

The Song of Fire

A Journey through
Macrocosm and
Microcosm

Circle of Good Will

The text of this presentation is based on the teachings of eternal wisdom as transmitted by the World Teacher Trust, from transcriptions of seminars by Dr. K. Parvathi Kumar.

The pictures are the result of a fiery process, in which they and their author went through fiery transformations:

In 1981, when for the first time meditating on the “Great Invocation”, the author experienced a laser-like downpour of fiery energies continuing for three days and nights (see cover picture).

It was followed by an outflow of a series of fiery pictures over nearly a decade.

Light over the City

The energy caused a profound process of inner re-orientation leading through a series of deep crises.

In 1990 the author stopped painting. In the following the pictures underwent a fiery alchemical process:

For 7 years the paintings “rested”. In 1997 nearly all of them were put to “dissolution”. Though they no longer exist on the physical plane, photos of the pictures were conserved in a book.

6 years later, in 2003, the book was given to a friend for safekeeping .

6 years later, in January 2009, after a short explanation of the fiery experiences by Master Kumar, the author decided to ask the book back.

The pictures were scanned from the photos for this presentation on the occasion of the 100th May Call Day.

Ludger Philips

Dedicated to
Master K. Parvathi Kumar

The music is about the age-old Mantra “Sri Ram”.

“R” is the seed sound of Cosmic Fire.

“Rha” is also known to the American Indians as the Sun God.

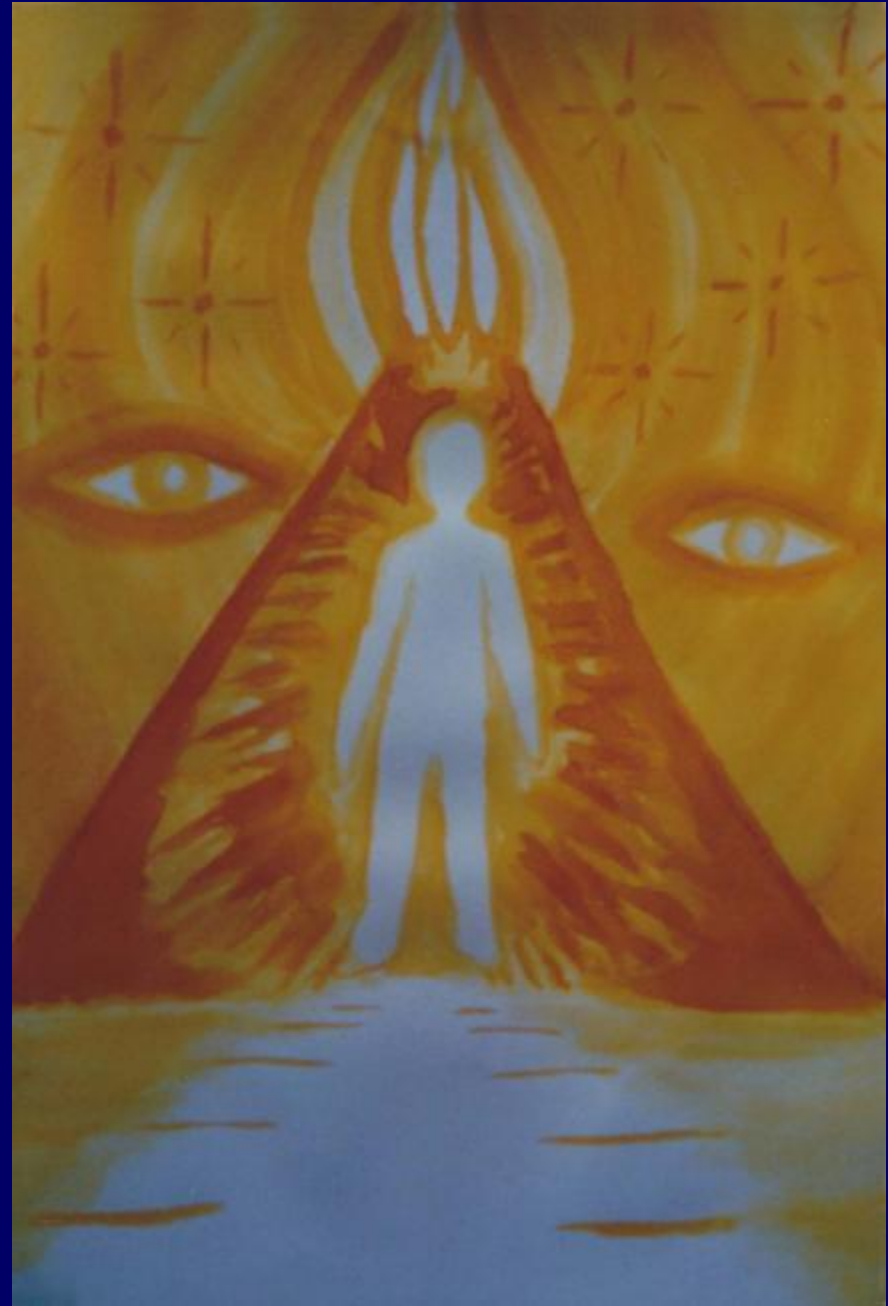

“Rha-Aam” is also the Fire God of the Egyptians.

“Sri” stands for splendour, the divine Nature.

*After: K. Parvathi Kumar,
Mantrams*

When we are
contemplating
cosmic contexts,
our minds open
up and break the
boundaries of
our thought
patterns.

We are lifted up to
something
unlimited and
grand and we bring
something from
that greatness into
routine life.

That's how the
problems of
everyday life seem
to be pettier and
more insignificant.

Egg of Brahma

Before every manifestation, everything exists already in its mere potential.

When a wave becomes potential for creation, it becomes an egg. That is how Nature emerges.

Thereafter there are the *Devas* that are born in the egg.

This is what we call the cosmic egg.

Through a process of fire the devas bring forth the prototype from whom the creation can happen:

From out of the cosmic egg the formation of the Cosmic Person, Purusha happened.

He forms the basis for the rest of creation.

The Cosmic Person

He decided to form himself into creation, as a sacrifice.

The cosmic person is worshipped, fixed on the four-armed cross.

The four-armed cross means:

Visualise the cosmic man right in your own being.

The Logos

The creation having been brought into existence, the Lord works for an alignment between the cosmic centre, the solar centre, the sun globe and the planet.

Each time there is an alignment, there is an enlightenment.

Alignment brings enlightenment.

In man it happens in three steps:

There is the preliminary alignment of the body and senses with mind.

Then there is the alignment of the personality with the soul, and then the alignment of the soul with the cosmic soul or cosmic person.

So we come into alignment with the Cosmic Man.

In the *Purusha* hymn the Cosmic Man is described as having thousands of heads, eyes and feet.

We can meditate the heads of all created beings as the heads of the Lord in different bodies.

We can even visualise the space-globe, the sun-globe and the various planetary globes as well as the atoms as his heads.

In this we can feel the cosmic aspect of his presence in the thousand-petalled lotus of our head centre, the *sahasrara*, the centre with thousand rays.

The ritual of the sacrifice of the Cosmic Man describes the emergence of creation in its involutionary process, on the way from unity to multiplicity:

At the beginning of a creation an impulse comes forth from the eternity of existence.

It divides into the three qualities of Will, Love and Activity, which further subdivide into 7 qualities.

Divine Eye I

7 sounds, 7 colours
and 7 planes of
existence come forth,
which also exist in us
in the 7 centres:

We are made in the
image and likeness of
God.

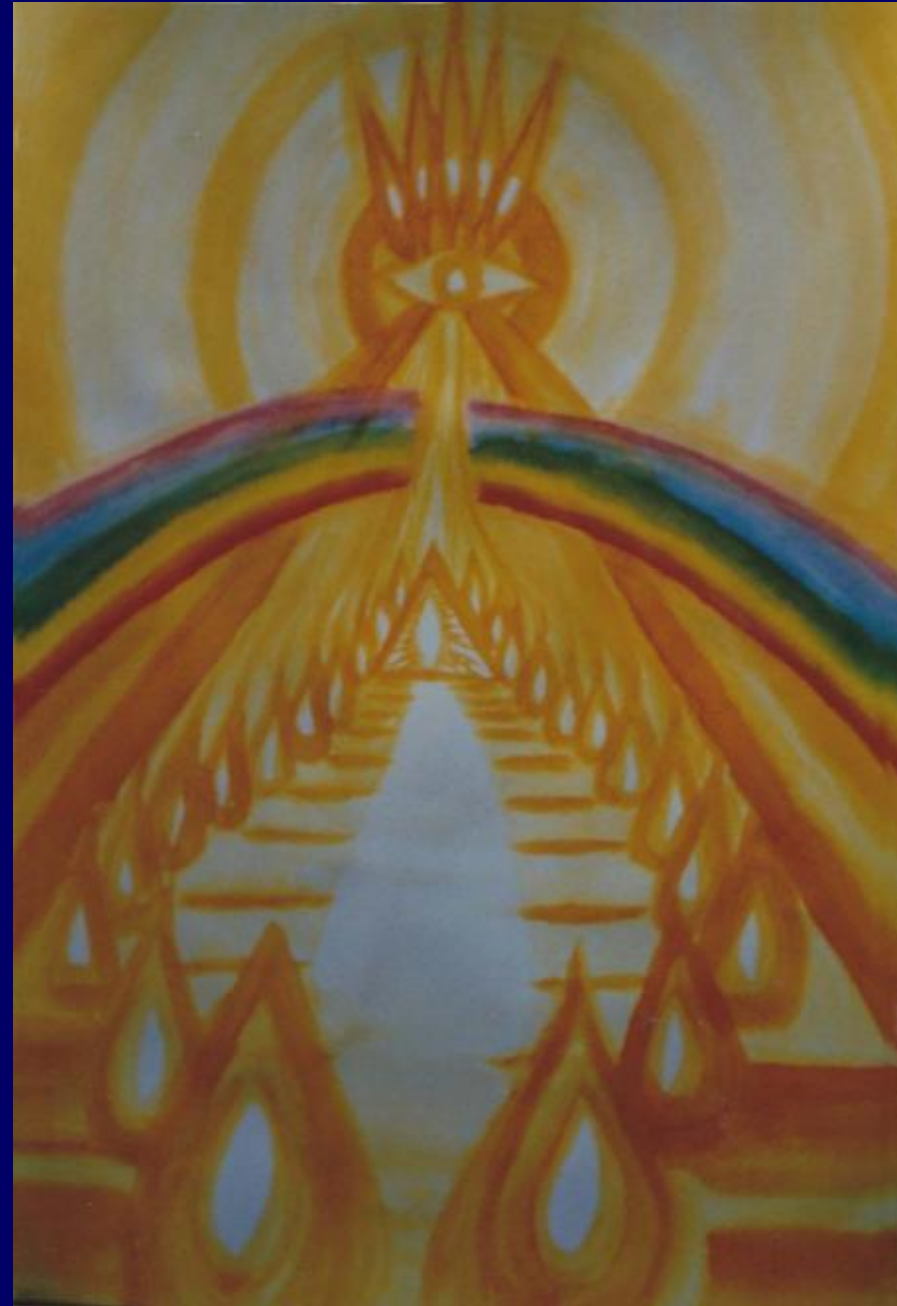

Unfoldment

The one light comes out as the three rays or the three Logoi of the spiritual triad: Cosmic Will, Cosmic Love / Knowledge and Cosmic Activity.

It is being reflected on the ether, the veil of the Mother, the four.

It refracts the light and makes the 7 planes of creation appear like 7 colours of the rainbow.

Thus the one existence manifesting into creation through the trinity becomes fourfold and sevenfold.

There are several groups of intelligences which generate the different stages and layers of creation.

In the scriptures they are referred to as devas, angels, or archangels.

Of them, it is said that they glorify the Lord before his altar.

This means, that these beings confirm the existence of the one Creator.

Choir of Angels

The ancient wisdom knows many groups of devas. Yet, essentially there are three:

Adityas (devas of radiance, which work through the Zodiac signs), *Rudras* (devas of vibration, which destroy obstacles for the sake of progress), and *Vasus* (devas of materialization, which enable the laws of physics).

Angels

All these devas are to be understood as a manifestation of the one Lord, who is the cause of everything.

We should collaborate with the devas.

They help us especially with actions of good will.

Source of Light

Deva means being of light.

There are many of such lights: devas of cosmic, solar, and planetary order.

The sum of all lights in the universe is called *Devi*, the Mother of the World.

Divine Mother IV

The Vedas call her *Aditi*,
the primal light.

She is worshipped as the
feminine energy, because
she is the radiation of
eternal existence.

She is the spiritual
mother of any form and
the bearer of the father.

She is the radiant
expression of the
absolute One.

He is the background out
of which she appears.

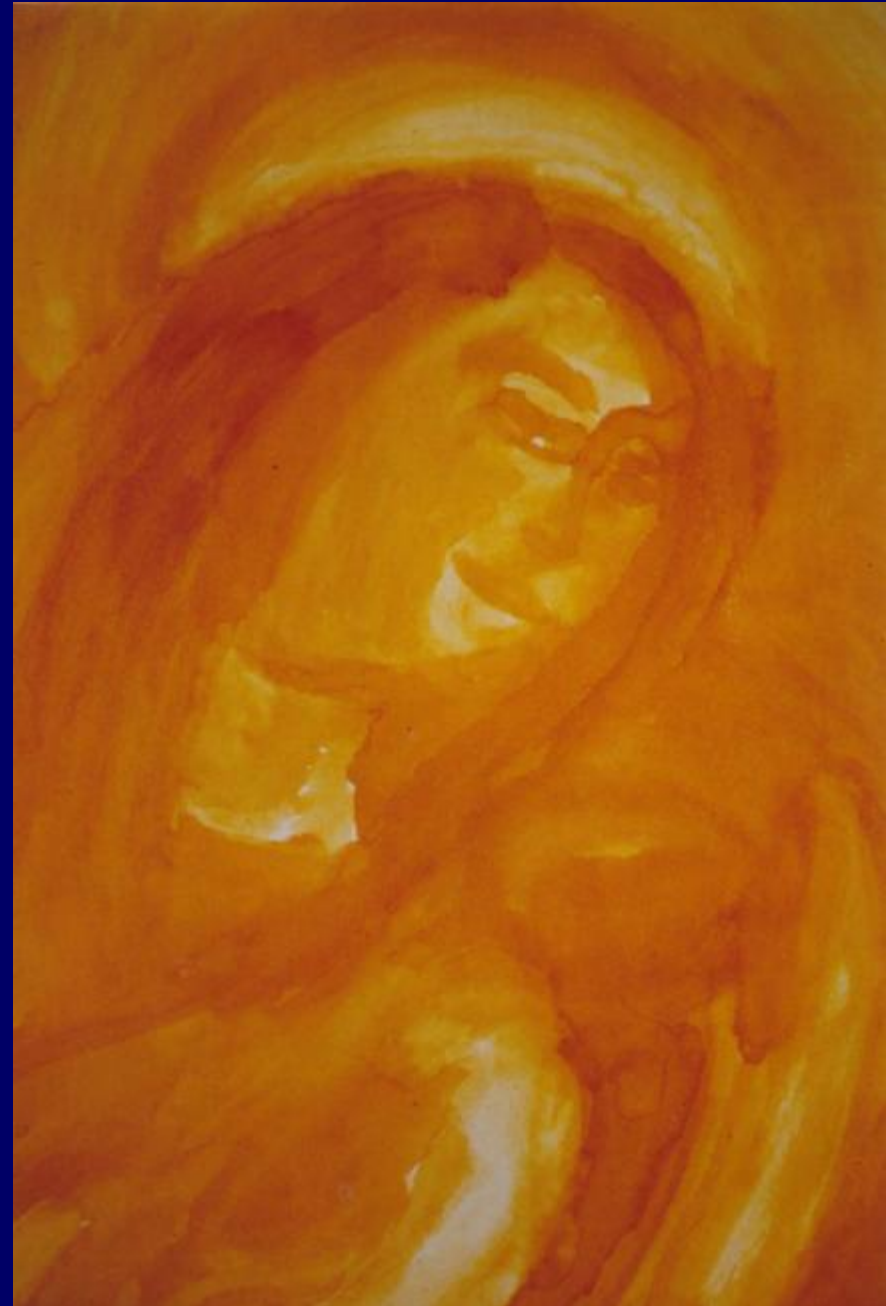

Divine Mother III

The relationship
between nature and
man is like the one
between a mother and
her child.

The mother has given us
the body; she shepherds
and loves the child.

Mother Nature provides
protection and food for
us.

Through our
environment, she
presents us with many
gifts which nourish and
delight us.

Divine Mother VI

Within nature there is no cruelty; she is generous and full of love for her children.

Even pain only shows nature at work:

She aims to protect us, and because she is wise, gives us pain as a sign that we need to take care of a problem and are protected.

Divine Mother V

When we honour the Mother and ask for her blessings, she protects us from dangerous situations.

When we wish for something, she will not fulfil those wishes that will bring problems for us.

She ensures that we only receive the right things and do not go astray and suffer.

Nature draws those to herself who understand and respect her laws; thus, taking us into her arms.

The virginal birth of
God's son is very much
misunderstood.

Every son of God is a
product of virginity.

The path of discipleship
consists of the striving
for inner and outer
purity.

That way we join in
with the Mother's
energies to be able to
become sons of the
virgin.

So a Son of God is born.

Conception – The Mother

The whole creation is based on the interaction of male and female energies.

It is therefore necessary that male and female live together.

There would be a regular exchange of energies and this helps the fulfilment of experience.

The living together in harmony with the spouse would enable adjustments at psychical and physical levels, and the biological needs are satiated on either side.

Marriage Blessing

As man and woman
live in harmony and
health and give birth
to souls, a duty is
well performed.

This is a great
responsibility and a
grand ritual.

When the progeny,
in due course of
time, works for the
welfare in general,
the ritual is fulfilled.

Birth

This micro-cosmic
ritual is part of the
macro-cosmic
ritual of creation.

An embryo repeats
in short all phases
of evolution.

Birth of Christ

Through birth a transformation of consciousness happens, a development of the consciousness existing even before birth.

Wouldn't it already exist before, it couldn't unfold.

Spiritual consciousness is compared with a thread running through the many flowers of a garland.

This means that consciousness exists continuously, even while passing through the different transformations.

Antahkarana

We didn't start our journey only on this planet, but have already passed through the mineral, plant and animal kingdoms on previous incarnations of the earth.

We are on the 4th, the dense physical globe.

We are travellers who have stepped down by 3 steps to the 4th and who will ascend again by 3 further steps.

On this planet we pass through 7 waves of life called root races, and each race again has 7 sub-races with ramifications.

18 million years ago the
Lords of the Flame came
to our planet and they
planted some spiritual
light into man.

Eagle of the Soul

It was part of the Great Plan to stimulate the mind, in order to awaken the awareness of the “I AM” and thus to make man self-conscious.

This crisis of individualisation transformed animal man to a human being.

Forming of the Soul

The Lords of the Flame
had given the knowledge
of good and evil to the
human beings.

The majority misused it
and followed willingly
the left path.

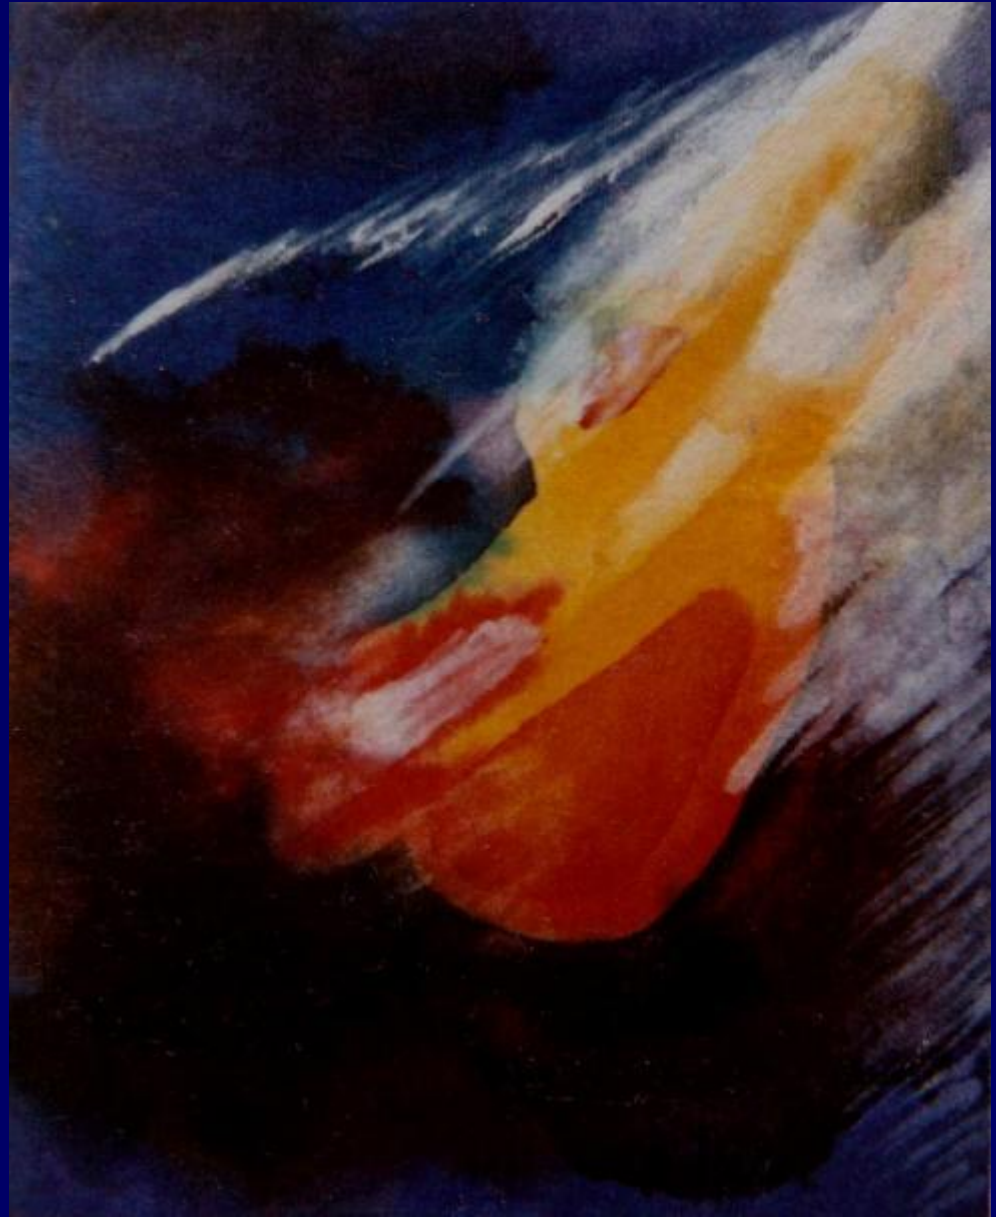

They took to the lower
mind and to the
physical, they evolved
intellectually on the cost
of spirituality.

Over the City

They destroyed
themselves through an
irresponsible use of
power and of the
science of sound.

This resulted in the
submerging of a great
part of humanity.

Light and Darkness

A small group took to the spiritual path of ascent.

They associated themselves with the Spiritual Hierarchy founded by the Lords of the Flame, with the White Island, Shamballa, as its centre.

The White Brotherhood

They connected
through yoga the mind
(manas) with buddhi
and atma and
terminated the cycle of
their terrestrial
experiences.

This path of higher
training always stood
open for mankind.

Path of Light

For those who want to ascend there is the help of the Great Ones who have led the way.

People who are totally material, mental or emotional don't find access to the work of Hierarchy, even if they read a lot about it.

Ascent

We have the choice to adjust ourselves to the Light, the Love and the Life of spiritual nature and use or miss the opportunity.

When we manifest good work, we are an example for others, so that they get inspired also to follow the path.

Wisdom is more taught by being a living example of it than by talking about it.

Shining

The work of today's Hierarchy and the present World Teacher, whom we know as Maitreya or as Christ, already started 5000 years ago.

Lord Krishna introduced him into the office of the World Teacher.

When Krishna left his body, he promised Maitreya that he would give him his constant presence for the fulfilment of the plan on this planet.

Together with six other masters Maitreya organised the Hierarchy we today call “The White Brotherhood”.

He made thus sure that the Wisdom would be kept alive for humanity throughout the dark ages.

The Blessing

When we say that the World Teacher and Spiritual Hierarchy are today externalising, this means that they are entering into the lives of many.

It is a subtle process, that is already going on since long ages, even if we may not realise or recognise him.

Some think that it has only begun now, because they have opened the window to the Light only now.

The Work is far from being sensational.

If we are receptive and acknowledge the fact of the work of Spiritual Hierarchy, we can co-operate consciously.

Hierarchy sees humanity as a unity and therefore doesn't fight against the evil, but tries to bring the ignorant to the path of light.

This is a very difficult work and demands incredible patience, service, silence and sacrifice.

The Enlightened Ones have always demonstrated that they can deal with the same ease with a worker of goodwill as with someone who is working at something evil.

Their love flows towards both of them, even if it can express itself as severity.

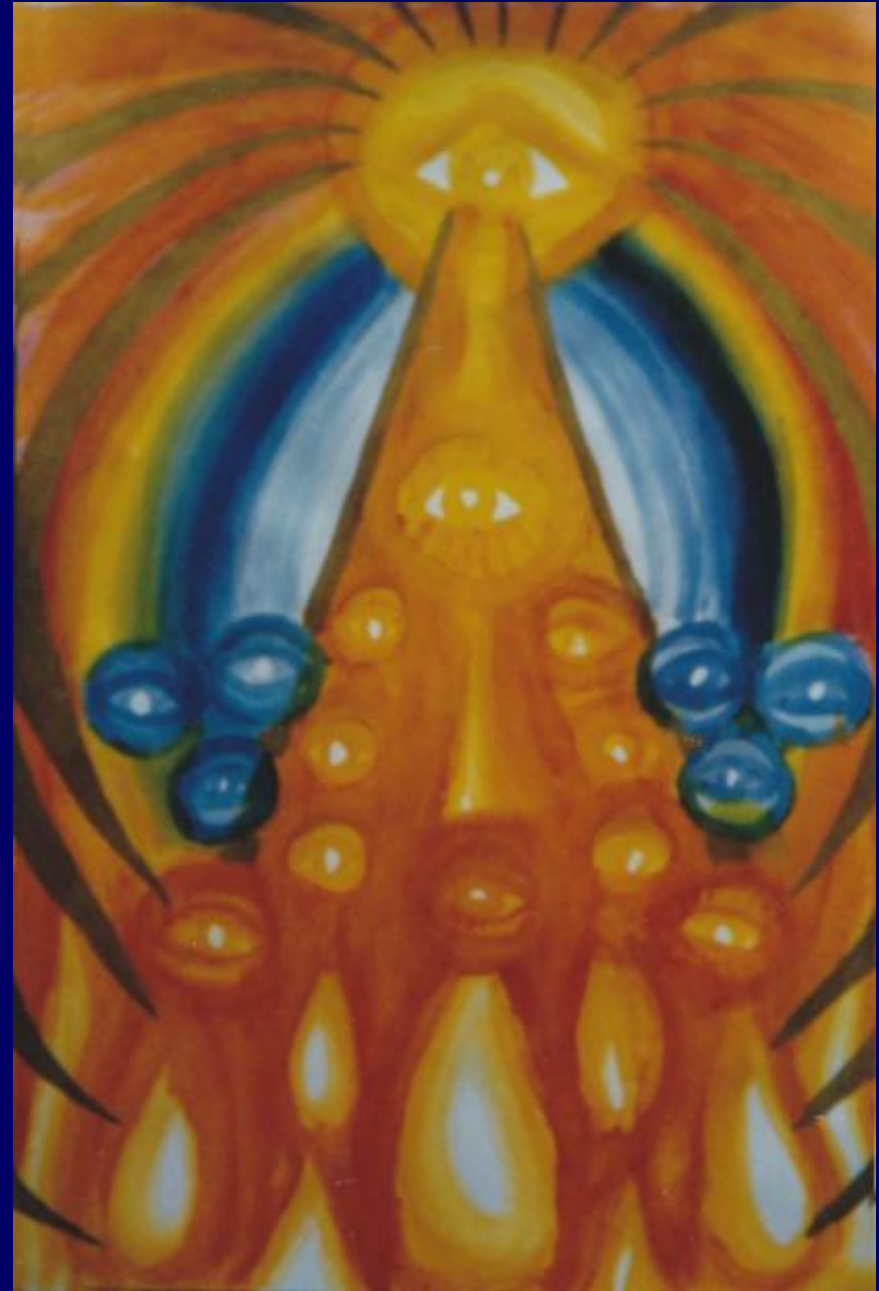

Jesus was friendly and full of compassion towards all, even prostitutes and criminals.

He demonstrated service up to the point of sacrificing himself.

The Plan of the
Spiritual Hierarchy
intends to lead
humanity out of the
blindness of
materialism to a new
understanding of
spiritual wisdom.

Hierarchy decided
that the time is ripe
for man to know more
about them and their
work.

Hierarchy I

They chose certain persons such as Mme Blavatsky, Mme Bailey and others.

They contacted them and sent them out into the world as their messengers.

There were most various reactions on their work, like rejection and prejudices, but also dreamy idealisations or gushing channelling which pretends to be in contact with the highest circles.

So the awakening of humanity went on slowly and was accompanied by many difficulties.

Emanation

The progress of the planet and the planetary beings needed to be stepped up to meet the demands of the Time Plan of our system and to save humanity from disintegration.

To support the work of Hierarchy, the Higher Circles decided to bring in a bigger supply of energy.

From the Highest Origin came an extra-impulse to speed up planetary evolution.

Ray of the Spirit

Master CVV built a bridge to receive the life principle from the Most High, so that an electric current can pour down from the cosmic centre via the planetary centre to man.

Midnight of 31st March 1910 the energies of synthesis entered via Halley's Comet into Master CVV.

The Master later explained that the planetary ether responsible for his future plan of work established cooperation with him on that time.

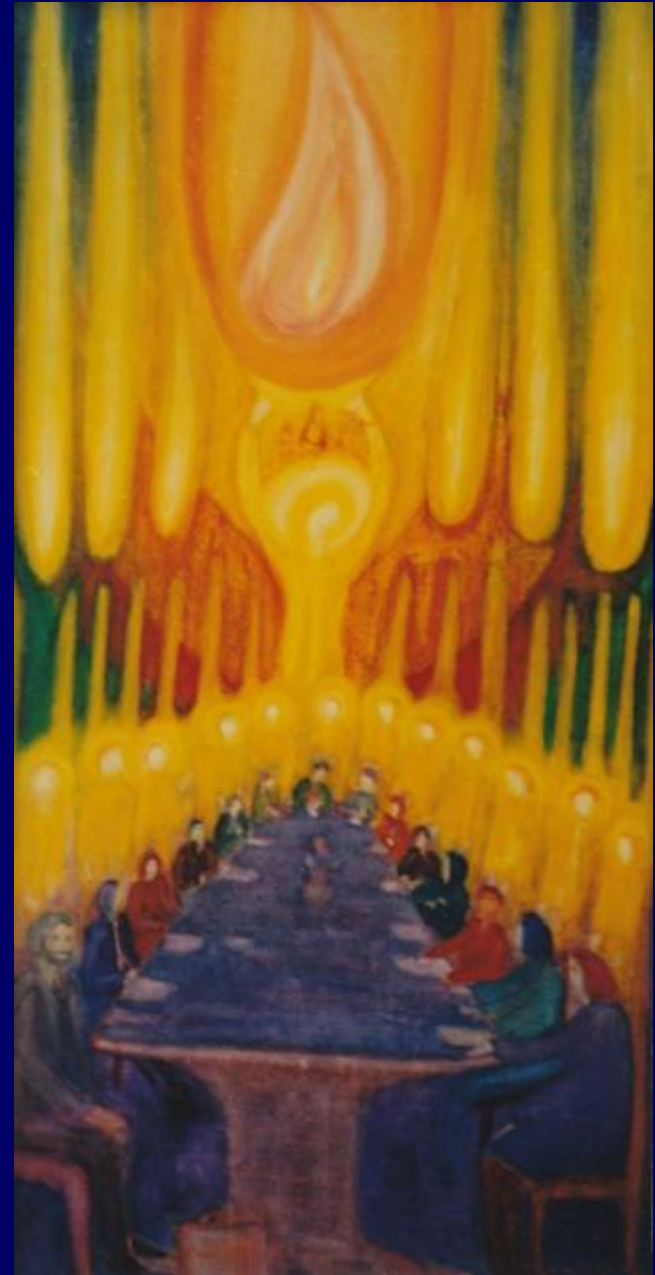

On 29th May 1910 Master CVV opened the gates of initiation to the human consciousness by transmitting the energy of The Master to those invoking the sacred letters C.V.V.

The Master established the three letters as the symbolic sound keys to alert and stimulate the sound vibrations of that portion of the space which corresponds to the magnetic force of the earth.

From that year every 29th May is observed as the day for group initiation.

It is popularly called the "May Call Day".

The Conference

The energy of Synthesis
had a planetary impact of
such a high degree that the
whole earth was shaken.

The results were a speed-
up of evolution, leading to
deep transformations,
breaking up crystallized
forms.

There is a fresh flow to see
that we are revived,
refined and re-aligned.

The entire life on earth
gets faster transformed in
order to attain lighter
forms and more
awareness.

Shaking

The energy of the Avatar of Synthesis has fluxed into our system and the whole world is under its influence.

Thus the souls take faster to a higher rhythm and transcend the fetters of form.

When we invoke the Avatar of Synthesis, we link up and say,

“From the Avatar of Synthesis who is around, let his energy lift up the Earth to the kings of beauty.”

Advent of the Avatar

Tree of Light

This presentation can be spread and used for making the Wisdom Teachings accessible to interested people.
