

Master CVV December Call Celebrations 2020

Master KPK

Discourse 2, 29th December, 2020

(This transcription is only for personal use. It may contain mistakes.)

YouTube:

Hearty fraternal greetings to the brothers and the sisters who have gathered here and via electronic media for this very auspicious December Call 2020. The group in Bangalore have conducted all the events without change in vibration while in other places they basically gather for the morning and evening prayers. I distinctly notice the changes that are made in the prayer hall called Wisdom Temple at Tapovana, thanks to the electronic means.

As I said, this December Call is a festive event while inherently it includes the presence of the Master who is all-pervading. Master pervades all, overviews all, witnesses from within, since he represents that energy which we call the indwelling God who is within us and around us witnessing all that we do on a moment-to-moment basis. Blessed are those who live in that presence at all times and blessed are those who link up to him during their leisure hours and blessed are those who are making an effort to stay linked to the Master at all times. The presence is such a thing that it triggers a kind of chemistry and keeps transforming us. When we are not entertaining the presence, the chemical transformations do not happen to the personality. Therefore, like Prahlada, we are well advised to be with the One at all times. By that we realise that we live in Him, we move in Him and we have our being in Him and verily it is He who lives. It is a state of complete flotation. We don't sink in life at all times, both in times of pleasure and pain. Master CVV has once again insisted upon this state of beness so that all other practices may happen like fish taking to waters. One need not teach how to swim to the fish. The moment it is in water, it knows how to swim. Like that when we inculcate the habit to be in the presence, we learn all that is needed according to time, place and situations. We stay afloat and we keep serving. Therefore, the presence is the utmost of the keys

relating to the Master because it enables all transformations and in the process we also gain all the keys of wisdom and experience the beauty of wisdom. The beauty of form is one dimension while the beauty of wisdom is another. The ones who are linked to the beauty of wisdom; it's a kind of addiction and they are no more worried about the form side of life. The beauty of life flow and awareness flow within us. We should know how the silver cord containing the awareness moves in the body and how it can be improved upon. So also, we can see how the life force is flowing in us and what are the difficulties for the life force to flow within, what are the obstructions at the thought level, emotional level. Therefore, there is congestion for the life flow and also for the consciousness due to thought and emotion. Through wisdom, when we are able to experience the natural dancing artistic flow of awareness, flow of life then you see the beauty of these energies in us which are essentially formless but are basis for the form to move around.

So therefore, the day is given for observation and for right action. The right action enables an unimpeded flow of these energies. The wrong action causes some kind of stunted moment of these flows in us. When these energies flow with one complementing the other, the man stands in yoga regardless of the conditions that one has. That is how we see how great beings went through crisis without change in vibration. That is what is called staying afloat through all times. That is what we wish to achieve as we see in the lives of avatars and initiates. They are very enchanting because at all times they continue to remain in the same consistent vibration and they have spread fragrance all around. They become our models. All this is possible when we shift our love towards wisdom instead of love towards form. The Greeks had great wisdom and they preferred wisdom to form but slowly as races degenerated to fall in love with the form, the love of wisdom was replaced by passion for sex. As a consequence, the civilization has degenerated. When we slip down into the pleasures of the senses then we slowly degenerate. When we lift up the mind up to the state of Buddhi, it is one type of life and it is another if the mind slips into a state of senses. The ones in Buddhic state remain stable and are responsible for contributing to society. So, every Master of Wisdom contributes to man's movement towards the Buddhic side. That is why he shows us the laws of rhythm as they exist in nature. Every animate being has the adaptation to the laws of rhythm according to the seasons. They attune and grow and we also are to do that.

Master CVV has made agreements with many planetary principles such as Venus and Saturn. He enables revelation of the inner side of being and that is where occult meditations give the clues. When we clearly understand the Master's agreement with Venus, they also enable us to understand the inner world. That is what occultism means. When the inner world is revealed, it is on account of blessings and presence of principle Venus. Master also made arrangements with Saturn which would mean tremendous adaptation to the rhythms of nature. That is the most important dimension. At every longitude and latitude, there is a different combination of 5 elements. When we adopt to it, we are in agreement with the surroundings and much activity can be conducted with ease in tune with the Plan received from the Master. For example, I see Joshi, sitting before me, who can function for long and late hours without any difficulty like Master EK. As a consequence, he has been gaining related strength to stand the yoga because his body does not suffer much stress and strain. Last year after a long world tour for many days, I asked him if possible, to visit Nellore directly to conduct Master MN's birthday and he immediately attended. He travelled by road from Chennai to Nellore and then went to Bangalore. Imagine after travelling across the globe for such a long time, he agreed to travel to Nellore by road to conduct the function as asked. Why I am giving this example is, your body cooperates when it comes to the work of the Master. How many are able to work involving such strain with no second thought and happily. I recently gave a 207 pages book prepared by Charles Smith who lives in Shasta. He prepared the 5 talks that I gave at Shasta and added some more teachings relating to May Call activity and sent it to me to be prepared for publication. As it came, I immediately sent it to the Bangalore group when they were starting for Solstice prayers. I told them, "can you pick up this book and complete it for release on 1st January?" They immediately agreed and while being at Nilgiris for Solstice Prayers, they completed the work. What a joy we have to work with such a group. Also during the corona period, I entrusted a lot of work to Brother Navaneetam and he completed that work. In this corona period itself, brother UVAN Raju conducted a 5-day seminar at a place. So, for such people, corona, winter, summer or rainy season don't exist. They don't think weekends are for self-enjoyment. There are people to whom the Master's work becomes number one and all else is secondary. So, what kind of transformations

will be happening with such ones who are always in the work of the Master? The mind keeps on transforming when it is engaged in the work of the Master. It is like milk transforming into curd in the presence of yeast. I have seen many such members in our groups who are ever engaged in the work of the Master and they all are surely undergoing transformation by the presence of the Master.

Individuality should slowly yield to personality and personality should yield to group personality. At least 2 to 3 persons are needed to fulfil a job. Individuality is a great impediment. The more individualistic you are, the more you build walls around you and that is clearly seen when people do not have communications with their own group members. An individualistic one does not know what the next person is doing even within a family or a group. Communication becomes an essential part of group living. We can say hello to other group members and then discuss what is the work that is happening in relation to the Master. With electronic means, there is a lot of communication which need not be just gossip. WhatsApp has become a great facility for a lot of work and useful exchange. This WHHO is spreading at a greater speed all over the globe due to this communication. It is a great opportunity given to us by the Hierarchy to relate to them. Make sure that all likeminded people join this order. Already 500 triangles have been formed and I am expecting something like 5000 triangles so that there are around 10000 people participating in this order. If we all pray together at respective local meridian time, you can imagine how much healing energy we can bring down from the higher circles. And then with love and compassion, we can slowly neutralise and even dissolve this pandemic and even other sicknesses prevailing on the planet. So, we need to submit ourselves more and more to the plan of Hierarchy.

Master CVV himself formed triangles with many other Masters of Wisdom like Maitreya, Manu, Sanat Kumara, Maru, Koot Hoomi because the kind of energy received was never before. They have visited the Master during the late hours of the night after the energy was received. Mother Venkamma and Chandu were only witnesses to these events. Chandu, who is just months old, and Master CVV spoke in a language which Mother Venkamma could not understand but it is a great sight for her to see. She used to see people coming through the walls and windows into the room. They are all so brilliant and tall to watch. You have to envision these things written in the books. I have given these details in the book Aquarian Master. These are all not gossip. So, there is a very definite link established by the Hierarchy with Master CVV. It is not the other way. They formed triangles with Master CVV, picked up the work and conducted the work. That itself shows the depth of this work. That is why the Master said this is going to be global and transform humanity.

We cannot just remain at the micro level. We also have to think of macro level from time to time. Macro level we stand connected and then it is a grand work collectively done. This work of health and healing is an order from Hierarchy. They have a wing for health service under the order of goodwill. It is for the human kind at large and not for any religion. It is for all beings. The same is the case with wisdom teachings. Likewise, awareness is common to all the beings. It belongs to Manu and is present in all of us. He formed many triangles as well which are mentioned by Master DK in his books.

So, we shall have to keep abreast ourselves of all this information and that itself is like swimming in the ocean. Whenever young persons like Sandeep come, I keep on giving different dimensions of wisdom as dictations and it is never ending. There are many layers of wisdom and it is abundantly available with Master CVV. Master himself stated that this is a path of direct knowledge. So, we have to add more and more knowledge to our mind's library. The mind that is connected to Buddhi only can preserve wisdom, otherwise it evaporates from mind because the mind has limited capacity to memorise while it is not the case with Buddhi. Therefore, the Master wants us that we are into the ocean of wisdom and to us Master EK is a great example. He has touched many dimensions of wisdom in 30 years. It is such an ocean and such beautiful information within the ocean, that each time you touch it, it turns into volumes. Each statement coming from a Master of Wisdom, it multiplies into multiple sentences. I try to bring out the wisdom in a more intelligible manner so that everyone can understand.

What is written in the past is becoming difficult for present people to understand. People even find Master EK's writings difficult to understand. A continuous functioning with the knowledge given by the Master sharpens your brain and more is revealed. Every page contains profound wisdom in simple sentences. Master EK is by far the simplest in terms of expressing a thought into language. This was the compliment that he got from his Master and he was told not to seek opinions on his writings. We would not be doing great service if we do not make an effort to understand the wisdom that came through Master EK. We should make an attempt to read the wisdom in the language presented that came through Madam HPB, Madam Bailey and Master EK. Please find time to improve your knowledge which enables you to cross the oceans of birth and death. Devote some time to gain some wisdom on a daily basis. I know some members of WTT who are regularly adding to their mind's library. If you add one page every day to that library, in a year we can add 365 pages to that library and in 3 years' time, it becomes 1000 pages. It enables us to connect to the teacher. The true bridge to the teacher is the wisdom that he has given. I used Spiritual Astrology of Master EK to give out teachings in many seminars. It is such a wonder book. There are books which can be used to contemplate and gain a lot of wisdom.

Therefore, relate to the Master through the teaching and not just based on your liking. Relating to the soul of the Master is important and the soul has qualities of will, knowledge and activity. How you relate to the Master through the qualities is important. How do you utilise the knowledge dimension, the will dimension and the activity dimension in your life is important. You are measured accordingly. You score a point when you take part in an activity of goodwill. You score a point when your knowledge inspires someone to take to the path. You score a point when you can receive an iota of the Divine will and manifest it. This way, the soul infuses the personality. Otherwise, the personality confuses the soul.

There are many who are confused and cannot distinguish between personality activity and soul activity. If it is your soul activity, it continues even after you depart. There are many novels written by many writers which disappear slowly but Scriptures and teachings of Masters of Wisdom continue to stay. They can survive cycles of time. When the stream comes from the soul, it survives. When the stream comes from personality, it does not survive. So, learn to distinguish the personality activity from the soul activity. The personality activity gradually dies after while the soul activity gradually grows after. When Master EK was in the body his activity was not as much known as it is known today. Likewise, it is the case with many seers. When Christ was crucified, it was a local event but now it is a global event. His activity is now all over the globe. So is the case with the work of great initiates that it continues to grow. If it is for avatars, it is for all times to come.

So, what is important is whatever we do, it should be an everlasting thing. If we cannot do on our own, associate with an everlasting activity. To join the sea, you can catch up to a live river which merges into the sea. Likewise, these Masters of Wisdom have gained the status of ever living. If you associate with them, you would also gain such a status eventually just like an iron piece turning into a magnet in the presence of a magnet. Eternity is promised by all the Masters of Wisdom insofar as you relate to the work and teachings of a Master of Wisdom. This can happen in 12 lives. This is written in the book Music of the Soul. Better join a stream which can lead you into the quality of immortality.

So, we need to distinguish as to what is permanent and what is not. We need to continue working with a Master of Wisdom without changing the Master. One is good enough. If a river joins the ocean, in the ocean we can all meet. Rivers like Godavari, Ganges, Cauvery, Krishna, all meet in the same ocean. You see the unity of all and not the distinction. Poor are the minds that distinguish one stream from the other. Rain water is one which fills up different rivers across the globe. Each river has its own qualities due to the quality of the matter through which they flow. Every river is a personality on earth but beyond that state where it falls into an ocean, the water has the same quality. Up to above and in the ocean, it has the same quality. Only in between each river has its own personality. So also, the wisdom which is one; when it falls in different regions, it attains different anecdotes. Jesus used parables, Veda Vyasa used some other stories and in Greece they have different stories, there are fairy tales and so on. They are different from nation to nation but they all are derived from the same point of wisdom of life. When you get to the oceanic wisdom,

you see the One in all. Otherwise, we say 'my teacher is great' and 'my teacher is great' and that is how people fight. Therefore, unity finds its diversity and therefore re-finds its unity. Humans are all diverse in terms of birth conditions, places, families and so on. But all are humans and they have common appetites. Therefore, this synthesis of wisdom is very important. One is becoming. This knowledge is gained when we consistently relate to wisdom.

Therefore, Master says that do not get lost into all superstitions and traditional practices. Try to gain wisdom and lift up your being into colour dimensions of your own being and of the creation. When you move between heart and throat centers, there are many colourful planes of existence. There are different sound vibrations as well. There are different numbers as well. When you know the potency of number, vibration of sound and velocity of colour, you are better informed. That is how you understand the symbols of various theologies. Your comprehension tends to be global and then you become a global citizen. The spirit has to be a global spirit which means you have to think of the globe at large. There should be no wars and discussing who should win the war. We should not think which economies should flourish and which should not. All economies should flourish. There should be a global economy, global health and global cooperation. How many nations are thinking in this manner? Nations have their own personalities and try to fight with one another just like different human beings. They find it difficult to synthesise. One who can synthesize different groups of people has a fatherly thought. A good parent wants all his children to be together and cooperate with one another instead of competing with one another. We should think of inclusiveness. Such a one is really the elder one. As many as you include in you, you become elder. You become a fatherly figure. Inclusivity is another dimension that Master CVV brings about with great emphasis. It is a second ray dimension and he ensures that all the other rays merge into it. He functions with all the rays. Master CVV belongs to the Great Grand Lodge which is present in Sirius. So, this is how he synthesised all the rays in functioning. Therefore, we have to learn to synthesise all dimensions of wisdom and we have to become effective mediums in the hands of the Master.

Master CVV gave seven mystic prayers for solstice for the purpose of removing the mount in you and relating to the Master. Mount is nothing but your personality. You are trying to look to the Master but the mount of personality prevents you from seeing. I did not know the exact meaning when they were conceived but they were revealed during the solstice hours. They just came through when Brother Joshi asked for them.

So, playful take to knowledge, read a page a day and walk together speaking about this knowledge. By sharing and discussing wisdom, the wisdom gets more and more engraved on us so that it stays with us even after. The agreement between personality and soul happens due to this. All that Master does is for this agreement to happen. Otherwise, you cannot surmount the mount of your personality. The personality grows so big like a phantom and the soul remains the same at all times. The personality should be kept like the reflection of it in a mirror which is always small. Let the soul grow and mount over the personality as you develop your knowledge. People who speak about themselves are those who are suffering from personality issues. The other persons are least interested in knowing about you because they are interested in speaking about themselves. That is how all personalities keep on speaking and there is no soul connection. Where personality overtakes, there is no soul connection. If you have a very strong dog with you and you go with it with for a walk and if I have an even stronger dog which I take out, when we want to meet, the dogs fight not allowing us to meet. Likewise, our personalities prevent soul meetings. It tries to meet the other personality before you try to meet the other soul. So is it two souls meeting or two personalities meeting?

The saying is, even Julius Caesar falls for flattery. It is a game by itself. This fall happens very easily. We are on a slippery ground when someone is praising us. It means, anytime they may pull the carpet under your feet. Therefore, we must make sure that we stay put in the soul. That is possible by remembering THAT I AM - SOHAM. There should be a stable stage upon which we stand so that we do not slip into personality and form. Master CVV says "Sideways" which cautions of distractions when we try to move vertically. Krishna says, "Keep your personality humble and simple so that you are not lost in the society". Otherwise

too many people invite you to many functions and there is no time for practice. In that way, Master CVV is very helpful. He cuts off what is not essential. He ensures that you remain a decent simple member in the society not available for all activity. A wise one makes sure that they remain silent and work. The group in Tapovan works silently and very few around know what they do. The ones who know have praise for their work. So, Master CVV says do not grow sideways and instead grow vertically. We have to make sure that we grow vertically like a tree. Tree naturally grows vertically unless it doesn't find sunlight and only then it tries to grow in other directions. So, Master CVV cuts you off so that no one wastes your time and you do not go somewhere and waste someone else's time.

Entire Master CVV prayer is centered around the cerebro-spinal column. He can reveal things to you from that column. He reveals cosmic things through your head, solar dimensions in your upper torso, planetary dimensions in your lower torso. All can be visualised within the cerebro-spinal column and related knowledge also comes to know. Master CVV is a Master of internal impressions. Teachings and directions are impressed within. You also know your programme from within. You don't have to ask anyone. You are guided and taught from within. When you are internally available regularly, the Master is willing to teach you from within. He gives you sight from within which is called insight. The insight is important before you get the vision. The left eye is for sight, the right eye is for insight and the third eye is for vision. Insight means you can see through an event, you can see through others' motives, others' talks and actions but remain silent and appropriately respond. Master CVV says, "I am the reservoir from which everything comes to you. I will fulfil you in every dimension of your life and lead you to immortality". Trust him and don't doubt him and move forward. All goes well.

Second thing is, join the WHHO because it is a global service that puts you on the stature of being a world server. It is an opportunity given by Hierarchy. So don't miss it. I thank you one and all for your ever keen and patient listening. I am sure the transmission was also equally consistent to enable you to listen. Remember the stature of Master CVV in you and feel big in you but don't show big, and live in silence. Happy December Call and happy New Year. We meet again when it is ordained. Namaskarams Master CVV, to your Lotus feet. Thank you.
