Hearty fraternal greetings and good wishes to all the brothers and sisters who are gathered by the will of the Master to listen to the Saturday teaching which is dedicated to the Festival of Solstice. Since many years we have been gathering for the Solstice in one part of Europe or the other. Many times, the importance of the festival of Solstice is expressed since it is a festival of the meeting of the Sun with the Moon. It has to be recollected so that we renew our energies to progress on the path. Just a small story of Solstice I sent to you all, which contains about 5 steps. I hope you all have received it. Nevertheless, I recite them and I explain them to you all. Not that you do not know but that we recollect, remind ourselves, thereby recharge ourselves and move forward.

The first stanza that I have written in the story is,
Punarvasu, Punarvasu, Punarvasu!
Cried the Aspirants and the Disciples.
The Solar Angel, RA condescends,
Joined MA, to the delight of them.
Planet renews vibrations yearly.
Rama, Rama, Rama, Rama, Rama.

This is how I have conceived the event of the Solstice. Punarvasu is the 7th constellation of the 27 constellations that we have. Punarvasu means, "To come down again, to live with us". The Solar

Angel annually enters in Aries. Each year is different from Aries to Pisces. Every year has its characteristics. The year that we run now is what is called Plawa. It means it does a lot of cultivation within us and on the planet to bring forth better things that are hidden in us and in the planet.

The Solar Angel that enters the year, it does so in the month of Aries. That is why we celebrate the New Year in the month of Aries. New Year is not first January as we all know. It is 21st March and around. With the Beginning of Aries is a new year which is marked with the Sun entering into Aries. Sun in Aries is exalted. The sound for Sun in Aries is what we call RA. Before these Kali religions have come through, before that, all theologies considered the Sun as God. The name of the Sun is RA. Be it in the Eastern or Western hemispheres Sun is called RA, R, E, A or R, H, E, A. When the Solar Angel enters Aries, it is called RA and it travels through one quarter of the year and gets into Cancer. That is what is called RA entering the mansion of MA. MA stands for mother, MA stands for matter, MA stands for matta, Ma stands for Maria. All that sounds with MA relates to nature. When the Solar Angel joints the Moon's mansion it is a celebration. That is what is called RAMA. RAMA is not a religious sound, as it is understood, because the religions came much later in Kali Yuga. Before that, Wisdom prevailed. The sound RAMA is as old as the creation itself. RA stands for the Lord. MA stands for the Mother. One is the male principle the other is the female principle. It is always the male principle that joints the female principle to cause creation. It is not the other way. It is not that the female principle meets the male principle. It is for the male principle to come and join the female principle. The female principle waits for the male principle to join. The female principle if it is really female principle it waits for the male principle to join. The female has the ability to wait. The female is not proactive. Male is proactive. Male joining the female in a solar year is celebrated with the Sun entering into Cancer which we mark as the Solstice and we call it Summer Solstice. In India it is called Dakshinayana. Dakshinayana means coming towards South. From the forehead which is East the principle joints the heart which is South. I do not wish to go too far back into the wisdom but it is enough that we know it is a festival of Rama in the sense RA is the Solar Angel. It is a descend of an avatar as Rama. He came, he took birth in Aries, that is a different story. Even before the Avatar came there was the creation and in that creation the Veda explains the story that the Solar Angel meets its female principle in Cancer to enable incarnation of souls and then later the story of the souls finding their expression.

From Cancer to Capricorn, the Solar Angel walks along with the lunar principle where the beings take to their incarnations, make their journey. In Capricorn again, the tenth house, as he completes Capricorn he moves into the sky in Aquarius. The female principle, which has joined the male principle in Cancer, insofar it has the ability to associate with the male principle, it will also join the sky and move forward towards Aries. So, each time, when the Solar Principle descends, for six months he walks a path which is called Royal Path. In that path from Cancer to Capricorn all those who relate to the soul, they are carried on. In Capricorn, what happens, they ascend the mount. After ascending the mount, further ascend is only possible in association with the soul in Aquarius, for there is no ground to ascend. It is moving into the sky, which Aquarius represents.

Every time Sun comes in Aries it joins the souls in Cancer, travels with the souls up to Capricorn and, those who are ready to associate with the soul, he causes the ascend from Aquarius to Aries where there is the Passover. This is how you have to understand the four dimensions of the Solar year. Not counting by our calendar months. There are four steps for the Solar Angel. He descends in Aries in the constellation Aswini. When he reaches the seventh constellation, that seventh constellation is called Punarvasu. 'Vasu' means 'to reside'. Punarvasu means, "come back to reside with you again". What for? We cried. We, the mundane beings, we cry, we cry, "Punarvasu, Punarvasu, Punarvasu! Cried the Aspirants. Please come down, please come down, please come down!". In India people cry

for Rama to come down, for Krishna to come down. The Buddhist cry for Buddha to come down. The Christians cry for reappearance of Christ. All is nothing but descend of the energy from Higher Circles into our Cancer center which is the heart center. What for? For us to find a way to move on, to experience and move with Him, along with Him into lighter regions. That is the purpose of this festival. So, we cried. The Solar Angel RA, the angel, the Soul, what we call the Central Sun is full of love and compassion. When you cry, he comes down. That is how Avatars happen. That is how grand teachers happen. Only when there is a huge cry, they say, "it's ok let me go again, try to help them". They know that, despite of their support, not all can accompany them. "But still, they are trying, so let's go". When an Avatar comes, or a semi avatar comes, descended angels, all kinds of things from Higher Circles they do. But in the annual story, in the story of the solar year, this solstice is of great importance. It comes down to stay with you and is therefore called, your teacher. He's at the head. You are in the heart. You cry for Him to come down. He comes down to your heart.

Sun entering into cancer is a great festival, that He comes home, to your home. Is not that we go to his house, we would get burnt up. There was a person in the morning, via friend, who said that the Moon does not move towards the Sun in a Horoscope. Only the Sun has to move towards the Moon. That should be the way. It is good that the Sun light comes and lifts us up than our going to the Sun straight away to burnt up. So, the entry of sun into Cancer is the entry of the Soul into regions of personality, into the chambers of the heart and we are supposed to associate with Him. Association, the formula is simple, So-Ham. So-Ham is the formula by which you can regularly relate the two principles in you. So, out of love and compassion RA condescends to join MA. Both are delighted because the matter also emerges from the same source and then the spirit also come down from the same source. They are delighted. This is what is expressed symbolically in the story of Ramayana. Rama comes to Mithila to join Sita. That should be the natural way of happening. Krishna comes where Rukmini was and picks her up. Man should find his lady and pick her up. Is not that a woman tries to search for a man. The woman should have the ability to wait for the man to come and hitch her up. So, that is how the ancient stories run, that the male principle should come to the female principle. In India, marriages are also done like that. What is important is, you sit in your heart center. You wait there. All stories are occult stories but they are all also explained exoterically. In our story of Nala and Damayanti also, Damayanti waits. Let Nala come and pick her up. In Ramayana, Rama comes to pick Sita up from Mithila. In Bhagavata, Krishna goes to kidnap his lady. All those stories are natural stories. Is not that a woman goes to pick up, kidnap a man. It is not natural.

That is why in Horoscopes also we find that Sun moving toward moon is a better situation than moon moving towards the sun. It is a different dimension. So, the beings always look for descend of the Soul or the Master in them. It is already here (forehead). He has to come, reach me, lift me back to him. He can lead back through a reverse wheel from Cancer to Aries. The path from Cancer to Aries is a reversed wheel. The path from Cancer via Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius, Pisces, is the regular wheel. So, the beings go from Cancer to Capricorn for six months, it is called the Royal Path. From Capricorn again to Cancer, the path is called, the Divine Path. The royal path is called the Royal Arch. The divine path is called the Divine Arch. You know in our theologies that the emperor has built an arch upon two tall pillars of Gemini, indicative of divine arch. We set divine arches against divine people meaning they can walk through the divine path also. Then, there is the royal path or royal arch. So, there is a divine arch, there is a royal arch which are also call Divine Path and Royal Path. Together makes it a complete experience. The souls descend to experience all the dimensions that exist with the six centers in us represented by six planets. So, we go through all the planetary travel experience. Then reach the Sun. By that you are fulfilled. So, this is the story conceived in the Veda in relation to the Cardinal Cross. We are now working with the Fixed Cross. We

are as disciples working with the fixed cross. But the Veda gives the Cardinal Cross which is the ultimate.

So, the first stanza, just for the sake of the groups who wanted that I should say something about Solstice. In the morning I thought a week ago and then these thoughts came, just to put into a kind of semi poetry and a semi prose, some kind of hotchpotch. "Punarvasu, Punarvasu, Punarvasu! Cried the Aspirants and the Disciples". Disciples also cry. The Masters also participate. "The Solar Angel RA condescended. He condescends". It is his nature because he is full of love and compassion. "He joined MA, to the delight of all of them". That is what happens in 21 January, morning hours. According to your time you can look to it. You can relate from Ajna to Heart and experience the joining of the Solar energy up to your heart center via golden thread or semi golden, semi silver thread. The visualization is your job. Let the energy join you. So, they all said, the planet itself gets vibrated. Please note, not only for our sake, for the sake of the planet itself, the Solar Angel comes down. Therefore, planet renews and the vibrations step up yearly and the planet itself sounds forth, Rama, Rama, Rama, Rama, Rama, Rama.

This Punarvasu constellation is in the first four degrees of Cancer, please remember. The constellation is of 13 degrees 20 min, of which only last part of Punarvasu, which is called the fourth Pada, fourth division, is in Cancer. Three divisions are in Gemini. Three divisions are in Gemini, fourth division is in Cancer. In that division the Solstice happens where we can have this experience. Surely every year in the constellation of Punarvasu this happens, in the fourth part of the constellation. You can make note of the days and accordingly relate to them. That is why there are people who relate to the Solstice for four days, for five days, for three days, for two days, for one day or for one meditation, just to finish a formality. It all depends on one's own aspiration. So, that is how the happening is every time. Sun joining Cancer is a great event, which we have to relate to. Energies from Ajna to heart are poured down. That is why when it happens, normally on the planet there will be some scattered rains here and there. Scattered rains. Some drizzle, not a typhoon or a cyclone. Some welcoming drizzle happens, which is also a blessing. Clouds happen at that time. The clouds also happen. All this drama of the universe, of our planet is conceived mostly in that belt which exists between Tropic of Cancer and Capricorn, that belt. Tropic of Cancer, Equator, Tropic of Capricorn, in that belt which is called the Tropical Belt, all the seasons are conceived, all time cycles are conceived and the secrets are also described in relation to that. So, when we speak of Wisdom, we are only speaking mostly of what is happening around this tropical belt. You can make your own adjustments according to your locations.

Therefore, it is a great star, Punarvasu. It is a star of love and compassion and the story of Rama is full of love and compassion. I am not leading you towards the story of Ramayana, please remember. I am leading you to an event that happens every year with us around the Solstice where the Solar Angel joins the lunar mansion. Why, because Cancer is the house of Moon. So, the soul in us meets the mind in us which is oriented to the soul, only when the mind is oriented to the soul and it keeps on crying. We cry in so many ways. All our prayers are nothing but our loud cry. We keep on crying, "When do you come, when do you come?" Because we cannot reach Him. He can come. He can accompany us. He can cause the needed adjustments in us and he can lead us beyond the Royal Arch into the Divine Arch. That is why we have another festival which is the Capricorn Festival. Capricorn festival which happens in the constellations of Ashadhas. There are two Ashadhas in Nakshatras Punarvasu brings down. Ashadhas cause upward movement. Sravanam, you are able to reach the air. Dhanishta, you go beyond. That is how these constellations are all named. The theme of constellations may generally be known and it can be known through zodiac signs also. Cancer to Capricorn is the movement of God upon earth. We walk along, be with the Lord and walk along. So,

when the descent happened aspirants and disciples aligned because they are crying for it. If we are aspirants, if we think we are disciples, we have to tune our life in tune with the time. Without tuning yourself with the time, what you do is like a blind man moving in a forest. You are not moving in the paths of Light. That is why astrology is important. Astrology as a science has great many dimensions. If we understand the working of the planetary Lords and then the ones behind in the constellations and then, you go back to Prajapatis for clusters of constellations. We move forward to know more and more and associate with the ways in which the Light moves.

So, the aspirants and the disciples, they make a plan, how to move to go through the Royal Path. It is royal when you are with Him. You tend to be a pilgrim when you walk with Him. You walk, you don't join Him, you walk by yourself, you become a prisoner. This is what the story is. With light you move. The Light knows the ways. Even through the darkest regions, the Light leads you because it is its nature to show you the way and lead you. But then, people invoke and then, only the fiery aspirants and the disciples they associate with it and perform. Without your performing nothing happens, you have to perform. Perform what? Turn your life into a life of goodwill. If you are here in this planet, it must be worthy, it must be worthy for some people around you. What for are you here? To be worthy of something, which the Light shows. That is what happens in the Solstice. So, "the Aspirants and Disciples align to perform". Each year comes with a plan. Each year comes with a plan and that plan is conceived in Shambala, in Aries. It is further conceived during Vaisakh full moon by all the Hierarchy. It is given to disciples during the month of Gemini through initiation. Be it Pentecost or May Call or the descent of Fiery Tongues. All these festivals are descent of the energy into you, into Gemini. Then, for the general humanity as such, to all, is Cancer. It is a gradual descent in 90-92 days. These 90-92 days is a preparation for disciples, from Aries to Cancer where they get initiated during the Solstice. What have we done in the last 90-92 days? From the beginning of Aries to the beginning of Cancer. That gives the alignment and that lets you realize and then, work out a plan up to the end of Scorpio because the path thereafter is filled with obstacles. The first thing that happens is, we get proud that we are associated. A little association with a Master of Wisdom, a little association with some goodwill work makes you proud. Then, as you step into Leo, the pride comes. The dweller on the threshold for Leo is its own pride. The pride separates and makes him an individual consciousness. He develops localized consciousness and does not integrate so much with the surroundings. Like a lion in the cave that separates from the rest and then keeps on acting with pride, which is a step of ignorance. As he steps further into Virgo he develops a lot of intellect, which is not associated with the Light that descended into him up to his heart.

Leo brings pride, self-rule, false understanding of freedom. I want to do what I wish to do. You may do but you will find your own nemesis. If you join a plan which is already there it leads you with much ease. If you create a plan within a plan, until that plan is resolved, your journey will not progress. The great knowers of experience had said it: "Father, Thy Will be done, not mine". You wait, you receive the plan, you follow the plan. Then, in Leo you can do a lot of good things. Your intellect in Virgo helps. Otherwise, you develop a peculiar intellect which is self-defeating, full of logic with no explanations. Your intellect and your pride put you into a vicious circle. In Libra, we fall into passions and emotions. How are we to overcome? But the same libra in association with the energy of the Soul can unfold the beauty of the creation. Likewise, in Scorpio, in association with the Solar Angel you can experience the hidden secrets of the creation, which we call the Occult Dimension. Otherwise, it is full of darkness, decay and death. That is how in Scorpio it is said. Scorpio is full of darkness, decay and death insofar as you do not relate to light. When you continually to relate to light, there are passages by which you are directly related, not going through the whole zodiacal scheme. These passages are there in every sign. To give those passages only in why Spiritual Astrology is given by Master E.K. We need to read, we need to meditate, understand and try to put

them into practice. So, when you do not associate with the Solar Angel in Cancer, you have impediments of localized ego, separated ego. Another impediment is what we call a 'brain enlargement', in the name of intellect, which is a sickness actually. Many intellectuals they are a problem to themselves because they don't do anything, they sit in a chair and keep on commenting. You fall into passions of flesh and blood in Libra and ultimately, decay and death in Scorpio. Only from Sagittarius, again things move different.

So, this path, I was explaining this path in the story of Nala and Damayanti, there I explained it as Karkotaka, the snake. The name of this month Cancer in Vedic astrology is called Karkotaka Rasi, Karkotaka. They are not named after the Seers they are named after the phenomena that happens. That is why they are all impersonal. If someone finds some star, a human, with its equipment, he names that star with his name. That is preponderous. But the Seers have seen the phenomena and give that name so that the posterity is benefited by it. A man who looks at a comet and says 'Halley's comet'. What is Halley's comet? The comet existed even before Halley existed. We say Regulus, the man who invented, a sun in the Sun sign Leo, how can you call him Regulus? He has a name. His name is Magha. What is Magha? You get some idea, profound knowledge, magus, magic it brings. What is Regulus? It is all man's arrogance that he names the universe according to him. While there is already the Universe in which he is a small speck. It's all because we think too much about ourselves, not knowing that this planet itself is a mustard seed and we humans are most insignificant fellows on this planet. This should be known all the time. Otherwise, you only grow to have a swelling brain. It doesn't help you. It doesn't help you to experience anything. All this can happen if you don't relate to Solstice. That is why it is celebrated as a great festival. The Lord who lives in your head, when it comes down to your heart it is called Guru. Guru means, it comes nearer to you, he guides you from proximity because he has love and compassion for you. You should be humble to receive that knowledge, live by it and that knowledge is what is available by way of Scriptures.

So, "The Aspirants and Disciples aligned to perform while Humans tended to be to personalities!". The humans you know, we all know who we are, what we are doing on the planet, what are we to do and what are we doing. It's all our making. Most of our crisis are all our making only. "The cry of the Soul is subdued". While he descended, we take it for granted. Our pulsation, our respiration, until it stops, we keep on making our own monkey business everywhere. We feel so great about ourselves and involving all kind of monkey activity. Monkey means inconsistent activity, no uniform activity, no regular activity. It jumps from one thing to the other, from one branch to another branch. Then, another tree, eats a bit of a fruit and goes to another tree. That how monkey behaves. So, what happened. He came but you don't respect. You cried, someone cried for you. You may have cried. It has come. It comes into every heart. You are engaged in your personality activities and then the soul cries. People don't listen here (heart), that is the whole problem. Why, because they are busy with their senses. They are busy with their sense objects. They are busy with the outer world so much, like kinder, like children. The mother calls or the father calls, home! but the child is somewhere. Subdued. Not only that, they create their own phantoms. These phantoms are dark personalities emerging from the strong desires that they have in relation to the world. That is what happens. That is how in Leo, not only Masters are born, monsters are also born. Know that. It all depends how egoistic you are or how connected you are. If you are connected you are in good order. If you are not connected, you can be a disturbance to the creation. See how the governments are unable to help. What are their objectives? We think of inner government consisting of Masters of Wisdom whom we wish to relate to and be governed by them. Not that we govern ourselves because we don't know how to govern ourselves. Better be governed by someone who knows. That is in you, in your heart. You can relate to it regularly by relating to respiration and pulsation. When you are able to listen here (heart) half the job is done. Half the job is done when you are able to listen here (heart) because He

descends from Ajna to heart center and teaches you what you have to do, when to do, where to do. How to do, when not to do. So many things from within. He also sends his agents from outside to give you the information because you may not be able to listen well. That is how the Hierarchy is formed. Hierarchy is full of teachers who wish to help those persons who want to help themselves. There is a small part in this humanity who would like to help themselves. Self-help is the best help.

So, the voice can be heard. Or someone who knows when he teaches, you relate to him. Take the discipline and start working with it. That is the best way to overcome the impediment of Leo in you. Then, your intellect functions in the right order. It Does not get anywhere and everywhere because the intellect is ruled by Mercury. Virgo is the lord of mercuries. Virgo is Mercury. You develop a peculiar mind which doesn't listen to does who know, which does not find solution to himself. He cannot either find solution to himself, nor does he let anyone help him. It is a pathetic situation. This starts even in Cancer. The seed starts even in the last part of Cancer. That is why the last part of Cancer for ten days or thirteen days is notified as the constellation Ashlesha. Ashlesha, this snake I was speaking about in the story of Nala and Damayanti. The snake is Karkotaka. Karkotaka in the month of Karkotaka. It is a difficult situation. Just make note of it. So then, what happens? You are in a cobweb of your own mind. No one can help you because you deny help coming from above, you deny coming help from the surroundings through a teacher. You develop a mind which is not useful, comfortable to you and not comfortable to others. That is the enigma of man.

So, "The cry of the Soul subdued. The phantoms grew. Blue turned Yellow. Yellow turned Green. Green turned Brown". See, the blue that is in the forehead when it comes to the throat center becomes aquamarine. When it comes to heart, it gets into golden yellow. Then thereafter, as it moves in the downward ways it gets into green and brown. Brown is the color indicated for mundanity. So, we are engaged with mundane things. Our understanding also, does not grow beyond the mundane. We stop seeing the subtle. All this happens "Solstice to Solstice, RA and MA toil with Love and Compassion". From every solstice to solstice the father principle and the mother principle want the incarnated souls to find the light, to experience the creation completely and come back and join. But then, the "humans tended to mundane, breeding Deceit, Disease, Decay, Diabolism and Death". That's what we are. That is the major activity the media communicates if you open the television. If we open the television and look to news, we get depressed. That is why the teachers say, just to see the main headlines, don't get into it. You should know what is happening around but do not dwell deep into it. Everywhere there is deceit, disease, decay, diabolism and death. We have so much of disease, so much of death that is happening these days. Not to speak or get into political areas, there are plethora of vaccinations and many are confused which vaccination is good. God knows! Everywhere confusion is created, fear is created. That is all diabolism.

"The descent of RA and the lift up of MA ever ill perceived and ill conceived". We don't perceive what the annual year, which we call the Solar Angel, moving around the zodiac, what is it that he's trying to bring? With what grips. With what grips the Solar Angel enters Aries, no one is worried. We are only worried about the Christmas gifts that Saint Nicholas brings. Isn't it? Some little material packets. Some chocolates, some cake, some flowers. Ho, Ho, ho. Like Kindergarten, we rejoice during the Christmas days. Is it that for what we have to rejoice? Should we not rejoice the presence of Christ in us? And then workout. The more and more you experience the presence of Christ in you or Krishna in you, or Rama in you. Whatever name you give. The Divinity in you it is so much in this creation. Why don't you rejoice those gifts? Why do you look for small gifts that Saint Nickolas gives and make mysterious movies about it, create a make-believe world and deviate you from the very path, is it not deceit? The best gift comes when Sun enters Cancer. When Sun leaves Capricorn you should weep, because you cannot move along with him. Beyond Capricorn you cannot reach the Sun. It is a

different story. When we have to weep, we rejoice and when we are to really rejoice, we weep. This is our story. So, “The descent of RA and the lift up of MA ever ill perceived” There is no perception. Only when there is a perception there can be a conception. Isn’t it? When there is a conception there is a pregnancy. That pregnancy, when you develop for about nine months you deliver the baby, which is your rebirth. So much wisdom! Each time when we speak it comes out different. I have been speaking for 25 years about Solstice. Theme is the same, presentation changes because every Solar Angel has its own ways of doing things.

Therefore, “the plan is set in abeyance”. The very plan for which He has come, the Solar Angel realizes, ‘I have come because I have been asked to come. There are prayers done, there are genuine prayers done by disciples.’ But then, what happened? According to madam Blavatsky in a century of 100 years, ten to twelve persons are able to ascend. This is pathetic. Ten to twelve persons in 100 years meaning, a person in a decade. We are such difficult students, difficult children! Nevertheless, we have interest in it so move on. But then the angel, he realizes by Capricorn, which is the tenth house, what has happened for the year, who comes with him and who does not. All those who come with him, he takes to the fourth quarter and then, the Passover is there. The festivals are differently named but the movement is the same. Movement is the same. So, he knows, OK, the Plan did not work this time and the Solar Angel returns to his abode. Then, again the cry starts. We only know how to cry, that’s all. Mostly our prayers are also crying for bread, crying for food, crying for shelter, crying for clothing. We are not willing to go with Him. It is a glamour to entertain. Mostly it is a glamour that we entertain. But, are we ready? Every person has to decide.

“The plan set in abeyance”. When the plan is not moving on, Kali takes a great advantage of it. The moment you are separated from it, here (heart) Kali says, ‘Ah, this is my future pray. I can eat him. It is flesh. Drink his blood, even eat his bones and then, take the juice of the bone marrow’ So many things Kali can do. Therefore, Kali comes into play and then, “All is in pell-mell”. Pell-mell means upside down. Everything is upside down. We cry, ‘It is all upside down. It is all upside down. This Creation has no meaning’. There are people who write to me they are all people who condemn themselves into illogic. Illogic. You cannot bring them out. In everything they see negative in it. They don’t see anything positive. When such a situation arises, man loses trust in its next person. No trust. I don’t trust you. I don’t expect you to trust me. It is the worst poverty that a human can suffer. The worst poverty, that I don’t trust you, you don’t trust me. The wealth of the World Teacher is trust, I have been saying for so many classes. Be in trust. It is a different thing. Be in doubt is different. Krishna says in Bhagavad Gita, “If you fall into doubt you are perished”. Have trust in you. The awareness, the pulsating principle, day and night helping you. Trust them! They are willing to give you direction, willing to give you knowledge, willing to give you enough intelligence to act. Trust inward. If you find someone else, trust him. Trust is the bridge. When that is broken then, “Kali breaks out”. When Kali is at its height, we don’t believe each other. We don’t believe in each other. See, in a family, when no one believes the other, everyone has a separate bank account. Why a separate bank account? Don’t you trust? Everything is separate, separate, separate. As much as you separate so much you are getting away from communion. It is the energetic communion that we speak of in the Marriage Sacrament. The One consciousness functions through two bodies. One consciousness functions not only through one body, but the body of the other; vice versa. Such is the trust in Hierarchy. Such is the trust that they would like us to adopt to. If you lose by trust, doesn’t matter, you gain. But trusting if you have lost, it’s a good riddance. That is why Christ says, “If there is a deceit, be deceived”. Don’t deceive others. You get tremendous karma.

Therefore, “we the aspirants, retribute, repent, reorient. We align to the Soul, redress our personalities, pledge to perform in humility and gratitude and ensure the work of Light and Love”.

Since we all believe that we are aspirants, otherwise, you don't relate to this program. We believe that we are aspirants of Light. Therefore, we have to retribute of what mistakes that we have done. Repent, reorient. Reorientation can be a proposal. Unless there is repentance and a retribute, the reorientation will not happen. As we close our eyes, only we see the thoughts relating to the outer world only, not Light. Therefore, retribution, repentance they are required. Then, align to the Soul once again in the Solstice. It is a fresh opportunity that we align to the Soul again because we enter into Punarvasu, the Sun entering into Punarvasu, please remember. Which happens on solstice time thereafter for about four days, or three days to be more specific. So, stay align between head and heart. Reorient and then, make a pledge. Make a pledge to perform, not with pride but with humility and with gratitude that you are allowed to perform. That you are allowed to perform, for that you have to be grateful and ensure the work of Light and Love.

The last stanza is relevant to us. The other stanzas are one, two, three, four. They represent the story. And again, Solstice comes next year. It always comes. Until the planet is evolved. Until the beings are evolved. That is the beauty of the love and compassion of Divinity which we cannot comprehend. It requires a touch of Sixth Ray along with Second Ray Wisdom. Second and Sixth Ray Wisdom associated with the Seventh Ray, which brings in the rhythm, that will fulfill. Our job is to recollect to ourselves what exactly the Solstice is, first. We perceive it. We conceive it and we get pregnant with the idea so that we move on and make progress. Is not that by the next Capricorn we are all over there, but the effort has to be there. So, the story between Cancer and Capricorn is a great story of the humans and a great story of the planet. There are so many details relating to it. But what is permitted by time and what is relevant for us to do as is given I transmitted to you. I exceeded the time by ten minutes.

This paper is already circulated to you all. You may go through and then get reoriented and reorganize the personality because we feel we are very important in the society and involved in unnecessary activities. Cut them down. Do what is essentially related to Light and move on. It is important that we reorganize. That is why we celebrate before celebration. Celebration is only through meditation here. There is no cake cutting. There are no parties. There are no feasts. The feast is also inside. You can just close your eyes. With every inhalation bring the energies from above downwards. With every exhalation take the energies upwards. That is the whole game. That is the chief key without which the head is disconnected from the body and all that we do tends to be headless programs. Without head what is it that you can do, and head itself cannot do it, can only give you advice. The limbs have to do it. Just a head is no good. Just a body is no good. A head that is connected to the body via the neck has a lot of things to perform. We get into it. There is enough time because according to Master Djwhal Khul, once you touch upon this wisdom, you have 777 incarnations to fulfill. Take your time. Let each one of us work out according to our inclination and move forward. Keep the joy with you when you move. Joy is when you have similar people surrounding you. If there is a group which has similar views, it is more joyful. Travel is always joyful when we are together. That's how groups are conceived. But I live it to your choice, which you do it. What is important is to connect between brow center, because Ajna is not available to us, to the heart center.

We again meet next Saturday to give you some more details in the story of Nala and Damayanti. It is all our story only everywhere in the Scriptures. The male-female principles have to come together internally where there is the relation between the Moon and Sun happening. That's how the game is and the Soul is realized. The whole teaching is about realizing the Soul and the Soul functioning through the personality. Solstice is also a story in relation to it. Take it. Work it out as much as your personality permits you. Talk to your personality. Tell the personality, "Please, give me freedom for

three days, I'll come back to you". Personality is nothing but a part of us only. We only allow it to grow. It has grown so much it has also developed routines. It doesn't listen to us so much. But when we relate to Wisdom, since personality is also an offspring of the Soul, it listens, because in core, it is THAT. In the core it is THAT, around is different.

I am particularly joyful to have addressed you on the Solstice, though we did not travel and we did not meet and made so many arrangements for a seminar. This class is very useful to me, to you, to all those who wish to relate their personality to their Soul and then realign to perform during the next nine months of which you forget about the last quarter. The most important part is the travel from now on till Capricorn, how we perform.

Thank you one and all. Namaskarams.
