

“Seminar on Master Jupiter (Sage Agasthya)”

Discourse 2 by Master Kumar Garu on the 16th of June 2011, at Iguazu, Argentina.

Heart Fraternal Greetings and best wishes to all the brothers and sisters gathered here.

Humbly I will present to you the Great Master Jupiter. Master Jupiter belongs to the cosmic plane. He was born from the cosmic energies of Mitra and Varuna. We say this when we utter Mitra Sam Varunaha. They are the supra cosmic energies. One is essence and the other one is cosmic nature but they are both one. When they are one, they are called Brahma.

When an impulse happens for creation, this impulse emerges from the cosmic essence. It develops like the primordial Light just that occurs to us in the morning. Some wake up from the dream. What is happening? We don't know that we exist before we wake up. Our existence occurs before our knowledge and our knowledge comes after our existence. But we only know we exist when we are awake. No one knows the magic of awaking. We think we get up ourselves. We have been awakened. That which wakes us up is the Mother. That which awakens the whole creation is the Mother. Before awakening how it was, no one knows. To say that it was darkness is ignorance. We don't know what it is to be when we are not awakened since we don't know that state. We take it as darkness but it is ABSOLUTE LIGHT from which there is an impulse. If we knew how it is when we are in deep sleep, we can understand God Absolute, Parabrahma – No one can understand it because understanding comes from that Absolute state. When we say we sleep well; it is only by inference, since we really don't know. Our consciousness is absorbed in Existence. No one can talk about something that has happened during sleep. When we come back from sleep we are very refreshed. How is that? No one knows. Between sleep and awakening we can have a dream. In the dream state there is a state of sleep and no sleep, but to not sleep is very difficult. Unless we wake up, there is no knowledge. Who wakes us up? We only thing know is that we have awakened.

If we want to sleep we cannot sleep. At any time we cannot sleep. We are in bed but sleep doesn't come. We want to get up but we can't. Many times we don't even listen to the alarm clock. If we want to sleep, it is out of our hand. If we want to get up when we want, it is not possible. It is said that sleep is in the hands of the mother. If you walk well with Mother Nature, sleep is easy to come and it is easy to get up.

There is Mother Nature in all planes of existence. Mother Nature and pure existence are not separable. Existence is in all planes. Awareness is in all planes. Awareness is in different grades in different planes. Stone is, plant is, animal is, human is, the Planetary Deva is, solar Deva is, Cosmic Deva is. When we say 'is', it means existence. Existence is common to cosmic Deva and to stone, but awareness is different. In the stone, awareness is almost a sleep, but if you see, from the stone to the atom there is great awareness. In the atom of the stone there is awareness. In the plant, awareness is in a dream state, more active than the sleep state. That's why if you touch a plant, it is like someone touching the dream, it is sleeping, you touch and it awakens. A plant can feel the touch but cannot go further than that. In animals, consciousness is more awakened. In

humans it is even more awakened and in Devas is even more awakened. In all planes of existence, existence is the same. The difference is in the degree of awareness. This awareness and existence are always together in all planes. The awareness is different from mundane to super mundane and the other planes, but existence and awareness are always together. When there's no creation, the two become one. Then, we cannot say it's only existence or only awareness. It is both. In the Absolute God there is awareness, and that awareness spurs, it is called impulse. So when the impulse comes, the awareness comes out, as a point, and then becomes huge.

In a small light there is illumination; it is due to electricity. In a big light there are again the two, electricity and its illumination. Illumination depends on the equipment. If it is huge illumination, we call it the Cosmic Sun; it is less, we call it Solar; still less, it is called Planetary, still less, it is human; still less, it is animal and stone even less, but both are always there. Mitra is one, and Varuna is the other. One is Spirit, the other is Primordial Light. It's that light that takes different gradations according to matter. It takes 8 different gradations, 8 different acts of matter happening. In us we have all 8.

The light of the bone is different from the light of the flesh. The light of the skin is different from the light of the flesh. Bone is the hardest matter in us. The light of the eye is the subtlest of matter. Both are light but there is no comparison. The soul light shines through the eyes. The soul is also in the bones but there is a difference in the shine. There are 9 different stones here carrying 9 different lights, but they are all stones. There is one nature with 9 gradations of light. The ninth is called the diamond. The 9th nature is called the Mother. All 8 other natures precipitate from the 9th nature. Existence is called 10. Addition of 9 and 10 makes 19. $19 = 9 + 10$. So Nine with ten is eternal. If 9th is missing, $8 + 10 = 18$. Eighteen becomes 9 ($8 + 1$). This is how it is explained. There are 3 qualities in us and 5 states of matter in us. Five matter states, 3 states of qualities: poise, dynamism, inertia. the 5 states of matter are: akasha, air, fire, water and matter. So, the 5 states of matter, the 3 states of qualities are the creation. The light is presiding over the 8 states of creation. In addition to light, there is existence and its awareness. The products of Cosmic Nature and Cosmic Essence (Existence) build all this creation. Man and woman make the creation of 8 children – like the Cativelli family (laughter), a big family.

Like that, the cosmic nature and the cosmic essence are one as two. When one becomes 2, their interaction makes creation. These 2 are called Mitra and Varuna. The one we call Master Jupiter, in Him, both are together. He is as much with the mother as with the father. That's the beauty of Jupiter. Astrology also speaks of Jupiter as most beneficial planet. If someone knows astrology and sees a chart, the first thing he should see is where Jupiter is. He is the Master. Jupiter gives you material and spiritual splendor, the expansion of awareness toward spirit and matter. IT is the Cosmic Intelligence that can function in both ways, with matter and spirit, with the same ease. That's why He's set to be the yogi of creation; Yogi because he is good with matter, with spirit world, the mundane world, and the super mundane world, with art and sciences and with religions and occultism. Wherever he is, he causes expansion of consciousness. The Puranas praise him that he is almost like Shiva. He's not only Shiva, he is also Vishnu. That is his beauty. He's not limited to any system. Jupiter means no limitation. He is set to be helping all systems, cosmic, solar, planetary and also stays on this planet to help the humans and the planet. It is said to be the grandest of Masters.

The 7 Seers of creation together are said to be equal to Master Jupiter. The evolution of the beings is conducted by the 7 Seers. The Seven Seers exist in the solar, cosmic and planetary systems. Each system has its hierarchy, the planetary one with its 7 Masters, a hierarchy for the solar system, a hierarchy for the cosmic system. It is a chain of hierarchies. But Master Jupiter is one in the cosmic, solar and planetary. It is said to be a chain. He is the grandest who springs into action when there is an emergency. Only for an emergency he moves otherwise he just remains. When the hierarchy and the Devas are unable to work out a crisis then, Master Jupiter steps in. That's why very humorously I say, "He is agent 007", only in an emergency.

I was speaking about the mother who wakes you up and puts you to sleep. It is the will of the Mother if Ruben sleeps a bit more. That is why in India we don't wake people up who sleep more. We cannot put people to sleep. Then why should we awaken them? Sleeping and awakening is not in our hands. Ruben never misses my teachings. The Mother puts him as example. This is how Master Jupiter is called 007, to go back to the theme. Only in emergency he comes into action. There are some emergencies in creation! He is called the non-moving Master. That's why is called Agastya. GA means movement, AGA means no-movement. He is the non-moving one. He does not go to Shambhala. Sanat Kumara goes to visit him. He doesn't go to Himalayas. The Masters in Himalayas go to him. He's generally not moving, except in crisis.

His first interaction with our planet was when the planet was forming. The first formation was the North Pole. Around the North Pole, there was a whirlpool of energy. According to that whirlpool, matter is gathered from all the surroundings. Air, Fire, Water and then it solidified into matter. When the whirlpool is working, the matter was forming around it and it was moving like more and more into upper hemisphere but it was not consolidating into south. It grew like a half cut orange. The circumference was growing beyond proportions. It was not consolidating. This was happening during the 3rd Root Race. Unless the formation of the planet was complete, the formation of beings also could not be completed. During the 3rd Root Race only half planet was formed. Then came the sons of Yoga came who took position of the upper hemisphere. It looked like an umbrella. Who would arrest the growth of the circumference? Then they asked Master Jupiter for help. He came and stood at the circumference. The weight of Master Jupiter has consolidated the circumference to gain the South Pole and form into a ball. The earlier circumference which is now the Equator because of his weight, it has turned into a ball developing the South Pole.

The equator, the first circumference asked, "When will I acquire my past form?" "Until I come back to the North you will be back to your past form", said Master Jupiter and he never came back up to date. The Equator was waiting. Therefore it is said that Master Jupiter is in the Southern Hemisphere of the planet. He never goes north. Shambhala and the Hierarchy don't want him to come to north. They say we will come but you please don't come. If he goes north there would be an imbalance in the planet. Even Sanat Kumara wants to meet Agasthya, Sanat Kumara goes to him. Even Shiva goes to him but he doesn't go to Mount Kailash. Shiva says, "When I want to see Him, I will go where He is but never expect him to come."

Even when Lord Krishna was born, all the seers went to see him but there was no Agastya. Even Lord Krishna, the divine incarnation, the most high, went to see him. Any Master of the Hierarchy who wants to meet Agastya, goes to south. That's why South is so important for all intelligences of the North. Muladhara (Base Centre) is as important as Sahasrara (Head Centre). What is in Sahasrara it is also in Muladhara.

Master lives in the south and remains like a watch dog. People have dogs at home. What do they do? They watch the house and don't allow strangers to pass through. Master Jupiter is the watch dog of the planet. He watches the planets; not only ours, but the planets in our solar system as well. Even in the solar system he is also in the south. The star of Can in the sky is in the south. Sirius is also in the south. Sirius is the watch dog of our solar system. Master Jupiter is at Sirius. Master Jupiter is as much in south of planet as also in the system of Sirius. The South stands for Love. From the south the love comes. Also south is in us in the Heart Center. That's why Sirius is in the south of the solar system. Master is in Sirius is the star called Canopus – What is “can”? “Can” is “dog” in Latin. He watches the beings, he watches the planets, and he watches the solar system; not only just watching but also protecting them so they don't fall from the south. He is also called Cerberus who watches the threshold to hell to make sure that no one falls into infernal worlds.

All that is relating to the dog in the scriptures relates to Master Jupiter. He is called the dog star. Whenever the energy of Master Jupiter is, around that place highly hybrid dogs are born there. If an initiate has the energy of Jupiter, dogs go near him. Domesticating a dog is not spiritual because we don't know how the dog feels; but if it comes on its own to you, don't reject it. Master tries to give you his energies through the dog. Shiridi Sai Baba was an initiate around whom dogs roamed. He didn't want it, they approached him. A dog wanting us is different from us desiring dogs. What's if you love but they don't love you? Don't go after the ones who are not in love with you. Don't run after love, but don't reject to love when it comes to you. Love doesn't mean only sexual love. When people visit you with love, respond to them with love even if it is a stranger visiting you. Respond with love. Through a stranger, the Master visits you. A stranger can be a man, a dog, a donkey. A stranger can visit you as a dove. That would be nice! If a stranger visits you as a snake, don't reject it. It is true! We have developed our own concepts about snakes. If Scorpio visits you, don't show fear. Fear causes problems. When someone visits with love, respond to their needs as best as you can. This is the only deviation of the aspect of dog. When a dog visits you and wants to be with you, even if it is a street dog, don't reject it. You don't know why it has visited you. Offer it food.

So the Master is the watch dog. He watches and protects the planets, the beings in the planet. Staying in South, he protects south, he protects North, the East and the West. He's not judgmental; he protects everyone who comes to him. It is impersonal love. Whoever comes to you, respond to their needs.

I will give you an example of my own life:

I was once studying in the evening and a scorpion of big size sat on my foot. Only when was already on my foot I realized something is on the foot. I realized it was there when I saw it. It was black, a big one. What do you do? I remained, looking at him. He was also looking at me and I was looking at him smiling. He remained a bit there and then, he left. Namaskaram!

When you look at it and it looks at you, he knows your intention. If your intention is to harm, he is faster than you, like an archer. Who shoots first? He doesn't shoot if you don't have an intention to shoot, the same with a snake. My father held a cobra and sang songs of God. The cobra looked at him listening to the song and after a while he would put her on the floor and she would go. That's what I have seen. If you don't hurt it doesn't hurt you. If you constantly receive hurt, receive it and neutralize it. Don't respond. That's how you clean the past, how you neutralize the past karma. In the life of initiates, when they are attacked, they don't attack. That's the law. That's why the watch dog watches and protects. Master enabled the Plan to fulfill itself. Unless the planet is formed, the beings cannot form and unless the beings are formed, the plan of evolution cannot happen. In a half completed building, people cannot meet in it.

That is why even within us, the Master lives in the South, he has no glamour in the head. That's why I spoke of head and stomach in the morning. The stomach has worse press (fame) than the head. He has a bigger room.' Cabeza' (head in Spanish) is 'poquito' (little bit). Stomach is big. He (the Master) believes in being comfortable in the South and never went to north. Ever since the planet formed he just never visited the North. That doesn't mean he doesn't know what happens in the North.

It is the first act of benevolence towards our planet, not because he doesn't want to go to the North, but for his love to the beings. If he moves to north, the planet disappears. Then there is no north and no south. If there is no south, there is no north. There is no north unless there is a south. The name of 'north' arrived only when there is a south. Without south there is no existence of north. Without disciples, there is no Master. Can there be a teacher without student? There can be no father without sons. When one is called a father? Only when there is a son. The same with a mother, otherwise they are only called women. Men and women are there but not all are mothers and fathers. Likewise there is no north without south, so simple. There cannot be a roof without a base. It is a roof in relation to the floor. We cannot say this is a roof unless there is a floor in relation to it. That is how south holds north. Muladhara holds the head. If your spine is broken, you cannot stand. Then, there is no vertical, only horizontal. That is why is important that Master Jupiter remains in the south.

So when that crisis ended, there was another. The waters were more than the land in the planet. What do you do? We live on of the land. There were some Asuras, diabolic ones, who live in the water during the day time. During the night, they come to the land and took away people into waters, to have breakfast, lunch and dinner. In the morning, there were less people on the land. What to do? It was like when we grab our breakfast. After every breakfast what is left in the dining room? Just 'un poquito' (a little bit). There is no juice, no coffee, and no fruit. That is why we don't go to breakfast late because you may not have enough. Like that, the diabolic ones were living in the water and catching sleeping ones; and in the morning they wouldn't find many of

them. The number of people was reducing. But in land there was a solar king, a great initiate. No one could win him on the land. If diabolic ones appeared he could kill them. The diabolic ones were called Kalakeyas. You cannot see them at night because they were as black as darkness. The king was trying to be watchful to catch them, but he couldn't. What to do? They approached Master Jupiter, "this is a crisis, and how do we solve it?" He asked the solar King, "How much time do you need to kill them if you find them?" King replied "I need a few hours". Master Jupiter said, "six hours is OK for you?" The Solar King said yes. Master Jupiter said, "I will drink the whole ocean for six hours. You kill them and then I will return the waters." The king agreed. Master Jupiter did it. He put his hand through the ocean and drank it like we take cola-cola with a straw. There was no water in the sea. The king could see all of them and put them out. The king said, "The work is done". Then Master Jupiter released the waters. It was an act of extreme impossibility. But impossibility doesn't exist for Master Jupiter. If there is a crisis and you approach him, He'll take care of it. That is how he conducted acts of great dimensions.

Who were Master Jupiter's parents? Mitra and Varuna. Then in a way he prefers to be in the south. Then, how does he create the north? In our waters there are diabolic ones. Unless waters in us are pure we suffer from emotions. That is our problem. You may have studied yoga books, given yoga teachings, we may have information about ahimsa, but we are not able to do it. We still kill animals. Is it possible that humanity learns ahimsa? Is it possible humanity gains alignment? We speak about alignment but what we think and what we do are not aligned. We have strong likes and dislikes. They are the Kalakeyas. Our desire and anger are Kalakeyas. Our attachment and aversions are our Kalakeyas. Our pride and prejudice are kalakeyas. We are the Solar Kings because we are Gods and we are supposed to be the kings of our own kingdom. Can we confront our emotions, hatred, desire, anger, illusions and selfishness, pride and prejudice? Are we not suffering from them? Don't we know where the kalakeyas are in us? They are in the waters of our bodies and they are in the waters of our emotions. We have emotions and when we see people are under emotions and we see their faces, we know which emotions people are suffering from. When you suffer from emotions our faces don't look the same. When there is weeping inside you can't smile! Can you smile when you are deeply disappointed, angry, when you have to wait? We are very easily disturbed, 'muy mucho, muchísimo; (very, very, much). It is very easy to disturb people; very easy because people are emotional. Who suffers from our emotions? You do. You are the Solar King. You don't need to have those emotions.

So the Solar King couldn't get rid of the kalakeyas. That is our position. If you are prejudice you can't smile. Why don't we like some people? Smile doesn't come natural when we don't like someone. If you put on a smile then, it is tense smile. 'Preocupación and irritación (worry and irritation) is very common in this civilization; and we say we are very civilized. Our yoga books cannot help us. Sometimes you get irritated when you read books and don't have the right disposition.

Suppose you have stomach ache and I ask you to read "White Magic". Will you read? You tell what white magic. First put some magic to heal my stomach. So you need therefore a teacher who doesn't only teach but who also heals and then teach. Heal the prana and teach the yoga. Do not teach yoga to emotionally sick people. You will add more problems. For a sick person, wisdom teaching causes more sickness and then they will be more abnormal than before. No teacher should teach unless he knows how to heal first. First heal people from emotions,

evaporate the emotional waters and bring back clean waters. That is exactly what Master Jupiter does. He evaporates emotions brings back clean waters. 'Aguas sin kalakeyas' (waters without kalakeyas). 'Aguas sin kalakeyas' bring a lot of comfort. Don't teach yoga to people who suffer from emotions. The slogan of Master Jupiter says, "Heal the sick, teach yoga" like Jesus. Heal the sick and teach the gospel. Don't teach the gospel when people are sick. Sickness is not headache and stomach ache. Diarrhea is not a sickness. The deep sickness is emotion. So attend to emotions and then to simple emotions. This is the way of Master Jupiter.

This is the significance of working with kalakeyas, not only for the planet but for every planetary being and he can do it in a massive way. Everything is massive with Him. No individual initiations. "May he lift up the earth to the kings of beauty." That is the Avatar of Synthesis. That is his work.

Tomorrow I will give other dimensions. Master Jupiter is an enormous dining room. Did I ever tell you that Master CVV always has 16 course lunch? In the name of health people eat a little bit and take pride in it. But Master CVV, he eat daily a 16 course dinner; just an example of Master Jupiter. Master Jupiter was a very grand eater.

So come to class tomorrow after eating a lot. Don't worry about digestion. It will be digested. There is a dimension of eating from Master CVV and Master Jupiter. He doesn't eat delicately. This may be a fashion but it is no good for the body. You have to look full.

Thank you. NAMASKARAM!
