"Madam HPB's Birthday Celebrations"

Message by Master Parvathi Kumar on 12th of August, 2018

Radhamadhavam, Vizag.

Hearty fraternal greetings to the brotherhood. Today we entering into a new month and a new season as per the lunar calendar. Yesterday, we celebrated the birthday of Grand Master EK and remained in his presence throughout the day.

Today we enter the month of Leo as per the lunar calendar. It is a month in which the Sun remains in its native place. As per the solar calendar, the Sun has already entered Leo on July 22nd itself. Makha is the most significant star related to the sun sign of Leo. Makha means the principle associated with Mahat.

By being aware of these aspects, our consciousness expands to the level of solar system. Otherwise most of the times, our consciousness remains in very small spheres due to our objective thinking and living. Depending on our level of thinking, our consciousness

keeps expanding. Among human beings, there are ones who expand their awareness to the whole of solar system and there are also ones who remain very limited in their awareness. There are many degrees of awareness in between and each one of us falls in one of those degrees. If we expand our thinking, then this degree of awareness keeps growing. If you just keep thinking of yourself, your family and related issues, then there is hardly any expansion. If you start ascending, then these issues appear very petty and small. It is just like the whole city appearing small when seen from an aircraft. So moving to such states is what should be aspired.

We celebrated birthdays of Master CVV, Master EK, Madam HPB and after a week or so, we will celebrate Master MN's birthday. Why do we recollect them? It is not just for passing time. The objective is to follow their teachings and try to reach states where they reached. Even after knowing about them and recollecting them, if nothing changes in your life, then it is meaningless. They gave more importance to surrounding life than personal life. We should learn the same from them. Their teachings can lead us to higher planes and into spheres way above than our present sphere of influence. On these days, when we recollect them and their work, it gives us lot of inspiration and we feel that we should do something to become like them but the inspiration is lost in few days, may be even the next day itself. That happens because of our strong personality and environment which we have ourselves developed. So the environment and personality should be gradually transformed so that we can practice consistently without ups and downs.

To help us progress in the path of ascend, Masters of Wisdom have been working on this planet for thousands of years. Their jurisdiction is over the whole of the planet and mankind. That shows their compassion and expansion in their thoughts. It requires immense dedication and practice for one to reach that state and work for the whole planet.

Until 18th century, there was no one who told the humanity about the aspects of Cosmo Genesis, Anthropogenesis, etc. in much detail. This knowledge was limited to very few members. In the 18th century, Masters of Wisdom have decided to bring out this knowledge to the world at large through Madam HPB. We came to know of how this planet was form, how the beings descended onto the planet, how the forms have evolved, how the beings have evolved and so on because of the writings of Madam HPB. We beings have been living on this planet for 18 million years and the details of what happened in these 18 millions years are very complicated and intricate to understand. Our understanding has been very limited until Madam Blavastsky wrote Secret Doctrine. Some of the Secrets have been given in our Scriptures but they are given in a seed form and so it is very difficult to understand. Madam HPB gave lot of details in her writings.

Madam HPB was a high soul even before she took birth in that form. We should see that it is a high soul that took birth in a female form. The being beyond the form has no gender. And also understand that the word "Master" is not associated with male gender. It is a word which can be used for both males and females because it relates to a principle which is male-female. Only one who has all male and female aspects completely fulfilled and one who has complete control over the 5 elements and one who can show the path to all permeating Divinity, can be called a Master. One cannot copy or imitate and become a Master. Every Master is an original and not a duplicate of someone. Every Master is an original in his/her own right because each one attained mastery through one's own effort. Every human being has the potential to become a Master provided one puts in the right effort for long years. Madam HPB is such a Master because she attained mastery through her sincere practice over the years.

Since childhood, Madam HPB used to see a separate world in this world of objectivity. She could see many subtle things and beings which no one around her could see. She could see the beings of light moving in subtle planes around her. She could see many intelligences moving in subtle planes around. Due to subtle vision, she had very little interest in objectivity.

Madam HPB was born into a well known royal family but she had no interest in all the royal comforts that were present around. There used to be a library with many ancient books in her Grandmother's house. She used to spend a lot of time in that library. Once she wanted to hit a nail in a wall to hang a portrait in that library. She went up a ladder and asked her sister to hold the ladder. While she was hitting the nail, the ladder suddenly fell down but Madam HPB continued hitting the nail while standing in air, shocking her sister. Such was her stature even when she was young. She was no ordinary woman.

Throughout her youth, she used to constantly strive to know the purpose of her life. She used to be a one time learner. She never forgot a thing which she has learnt once. Nobody could beat her in a contest. She was a very courageous fighter and a strong willed person.

Once she went to England to attend a marriage along with her family. She was not interested in the wedding function, so she goes and sits in a nearby park. She was bit sad because she was not knowing what she had to do in her life. At that time, Master Maru walked towards her. She immediately realised that she knew that person for many years. Then Master Maru tells her that it is time for the purpose of life to begin. That was the turning point in her life.

From then on, Madam HPB started working as per the instructions of Master Maru. She travelled all over the globe visiting many nations. She faced many hardships during these travels but nothing deterred her to deviate from the plan. Sometimes she lived without food for days together. Such was the level of her determination. She cared for nothing except the execution of the Divine plan.

She was taken to the Ashram of Masters in Himalayas and she went through lot of training and transformation there. She was among the very few who could visit the Ashram of Masters in Himalayas in a physical form. The transformation was associated with lot of pain but she endured everything. Her brain was put to lot of transformation by Master Devapi. It was the most painful experience in her life and she details about it in her books. She was told that this transformation was required for the grand knowledge to be handed over to the humanity through her. That is how she could retain magnanimous amounts of knowledge that she received from the Masters of Wisdom. She was shown all the holy mountains, all the holy rivers and all the Ashrams present on this planet. She had access to the most ancient books which were spread across the globe in different museums and libraries. That is how she could quote statements from those books without having seen any of those books directly. Her followers tries to verify these statements and were surprised to see that reproduction was word-to-word.

She described in detail the stories of the past races which lived on this planet, the present 5th race and she also gave descriptions of the future races. She said that in the 6th root race, men and women can beget children without mating with each other. She had such future visions as well. There were rare instances like this which happened in the past as well. One example was Sukha was born from Veda Vyasa with no woman involved. In the future 6th race, this will become more common.

Masters of Wisdom envision the American continent as the land of the future where the next races will develop. This is also clearly given in the writings of Madam HPB. That is one of the reasons why people from many nations across the globe have been settling in America. Gradually they will pave way for a new civilization in future. Even most of the technological advancements in the last few decades have come from America. It is all due to the influence of the Aquarian age and this will gradually lead us into the new age. Therefore, Madam HPB was sent to America and that is where the theosophical society was founded. Later she was sent to India where she came in touch with people who associated with her in her work. There were lot of Telugu speaking people as well who associated with Madam HPB and theosophical society.

Madam HPB writes that South India is more ancient compared to North India. The land now which is now regarded as South India existed even during the Lemurian times and this land has connection with the present South America with the whole of present Pacific Ocean being filled with land. That was the time when many great beings like Hanuman, Dattatreya, Kapila, etc. descended onto this planet. All these events happened a few million years ago. It is due to Madam HPB that we have come to know of these details.

Even the human form has underwent lot of transformations over the years. We think that we have always been like this. Forms in Lemurian times were completely different from what we know now. During the initial races we had only spherical forms with no other organs. Beings used to just roll around to move from one place to another.

So first we lived as White Islanders, then as Hyperboreans, then came the Lemurian race where the land extended from South India to South America including the whole of present day Indian and Pacific Oceans. That is why even now in South America, we can hear lot of Sanskrit names which existed during Lemurian times. Even a part of North America used to part of this land. That is why we have the name Mt. Shastha. It used to be a part of the land which existed during Lemurian times.

During the Lemurian times, the human form went through lot of experimentation. Two heads were tried, 4 hands were tried, mouth near the stomach was tried, forms with no head at all were tried, etc. until we finally landed in the present form. Some of these forms were described by Valmiki in Ramayana because the story of Ramayana spans across 3 races but hardly people can recognise this. The land span at that time was also different from what it is now. The Lanka of Ravana at that time has nothing to do with present Sri Lanka. All these things become clear

if you read Secret Doctrine. In the past, we had much taller forms close to 28 feet. Gradually the forms became smaller until we settled between 5 and 6 feet. Even now there is a being of 28 feet tall who lives in the Himalayas. He is called Yeti and he is highly revered by the Masters of Wisdom.

Madam HPB describes how people moved across the globe and settled at different places. She tells that most of the Egyptians were people from South India. A lot of common traditions can be found between them. Most of the rituals developed and spread only from South India with the Ashram of Agasthya as the centre. Even the Ashrams in Himalayas received this wisdom from the Ashram of Agasthya.

I am telling all these things to make you realise that the wisdom in the books of Madam HPB is magnanimous. The more you try to understand her writings, the more your understanding of this creation grows and your consciousness expands. Just by reading her books, transformation happens in us. Our thinking completely changes as we associate more and more with the wisdom she gave. Her information is transformative. An aspirant can be highly inspired by her writings and work out one's transformation.

The details I am giving now are very minute compared to what is present in his writings. I am giving some details so that you get inspired to know more. This knowledge is like fire which can enable us come out of fixed routines. Our routine should become a ritual. Routine becomes a ritual when it helps you grow in consciousness. Everyday your knowledge should grow. You should know something more than what you knew yesterday.

Make note of things to recollect. You can share them with similar minded people. From time to time you recollect what you read in the past and then learn something new. It should be a progressive study of wisdom. If you forgot what you studied yesterday, then there is no progress. That is how permeation happens. You can permeate across the whole planet and even the whole solar system. Master EK used to make us sit for meditation during night hours when some beings descended to earth from Venus. How did he know that they were coming? That shows his level of permeation.

So we should be aware of our story ever since we descended onto this planet. We can all say that we have been living on this planet for 18 million years. We have existed even before this planet came into existence. All of us are overstaying on this planet. And as long our karma is not clearly, we will continue staying here. Karma is represented by cross and each one of us has a cross that we are lifting unknowingly. That comes in the form of various burdens that we face in life. Jesus carrying the cross is symbolic of carrying the karma. We can delink from this karma only when we work with dharma (eternal law) as the basis and not looking for results and comforts. Strong karma will not allow us to follow dharma at times. We need strong will to overcome the dominance of karma. That is why we need the help of a Master who has that

strength and can grant it to us. If not, this earth will also finish its life span and we will still remain unfulfilled.

Madam HPB also tells about globe chains. There is another earth that is getting ready for the time when the present earth completes its term. All planets have a chain of globes associated with them. It is an intricate concept to understand. Each chain has 7 globes. In our case too, there is the concept of 7 lives. There will be a strong effect of our past 3 lives on the present life and whatever you do in present life can act as foundations to your future 3 lives. As we try to develop more and more good qualities in present life, they will dominate in our future 3 lives. If you develop bad qualities, then they will accordingly affect you in future 3 lives. If your personality at present is binding you a lot, it indicates what you have developed in the past 3 lives. So your past 3 lives condition you now.

There is another story which runs simultaneously. The actions of your father, grandfather and great grandfather will have an effect on you. This is in addition to what you have gathered on your own. And your actions will affect your son, grandson and great grandson. It will also uplift your ancestors. This is how the creation works in a 7-fold manner. This applies even to the Guru-disciple relation. That is why a teacher cannot easily accept a disciple because a disciple can pull down a teacher with his wrong actions. So remember that what you are today is mainly because of what you have done in your past 3 lives. You cannot blame anyone for what you are facing now. All our lives move in a chain. It is a utter ignorance to think that we take birth and die only once.

Madam HPB also predicted the descent of Aquarian energy. She later even cooperated with Master CVV in the form of Mother Venkamma. Master CVV used the subtle and causal forms of Madam HPB to conduct experiments after receiving the energy.

Madam HPB described the teachings of many Masters of Wisdom who have taken forms on this planet. She speaks of beings who have come from more evolved planets like Venus and Mercury and are staying on this planet to help the humanity in evolution. Awareness of all these aspects will help us de-localise from our petty things in life. We become global instead of being local. So try to read her writings on a daily basis. She is one who can lead into an ocean of wisdom.

Madam HPB gave us the golden stairs in which every line is a significant practice that one can pick up. Master EK even translated them to telugu. So you can read them in Telugu as well.

One should have a clean life and open mind. An open mind is one which can accept anything and everything without rejection. If you see someone belonging to a religion which you do not follow, you should not be affected. You should first remember that that person is also a human being like you. Religion comes much later. An open mind will not keep opinion on others. Opinions lead to unnecessary thoughts which will cloud your mind and it is no more open. Without an open mind, you cannot see the light.

Then we should have a clean heart and an eager intellect. I explained each one of these statements in detail in a May Call seminar which was even printed as a book later. So one can refer to it for detailed explanation. I am stressing on all these aspects so much so that you get the necessary inspiration to practice. Strive to become better day by day. Betterment should be in terms of thought, speech and action. We should progress towards perfection in all aspects. That is the way to Divinity.

Remember that the Masters of Wisdom can help only those have the aspiration and are prepared to practice with all sincerity. They cannot help you if you are not ready to help yourself. Let us remember this and move forward in the path. We should try to do things better than earlier. We generally start off with lot of intensity but that gradually fades away. Let that not happen.

-Swasthi
