Tuesday, 27 June 2017, Morning

Metam Me...

Hearty fraternal greetings and good wishes to all the brothers and the sisters.

The nature's message is that we have more than 1.5 hs. When things outside are not convenient one should more turn within to find an abode of peace.

Yesterday in the airport Elise told me it is all free, we can do also a walk. It was a pleasant surprise that there was sunlight. I normally make jokes about the weather here, rainy. It was an exception yesterday. I was told in the morning the weather would not be very good, let's see what we will do in the afternoon. When the ambiance is not convenient, we can turn inward. Every person has his psyche. Turning inward can be more pleasant than turning outwards. We have so many specialists here like Maxim who can talk better about it. When conditions are agreeable, acceptable and harmonious, this is sent by nature. Setting up for sleep in the night and being awake during the night, it is an objective life. There is a life into objectivity and one into subjectivity. What is happening in sleep has been... In sleep there is also activity. There is the pulsating activity. There is an intelligence which decides over this activity. Man has always engaged to find out what is it within that pulsates. The intelligence which causes an awakening and a withdrawal. They found a state of beness which nothing disturbs. Both can be presided over. That is why we have two legs of the compass, one is about objective life, another leg is about subjective live and one which decides over the two. It is with and without objectivity. In trying to find out this, so many experiences have been made and many are trying to reach that point. It happened to the east and two the west. The mastery over objective life and consciously entering subjective life has to be done. To understand Nature we have to find out the weather, the planetary combinations and the inner disposition. When the three are in agreement, activity can happen in harmony.

When we were at the breakfast table, our friend Cédric came up with a question about what is happening in the pharmaceutical activity. He was mentioning the hyper-activity of medication, of imposing vaccination upon the people. Man is fully conditioned by the 3rd ray activity of money. This link with money, when it is broken – we live in a state of slavery, anything we do is somehow connected to money. When things are connected to money the whole quality of activity degenerates to business and commerce. It is leading to marketing and selling everything, all is purchased, life is purchased, humans are purchased, everything is seen in terms of money. The predominance of money can only be set to its limits through governments. Government is also based on money consideration. There is predominance even in the minds of the

governance. The policy of government is, if I can see more and more rights. All is oriented to money. Governance is not independent of business orientation; it cannot find its orientation to wisdom. Wisdom shall prevail over governance and governance above all our activity.

Originally when the concept of our life was conceived the king guided the activity in the kingdom. Slowly the king distanced from the wise man on account of the pride within. The business considerations started. From wisdom governance distanced, it was governed by money. In case of wisdom, business was limited only to the optimum distribution of resources. All living beings, mineral, plant, animal and humans were guided. Businessmen became kings, in the West business is ruling; it is for more profit, more profit, there are no other values. What should we do was the question of Cédric. First of all we should withdraw from such activity. To withdraw from an activity which is not in according with life is the first step. The second step is to orient to the promotion of life. It cannot be done by an individual. A change can only be brought about by government. The protection of the subject of the kingdom is primary to the king. Even his life was not important to him. What is royal? Not sitting in palaces. To offer one's life for the well-being of others. There is no other way. The kingly being is one who cares for others' life and comfort more than for his own. If required he would offer his life for the well-being of others. That dimension – the king can be replaced. He can be replaced by a group of persons, be it in communism or capitalism, if they continue with money making process it is governed by money. I have seen so many governing people living in huge mansions. The Americans told me that it is the people in government. When governance is subservient to wisdom everything can be well. A wisdom to be in harmony and to be supportive to the environment is the way, to find harmony first in ourselves and then make a little contribution to society. There is a fond hope that the government places are occupied by men of goodwill. If it happened by change, they were eliminated. It happened in South America, it happened in Vatican. When men do not do well, above all Nature is the most intelligent and Nature can make adjustments. Atlantis was neatly adjusted. The waters came and then Atlantis ceased to be. And those who were in Atlantis are no others than we are. We carry the same tendencies. We keep on doing the same wars here. Atlantis submerged into water and all the souls again found different places in the world and again we developed such warhead that we can destroy everything in a few seconds. It is but natural that we come back with the same values. A small part of humanity is oriented to wisdom to find the needed harmony. When harmony can be distributed to the society it is fine, if not, it will be set right.

If there is a contribution to life, it is noticed by nature. It comes back through the law of karma, what we contribute to the surroundings. It comes back through the law of cyclical effect. Individual efforts cannot change the global situation. This is what I wanted to share with you all. I wanted to open it to a dialogue session.

The Western initiates when they found that time was not ripe for their activity they withdrew and opened some flower garden and advised people who came to them.

Q: You spoke in Argentina, if you could give advice to (partnership)? (?)

A: It was given in a seminar in Argentina in 1992 and 1999. The pregnancy is a noble thought. Why we see that not much can be rectified? There is a plan and on the paper you can make many changes easily. When it is built to make changes is possible but difficult. When a wall has been built you have to think of the foundations, and the efforts to change are high. When the soul incarnates a lot can be done to give a harmonious psyche and even give adjustments to the psyche. When the child is born some suggestions about right colours, right ambiance, harmonious energy. At the seed level things can be brought to harmony in an easy manner. At the seed level to think of making certain psychical adjustments is possible as it is known in the wisdom. The very marriage shall be on the basis of agreeability of the energies of wife and husband, more important than the liking. When harmony prevails it is joyful. The first is harmony, a little conflict is joyful. For a companionship don't go by liking. Each person can be evaluated but what is there to see, what is the potential for future manifestation? That cannot be seen with the objective mind. That is why the wisdom says, try to know what is there three generations before. What is the fathers, the grandfathers and the great-grandfathers? What is their attitude, their diseases? Certain things are possible to know by interaction. To ask what is your father, grandfather, and if possible the great-grandparents are doing? That would give us a good idea of what kind of psyche prevailed in about 200 years and how it

adapted to changing lifestyles. That should be given great importance to. What was the case with the grandfathers should be given great importance. What was there?

Souls are basically attracted by the qualities of the families. The souls should see that what is agreeable to them. There are habits? That agreeable condition is not... There is not someone guiding the whole system but the agreeabilities of the likes and dislikes. Whatever are the strong likes, into those ideas the souls are attracted. When we know the way of life what they have done and what they have liked.

The objective life is one dimension. The other tool is astrology. It gives us insight into the compatibility of the man and the woman. The third dimension is frequent encounters with the boy or girl would give you the impression of his way. First everyone would show the brighter side, the other side shows up when one lives together. The other side is normally not seen by superficially looking at each other. We see a little agreeable part and when we live together the unseen part manifests slowly. A deer-like face and a crocodile-like body. It is always better to go by the astrological constellation and agreeability with the family tradition. Properties of the family might not come to you but diseases might come to you. There might hypertensions and heart problems. These are all the points to be considered. Your children would get the sicknesses; it remains in psyche, the unmanifest sicknesses. On the basis of this information the joining should be there. If you meet on a harmonious ground a conflict here and there is no problem. The whole idea of the humans proffering bodies is to help an incarnation soul; it would give a right equipment to the souls. It is a great service. Any amount of education is not equal to what you provide as harmony by giving the right situation. If a couple is not very harmonious there can be times which are horrible. Conception should only be there when there is harmony, not in frustration, meaning, whatever energies we carry at the point of conception. The souls bring their own qualities by which we can direct it in the early stages.

There is a story where a diabolic was conceived, he was so powerful and evil. People feared that he would be very destructive, they thought to put the lady to death but a wise man does not do a vile thing to put a pregnant woman to death. You are much more diabolic than the diabolic, he said, "I will approach the diabolic and to the lady and start giving teachings to the lady and thus to the diabolic." So he started giving teachings to the lady. And thus, the incoming being was also interested in the wisdom. The pregnant lady and also the child in the womb were deeply interested in the teachings. He was totally different than the traces of the father.

If we give the right instructions to the pregnant woman, much can be done to the soul. The soul in the womb became a great devotee and disciple. During pregnancy it is recommended that the women relate to harmonious conditions, eat food that is harmonious and read stories which give inspiration and be in a peaceful condition.

If the pregnancy is a harmonious planetary conditions, if Jupiter's house is in Sagittarius and Saturn is leaving Sagittarius, it is a much better situation. You can see at the point of conception the planetary constellations, much more than at the point of birth. There can be tremendous work on the influences. Saturn in Capricorn is a much better situation. For Jupiter Libra is also compatible but much more so in Sagittarius. Sun can be in any of the 12 houses; these are fast moving planetary influences. Positive and negative node are also important. These constellations are also important for pregnancy. First harmonious relation between man and woman, then harmonious constellation, third, after conception, as far as possible to move in harmonious ambiance and clear the situations at home. The conditions are not only for the lady but also to the man because the solar principle remains with the father and the lunar principle remains with the mother up to the incarnation. The 7th month, the solar principle remains with the father, then the soul goes into a state of repentance, what he has done in the previous incarnation, what he shall do in the future. In pregnancy 7th to 9th month are considered very important. There is a complete form in the womb until it comes out. There the conditions should be very harmonious. From 7th month onward she should not be with anxiety, conflicts as it is with the father. Normally the lady moves to the house of the mother for this time. This time is considered most important time, and mother takes care where most harmony can be provided.

Then comes the next step. In the West you are getting back to be in a very harmonious situation for birth, you even don't want to go to hospitals, that is very good. In the East it is changing other way round. Now in the East it is mostly used scissors to get the child out, it is all convenience to the doctors, not to the souls. In the past it could be born in the early morning hours or the late hours; today it is manipulated to be in the times convenient to the doctors.

There was a case where during the last 3 months of pregnancy and fear came through encountering a snake. The child was always having a great fear of snake and he had to be treated by homoeopathy. As far as possible, relate to birds, sky, to harmonious music during the last months of pregnancy. Music is very important. Visiting a serene stream, walking in green meadows. A pregnant woman is preparing for an incarnating soul; better not be in stressful work. One has to be physically little active. Many don't have the strength to deliver well.

Firstly it is the qualities of man and woman coming together, then diet, then living in harmonious conditions. Then what best can be given to an incarnating soul? When Arjuna's wife was pregnant, Krishna taught all kinds of fighting skills to the woman because he (the child) knew that he would participate in the war. There are young women who engage in mathematics etc. to have the faculties to do well for the child. If you impress what is very divine you impress what is coming. What you think is best the related benefit will come.

Q: ...What is present?

Present is the fruit of the past. Present is what brings to future. Our present thoughts bring the future. The present is the result of the past and it decides the future. What we carry with us are the past traits. If there is situation where you get a good education we have the benefit. If the situation comes the same reaction comes but there is another thought from education that you build up strength and by the time a decision comes you take to another direction. Whatever is the action brings the consequence. If you get angry very easily, if you introspect and see consequences on thoughtful utterances, this dimension in due course of time brings other consequences. Instead of being pushed into a direction in a particular situation you develop another will dimension which by time would bring another strength and you can go into another direction. Likewise with envy, anger. When you know that you are not supposed to be like that but you are doing like that; if you think, next time I shall do better it will be better next time. At all time we have free will, it is influenced by the past. When you frequently don't let this tendency in, it changes. Everyone has some positive traits; to get more into positive strength will get these traits in.

We have to be alert. We have self-consciousness, the animals don't have. If an animal comes and we throw a stick it will come and again it will come. It is only by frequent memory we can change the animal but not by self-consciousness. Talking to oneself is important. It is as per how you set the sail. The beauty of man is, he can be a beast or a saint, it is how man sets his will. It is important that every day you talk to yourself, it is a kind of self-dialoguing: What have you done, what is it that you wish you do? How are you routing to your goal? Ayurveda suggests that each day you set half an hour for yourself and also with your life partner for half an hour. Then you set the sail on a daily basis.

Q: How can we contribute to a healthy health system in Europe? ...

A: It is the kali situation - before it was orienting to the sun and the planets in us. Depending upon the planetary constellations they used to orient to the life, to the sun sign, the moon constellation. Then imagine them in your own system. Visualise Jupiter in your navel, think of Jupiter; Jupiter in Libra as your ascending sign. Basically the birth planet, the transit planets and the ideal places of the planet in your constitution: Jupiter in Sahasrara, Sun in Ajna, Mercury in throat, Venus in heart, Moon in navel, Mars at genitals, Saturn in Muladhara. First contemplation is, ideal position, then the birth constellation, then the 3rd dimension; relate to the transit planets, what you are to do now. What is the idea what you are to do now and what the planets are doing now. You relate to the moon cycles and the angles. As a matter of alignment, you relate to them best in the night. Then go by nature and do not disturb nature. In olden times they did not cultivate the land; it was seen as violation of the land. The Celts did the cultivation. In olden times they were relating to the planets, the sun and moon constellations and their relations to each other. The changes of the Sun and Moon form one sign to the other.

With the birth of Kali religion all these relations were disturbed, so it was lost. Through astrology we are getting back to all this. Today an average student should relate to the chart where the Sun and Moon is. They are the luminaries, soul and mind. If they are in a harmonious relation you have a harmonious relation. Sun is now in Cancer, Moon is in Leo. Leo moon, what are the relations? That is how you are slowly brought back to this wisdom.

Then the people should more relate to the patterns of light than of the earth. The astrology is the science of light. The beauty of earth is that it always impregnates the energies of the sun and of the 27 constellations. It impresses the energies upon earth. The more and more we relate to the planets, the sun and the 27 constellations then we are getting back to the olden ways.

People in the West are much more open to this. Here is the very sacred place of ... church. They selected high places. They don't have mountains. Even on the way from Brussels to here there are high places. I many times visited the cathedral. It is all karma, you build more faith upon wisdom, it comes back. That is how it is in Jerusalem. Upon the birthplace of Jesus there is a mosque (church?). Upon the birthplace of Rama, there is (mosque?)... This is the influence of Kali.

You should know everything upon yourself before applying it upon others. See the three previous generations. If your father is adopted, the grandfather is adopted, in him the trace of his predecessors is there. If you make a deeper study of you you can find out the influence of the 3 previous incarnations and it will influence the 3 succeeding incarnations. They all influence. Our influence goes into our children, grandchildren and great-grandchildren. We need to change our psyche. We come with a certain stock. If we change, that is seen as a great service.

Q: If you don't have children?

A: It is ok, then you don't have that responsibility in this life and you will have other work to do. I told my sister who does not have children. You are a school teacher, so you influence so many children.

Q: When I see the cause of a disturbance in me, do I look more to the mother's line?

A: It is wholesome to look to both lines. Major genes come from the mother as well. You look for your father, his father, his father, your mother, her mother and her mother.

Q: People who have disturbances of solar and lunar energies?

A: By appropriate use of homoeo potencies of gold and silver right changes of mind and consciousness can be done. Argentum nitricum and aurum metallicum contain the potentials to bring balance. (

Q: I am not a homoeopath, I cannot give medicine.

A: You can give the touch of gold or silver and recommend to drink water from a silver cup. Golden and silver colour you can supply. They have glass vases with a golden colour where the sun reflects. During moonlight put the water into silver colour.

There is aquamarine colour for lunar colour.

Q: What happens when the father is not the father.

A: We do not do anything for others but for us. Father was only the means through which you came. The energy of father could be a hindrance but by virtue of your father you can change. Don't play with your father. If your father is not your father, don't make yourself dependent from it. According to your magnetism you have drawn situations, by your own qualities. Always see fortunate, don't see yourself unfortunate. Accept what is and make the best of it. Wind not always comes from what you think as favourable but set your sail accordingly, it is your free will. Some are born in rich families, some in poor. We are essentially spiritual, the soul is spirit. The more you draw from within yourself, the more you transform. Impediments I would have but the more I draw the will from within. Third ray impregnated with second and first rays. If you want morning coffee how much will do you set active to get it? That should be your will to obtain what you feel.

Q: Can you explain some things about Master EK in Belgium.

A: I came to Europe since 1981. In all this time he spent most time in Belgium, he was nearly in every town and village. It is good that it surfaces in you. Whenever I come to Belgium it naturally comes to me by memory but it's coming to you is on account of your susceptibility of the psyche. I was three times with him in Belgium; from everywhere there came requests to him.

There was a second part of the question of Cecilia which was not answered

Q: ...

A: As far as the higher beings are concerned, they are neither of the past nor of the future but they are eternal. Once you have touched the basis of the very existence in that existence there is concurrent projection into the past and into the future. Until one touches this state in Samadhi, meaning it is a state of total association with eternal existence, this existence is what we call the Father, and awareness is the Mother. When the Mother touches the Father, when our consciousness is active, it gets a proposal and becomes active. It is generally engaged in the proposals. Wisdom itself has emerged from existence, when it gets back; it is like a still water surface. Consciousness is normally ever changing. When it becomes like a still water lake, it is in itself absorbed into existence. In this absorption it is neither past nor future but eternal presence; that can be experienced. That is how the past affects our presence and the future was the question. The pure consciousness which does no longer relate to objective creation is in a state of stability. Like a still water state, it is not only in the past but also in the future. Those who are in this state are with what is in the future. When we experience this state it is a state of consciousness which relates to existence, eternity; in that state the happenings of the future and also the past. It is neither past nor future, what is being uttered forth is coming in the future.

There are many earths. Recently there is a confirmation by science. Wisdom speaks of 144 earths. It is not opening of future; it is all in the presence. We are not capable to meet the high beings but they chose to contact us on our level. We should choose to join them. That is what we say in Purusha Sukta: Yat Purusham ... Purusha is as much past as it is future. When we touch this state we are in a state like was Noah. 1999 was seen as doomsday, those who see don't speak, they don't want cause commotion. The progenitors - Kasyapa, he is one of the Prajapatis - they are the source for the birth of a solar system. Prajapati Kasyapa gave birth to the flying and crawling beings, the solar beings and the diabolic beings, the serpents and the eagles. He is the most active Prajapati and he gave birth to all these. He is called the onlooker, the all-seeking eye. He is also compared to Avalokiteshvara, but he is a cosmic being. We are beings who see from within to without. If we gain the ability to go within, we are said to join the father Kasyapa. The core, the essence of our being, there is Kasyapa. From him the beings came out.

Q: Could you please speak a bit about Pluto and Saturn. For me it is a bit difficult.... I try to work with astrology but astrology gives me more fears than before.

A: Saturn visits all, Pluto also. The lesson of Saturn and Pluto is, learn to accept which is not acceptable to us. Acceptance is to include what we do not want in our system. We try to solve it, overcome it and even avoid it. All these alternatives don't work with Saturn; the only way is to accept the non-acceptable situations. It rounds up our psyche. Therefore Saturn is considered as very beneficial. Normally there are certain non-acceptable things for our psyche. The only way is to accept, then you are able to grow. As much non-acceptability is there, we have to learn to accept. Saturn teaches it every now and then, not only when he transits your Mars, Sun and Moon. Every 7 years he conjunct, opposes or squares. Therefore, from time to time in life we come to disagreeable situations in our life. First of all we have to see how we can assimilate. When the ground is levelled, it is found acceptable. Acceptability and non-acceptability is an up and down. If you do not run after acceptable things and do not avoid non-acceptable things, is the way. What is non-acceptable comes. This is a dimension. All that we wish does not come to us. It is an aspect of life. To accept what is not acceptable to us is what Saturn teaches to us.

The weather would not change for us. This kind of understanding enables us to reach a level in our psyche. When Saturn is approaching, know that you are getting into that period where you have to accept what is not really acceptable to us. We have not only to eat what is sweet but also what is bitter. How should I assimilate better should be the attitude. There is a levelled ground which astrology gives us: "It is ok with me." If you develop that way, Saturn is not so hard with you.

Pluto is the greater dimension of Saturn, he is the grandfather. Pluto, Saturn and even Moon bring from time to time experience which is not acceptable to you. If you accept you become a rounded-up being and a weather-proof person, meaning be it summer, be it winter, nothing affects you. Life offers much greater variety. If you have neutralised enough, you are a rounded-up personality. Take the period of Pluto or Saturn as a period of adaptation. Sickness comes, if we want or not. We make the needed changes in our patterns of living. Sickness is seen as a message to change. When we take it up, then the sickness lets us adapt. Saturn, Pluto, when they come they tell us, "We come to change you for the better." Children would

like to play but not to study. A time comes where it is compulsory to study. We should accept the series of events Saturn and Pluto bring to us. Accept it; take a positive attitude to Saturn and Pluto. When you know that in that path there is a lot of discipline, you take up to the discipline. In the first and second round Saturn teaches us to adapt, in the third round you have learnt.

Q: 2000 years ago Christ taught us the message of Love, the understanding of this principle has not much been absorbed by humanity. Brotherhood and Love is not much there.

A: The Love Jesus Christ spoke about is not what we think of Love. The Love of Christ is the Love of the One. If you know that it is one Father in the form of many fathers. Jesus Christ realised the Father in him, therefore he could see the brother in all other beings, he saw no other because all have come from the one Father. Love generates as a natural dimension. Anything I see is but a manifestation of THAT. You are also a manifestation of THAT. Then you see the natural brotherhood. If you don't see the common source, you see others and not brothers. Love comes from experiencing the energy of pure love and no hatred. If we like and dislike, this change of like and dislike makes the love be forgotten. He did not say that he is the only Son of God because he knows that there are many Sons of God and he wants all others be sons of God. Jesus spoke about Love. That was possible because he saw only unity. Those whom we love are those whom we hate later. We hate those whom we have loved earlier. The true Love is to see the One Light in all. Same light, different light enveloped. The envelopes are different. Inside it is the same light in the cerebro-spinal column. If you don't see the light, it leads to different ways of seeing and the related violence. It is the absence of seeing the light. When we see it we walk into the true love. The other love is based upon the mind, it is based on like and dislike, not when associated with the One Light. Each one of us has to work it out in us.

Agreeability comes from seeing the unity. If you think it is not your child you immediately throw it out because you feel it is not yours. You don't love it as much as yours. It cannot happen to humanity as a whole but it happens to the individual level. It can happen on the groupal level because we are in Aquarian age. The one who is out of 10th standard gets to another school. The whole humanity means, relating to the 1st standard. Then comes the 2nd standard.

There would always be wars on the planet because there are people with a lesser understanding; they tend to disagree more than to agree. One time Christianity conquered through sword; then a younger brother came trying to conquer. Now Christianity is more with love but the younger brother came. If you go another 50 years there will be another understanding. People with a lesser understanding keep on fighting. Jesus said, Father forgive because they do not understand. To love all is an ideal; it is a difference in understanding. In our lives in childhood it was another state, then we became adult, and then in old age. There are great stages, and there are people who take to another step of life.

Q: When you leave the consciousness of duality can you continue growing?

A: Yes, from duality to unity, from unity to eternity. The Masters of wisdom are in eternal unity, they don't get into duality. When you are in eternity you can see into the past and the future. When our consciousness associates with existence, it happens to us.

Q: Many people grow very old and they don't know what to do...What is the meaning of that stage of life?

A: ... Matter dominates force, also consciousness, that path has to be reversed. We should ensure that our consciousness is kept very alert; we should better lose the body than the consciousness. When there is no choice of consciousness to the form, we get (stuck to the form). The entire orientation throughout life is to the form side and not to the consciousness side. We feel our body, the body grows stronger, the consciousness gets absorbed into matter. Orient more to consciousness aspect and light aspect but not to form aspect. From 49th year, gradually orient your attention away from form to light. We have to shift our emphasis upon consciousness and not on the form, not looking so much to the mirror but to the consciousness. Everywhere the form gets hanging down, here, here and here. To keep the form intact is ok to 49 years, thereafter see that the light aspect in you is well. If you are oriented to the deforming form, more the consciousness gets absorbed into the form of the form. Only bones remain strong, consciousness goes away. The form we will anyhow leave. If with 70 we look still much to the form, face-lifting... A member in our group did 3 times cosmetics to his face, I told him he could fine-tune his brain in

that time instead of fine-tuning his body; it is a losing game. Form is an offshoot of the consciousness. More and more people have difficulties to depart from the body because the people get stuck to the body. He cannot recognise the life partner and the children and he eats all the time. The wisdom emphasises to switch the emphasis to the side of light instead of to the side of form. Otherwise the situation grows more and more.

Inform people that they don't are bodies but they are units of consciousness. This information should not be given to all but to those who seek it, to others a way could be given how to leave the body.

Q: About depression

A.: The tool we call the sound is asked in the West. Light is just the manifestation of sound. We can help the people to orient to the orange colour and we can give them the sound of Ram. Giving sound in the West is not easy, therefore we restrict to colour. For example orange colour... We cannot give RAM to the West because it is the sound of fire, therefore we give the orange and golden colour, this will help. If we also give the sound it will be complete. Associate with the sunrise and sunset hours when the colour is golden. Also the sun sign. If no one is understanding one's problems he gets into depression. In India we keep them engaged, bring them to movies, mountains. Number one. Then teach them the effect of colours and sounds. This is not everyone's cup of tea. Thank you.

In the afternoon the group did a walk with the Master.

After evening prayer, there was the blessing of children:

"We bless the born children with an intent, the intent that they should find the purpose for which they have been born. The blessing of the children by the group is to make the children recollect the purpose for which they have been born. Many of us would not have recollected the purpose of life. It should not happen with the children. Not knowing the purpose of life we move for long years into different ways but if we know for what we are born we can straight away realise and work for it.

In ancient times the purpose was taught from the teacher and the information was taught by relating to a fire people were lighting. In all system there was the fire worship and also the sun worship. The worship is to recollect the purpose for which you are born. When children arrive into the world we wish them to recollect the very purpose for which they are born. They are also introduced to sun worship and fire worship so that one fine day they would recollect the very purpose. So they remembered it very early. The initiates recollected the purpose very early. Once it is recollected the journey is again a straight work. Otherwise they go into many sideways and the child is lost. Therefore whenever groups meet a blessing of children is arranged. You may put one or two grains on the child and on the parents and also some good wishes."
