while. I also thank Sri Subba Rao garu for coming here and being present here until now. I also thank all of you for coming here.

With this function, the 58th tour to the West is complete. I shared with you whatever I could.

-Swathi.
