“Master CVV's Birthday Celebrations”

Morning Discourse by Master Parvathi Kumar on 04th of August, 2015

Radhamadhavam, Vizag.

Hearty fraternal greetings to the brotherhood. On this day, Grand Master CVV has taken to a body 147 years back in 1868 and we are celebration this grand occasion. He was born on a Wednesday with moon in the constellation of Dhanishta and during the full moon hours of Leo. His mother decided to hand over the child to her brother and sister-in-law due to a great help rendered to her in the past. So Master CVV grew up under his uncle and aunt. Master CVV is an advanced initiate from the Ashram of Master Jupiter to link the cosmic energy with the solar and planetary so that a cosmic yoga initiates the beings.

At the end of 19th century, there was lot of talk about the coming of new age. It was also predicted by Madam HPB that a grand energy would descend at the beginning of 20th century in

order to hasten the process of evolution on the planet. In line with the prediction, some members of theosophical society to aid the activity by training a pure soul from childhood. But the Divine plan was otherwise. A similar thing happened during the birth of Lord Krishna where many Sages, intelligences and even the creator, Brahma did not know about the descent of the Divine principle as Lord Krishna. The Lord has no obligation or need to inform prior to the descent. It was different in Rama's case where everyone knew that the Lord was incarnating as Rama.

So in Master CVV's case too, the descent of energy was as per the Divine plan and very few knew the plan. The energy descended from Brahman via Varuna, Sirius, Regulus, Uranus and Halley comet. Planets like Uranus, Neptune and Pluto have their influence not only in this solar system but in 5 other solar systems. Uranus has great influence on earth at present and you can refer to the book on Uranus for more details. The path of this energy is also explained in detail in the book Aquarian Master.

So Master CVV was waiting in Veerasana to receive in the energy in kumbhakonam. Kumbhakonam was chosen because the present age is Aquarian age. The descent of energy happened like a lightning striking the house which caused fear among the neighbors. They came running to see Master CVV in a bright lighted form and next day Master CVV told that this is the purpose of his birth.

We should constantly recollect the path of descent of energy which is called MTA because the same path leads us to Brahman. This path can be traced within our body as well from our Sahasrara (Head Centre) to Muldhara (Base Centre).

Master CVV called this new age Yoga. Though the evolution of beings has been an ongoing process from ancient times, this Yoga speeds up that evolution and so it is new in that sense. Another important thing which Master CVV found out with his experiments with this energy is that it can make adjustments to the influence of the planetary energies on the beings. Each one has certain planetary limitations and imbalances which are adjusted by this energy and karma is neutralized to certain extent. We have many examples of astrological predictions of people being completely overturned by practicing this Yoga.

Master CVV instructed to those who wish to follow this path of Yoga, they should conduct prayers in the morning and evening at 6 every day. Master CVV became the first medium to this Yoga on the planet and he later initiated many others into this Yoga. The promise he made that those who are fulfilled in this Yoga will be able to come out of the body and observe their own departure and even the pain the one faces in the womb of the mother at the time of birth can be avoided. The being observes the growth of the child in the womb until it comes out of the womb and then embeds itself onto the born child. So there is no pain of birth in the womb of mother. It is the way in which Lord Krishna was born. It is called Immaculate Conception.

So Master CVV promised that one need not face the severe pain that one faces at the time of death and birth. One can leave the body before the body falls and one can enter the body after it comes

out of mother's womb. This makes us realise that we are immortal as beings and the body is just a vehicle which we enter into and come out as required. We should know how to get down a horse after getting on it. One should know how to leave the body by himself instead of the body kicking him out. Then one can enter and leave the body conveniently and evolve until realisation of Brahman. The entry into this Yoga also ensures that you get back the knowledge of this Yoga at a very young age in each birth and so more time is allowed for practice which quickens up the evolution. Otherwise we just remain in the cycle of births and deaths like a frog in a well which tries to climb 2 steps up during the day but falls 3 steps down at night. In that way, we can never come out of this cycle. We never know where we came from and for what we have come.

So that primary aspect of this Yoga is it takes us to immortality and at the same time it ensures that you have all round development in your life. All knowledge comes to you from within. You get to see Scriptures within.

Master CVV said that this is a path of direct knowledge. You cannot follow it blindly. There is no scope for superstitions in this path. While you walk the path sincerely, you also grow in knowledge gradually. You realise the truth of creation that you are a Divine entity. All the bondages that you are stuck in, are gradually eliminated otherwise they create lot of pain at the time of your departure. Due to those bondages, you will not be able to find an exit from this body when the time of departure comes, and as result you have to be pulled out which is very painfully. So knowing the entry into activities is not sufficient. You must know the exit out of everything. If you take up a work, you should know how to come out of it or hand it over to someone else. There are people who hold onto activities for decades together even if they are not in a position to discharge those activities properly. Then time has to interfere and bring you out of the work.

So here is a new age Yoga. Yoga is ancient but the method is new. In the 6th step of Yoga, one attains immortality. Master CVV takes us to that step effortlessly if we follow his instructions sincerely. We should display our sincerity, aspiration and dedication towards the path through regular and sincere prayers. Master will then be convinced that we are sincere in our aspiration and would grace with lot of knowledge from within. Knowledge will gradually lead to liberation because knowledge is like fire and it burns away all bondages. One may start getting instructions from within which are to be noted and to be followed without any exceptions. Inspirational teachings and writings happen. Spiritual Astrology and Spiritual Psychology were dictated to Master EK by Master CVV from within. That is why Master EK writes in those books "These are from those who I follow to those who follow me."

As discussed in the morning, Master CVV demonstrated that one can leave and enter the body if one knows the way. He demonstrated through his disciples and wife and also personally 18 times.

In reality, we do not feel much difference whether we are in the body or outside this body. Master EK wrote such articles in Navani. We get out of this body every night during sleep but we do not feel that we are outside it. This truth when realised through a live experience, then we do not fear

death anymore. Almost all our Scriptures tell us this truth that every being is immortal. Death is experienced by only those who are stuck in this body otherwise everyone is immortal.

A knower remembers that he has come into this body to discharge his duty and to experience the creation and to leave when time comes. An ignorant one gets stuck in many things in this world through bodily relations and as a result fears a lot when time comes for him to leave the body.

Master CVV performed many grand acts which were possible because he had the energies of Agasthya. If we see the life of Agasthya, he performed many grand deeds when need arose in the creation. He helped in the creation of this planet. He could drink away the waters of ocean when necessary.

Master CVV used to hold consultations with many Grand Masters who used to visit his house during the night hours. Sanath Kumara, Maitreya, Devapi, Maruvu and others visited Master CVV's house to understand the working of this energy and they meditate for 24 years to have a complete understanding. This we come to know through the books of Master DK.

When you invoke the Master energy, you will be able to feel the pulsation strongly and all the time you feel that happening, it means that transformation is happening within during that period. Lot of heat is generated within which also causes certain transformations.

If you are not sincere in your practice, it only means that you are not realizing the significance of the path. If you are sincere, prayer should become the most important activity in your life. Everything else should come next.

All the thoughts which will be good for you, will come to you during prayer. Generally we do not like if others tell but if it comes from within, we follow it with interest. Do not imitate others by looking at them. You will have to face hindrances due to such imitations. If you get a good thought from within during prayer, the nature and time also cooperate with you to act as per that thought without any hindrances.

If you follow the path sincerely, Master will ensure that get to align with the Lord within you. He is like a priest who performs the marriage of being (bride) and the Lord (groom). Once the marriage is done, the priest does not interfere anymore. A true Master will never want his disciples to always remain with him. He wants them to align with the Lord and move ahead. He will make you independent and equivalent to him.

In this process, an Antahkarana Sareera (An inner body) is formed with an inner mind and inner senses. There are eyes which can hear within, ears which can hear within and so on. One can feel things which are not visible outside. One can smell good odour which ordinary people cannot feel. One may feel that a Grand Master has touched you and moved around you. All these are possible only when one has subtle senses. Such a one is not anymore interested in the things shown by the outer senses.

One should try to practice to go within. It is very tough to do but practice needs to be done. The mind keeps wandering like a stray dog if it remains outside. It should be made to go within. An important instruction is one should attend only to one's duties and avoid running after desires. Desires are the biggest hindrances in the path. Path of duty is the path to be followed. A path of desire will lead you nowhere. It just makes you run after more desires and it is an unending path.

We have a beautiful example of dog licking a knife which has some blood on it. As it kept on licking, more blood came, which is its own blood and it kept on licking on until it died. That is what happens to those who just keep running after their desires.

That is why Master CVV instructed that we should not ask anything from anyone. He promised that he would grant us everything that we need. That is the law in nature as well. Those who stick to their duties, the nature will ensure that everything they require is arranged to them.

Another instruction to see the Divine in all. The primary instruction is morning and evening prayer without fail. You can do it even when you are ill. You can invoke the Master and sleep and you may get very good experience during such times. The illness will also not cause you much pain. The healing that happens in Master Yoga is amazing. I saw many miracles happening with regard to healing. People who were almost declared to be dead become normal again. We should not talk much among them because we are not after miracles. We should not be in this path for miracles. We are interested in walking the path.

So on this occasion of Master's birthday, we recollect some of his life events and try to re-orient towards the Yoga. Master CVV rarely comes during discourses unless he wills. He gives his presence more through silence than through discourses. We only recollect him only during May Call, December call and his birthday. Even attending his events happens only when he allows us.

Master CVV promised that he would not leave us until we realise BRAHMAN. He proclaimed himself as Brahman and told that he make each one of us realise Brahman. Brahman is the basis of everything in this creation. Existence is common to all. Existence is the truth and Brahman is the truth. As this Yoga helps us realize THAT truth, it is also called Satya Yoga (Satya = Truth). That is what Lord Krishna tells that "Everything that exists can never cease to exist and anything that is not existing will not come into existence." We cannot see the basis but we can only the things which are existing with that as basis. Just like we cannot see the electricity but can see the light. Though we cannot see it, we can still recognize it.

Let us all pray to Master that he grace us to walk the path until we realise Brahman. Those who follow the path sincerely, they are sure to reach that state. Thank you all for patiently hearing the discourse.

-Swasthi
