Hearty fraternal greetings and good wishes to all the brothers and sisters who relate to the teaching in the context of the Initiation Day, which we call Master May Call. This is the 112th May Call. During the last two talks, I spoke of 14 to 15 dimensions relating to the work of the Master. Abundant and unlimited are the dimensions of the Master. As he graces his presence, we keep speaking of a few things. The purpose of relating or narrating the dimensions of the Master is only to gain his presence and it is the presence that causes the alchemical changes. It is not the concepts since we are few months, we are generally mentally oriented beings. Since mind requires some concepts, the concepts relating to the work of the Master and we orient, the presence comes and the presence permeates all over. A dimension relating to the Master's work is "Prana treat and Yoga Teach". He addresses our prana. He addresses our awareness. The awareness is in all planes up to the Sahasrara and beyond; so also, the prana. It exists at the planetary, solar and cosmic levels. A soul is but a composite unit of awareness principle and life principle, which they support each other. There is the thread of life. There is the thread of awareness. They go hand in hand. The awareness conducts the activity to fulfill itself and the Light activity supports it. At man's level, when divisions take place, when awareness is not so much aware of life, the life principle is neglected. Therefore, the life principle debilitates, devitalizes, enabling sicknesses to happen. To restore the life of a disciple is also a work that every Master of Wisdom undertakes upon. He makes sure that the thread of life is not excessively disturbed due to the activity coming from the thread of awareness. Therefore, he uses discipline by

which, we relate to prana and in crisis, he himself ensures that the prana is restored in a disciple in so far as that disciple is still working upon improving his awareness causing expansions to his consciousness, which is expressed as a work of goodwill in the society. The Master not only causes expansion of awareness and also our comprehension, but also from time to time, addresses upon the life. Master CVV as Master of Cosmic Pranic Principle, has a part of program relating to his work because he saw that the aspirants, many of them, frequently die prematurely; meaning they don't live their full life. To live full life enables him to cause successive expansion to his consciousness. For that, the support of life is required. Those who are working for expansion of the Soul consciousness and trying to take hold over their personality. When the aspirants are bent upon a progressive way by which they join the work of the Hierarchy and gain the status of immortality, such people are not allowed to collapse half the way. Therefore, the Master in his program of enabling every soul to experience the Brahman, he also ensures that life is restored from time to time in all those who are working upon themselves, for their own growth, which is expressed as utility and service to the surroundings. It is not for all who are selfish and self-centered. It is for those who deeply intend to live for others benefit. That is why Master CVV, he had a program, he has a program, by which he very mysteriously ensures life in those whom he thinks there is further utility. He will not let the mediums, whom we call mediums. He says that they are all mediums to Brahman. "We have all come from Brahman and therefore we are all Brahmins", he said. Brahmins means, all those who have come from Brahman.

He supplies not only limitless awareness he also supplies the prana so that the vehicle lives its full life and then conducts itself with the maximum possible unfoldment. If you look to Spiritual Astrology, under the caption Capricorn, you find in the last pages, "Uranium is the metal of Capricorn. Its use in spiritualism is not yet revealed by the Masters of Wisdom even to the disciples of last initiations". Uranium, the metal, its use in spiritualism is not reveal by the Masters of Wisdom even to the advanced disciples. Master CVV whose mission is located in the Sun sign Aquarius has part of this metal emanating from his Heart Lotus. He caused liberation of the activity produced by it into the cosmic plane of this earth. He has caused liberation of the energy of Uranium into all the seven planes of this planet. Thereby he gave stimulation to the planetary principle. It is an initiation to the planet itself that he has generally improved the mortality rate, meaning people do not die so very prematurely and they have better mortality. He gave stimulation to the activity of Cosmic Kundalini with that of his followers. All those who follow the path of master CVV he connects them to the Cosmic Kundalini, meaning from Sahasrara to Muladhara we have the cosmic the solar and planetary constitution in us. The head is Cosmic, the upper torso is Solar, the lower torso is Planetary. This principle of Kundalini generally lies in the base center. He linked it up in all his followers up to Sahasrara so that your life span is adequately enlarged for you to complete the processes of yoga and gain the necessary immortality and realize the Brahman. It has happened for the first of its kind on the planet, which is a grand work that has contributed by master CVV to the planet. It is also a great aid to the Hierarchy that they could enable their disciples to hold on to long life and conduct the work in a manner that they fulfil themselves until they gain immortality as long as they follow the fundamental principles of daily relating twice to the Master. Not looking for other things. Looking only to serve and to see the one and all. These are the three basic regulations relating to his work.

He cleared the possibility of hastening, meaning speeding up, the spiritual evolution of man. This is another dimension. By that he enabled reduction of number of births and deaths, births and deaths, births and deaths for the aspirants because he ensures that in one life, he gains the progress that he would gain in ten lives. What you gain as a progress in terms of your spiritual advancement it is Master CVV's promise. It multiplies ten times. You live in one life, ten lives. You gain time because each time you are taken to birth. To recollect the program, it takes time for each one. Some recollect

in the tenth year, some reflect in the 20th, some reflect in the 25th year. Up to 49 years sometimes it may take to get back into program. According to Master Djwhal Khul, the latest is 56 for the program to be continued. But if you have already realized in the 56th year, means you have lost 46 years. So, to get back into the program quicker, and to continue in one body for as many years as possible, enabling transformation of tissues, transmutation of tissues, transmutation of the blood cells, he called this activity of transmutation of the blood cells as Atita Kayakalpa Chikitsa. Meaning, Kayakalpa Chikitsa is an ayurvedic process by which you cleanse the body that Master CVV introduced. That is what you call Panchakarma. Master CVV said, "Atita Kayakalpa Chikitsa" meaning "I do something much more than Panchakarma, that your blood cells are all transmuted, cleansed, thereby much life energy is released and you are able to conduct your work in relation to your awareness. When life is in its full order, the awareness can function with greater effectiveness. Depending upon the karma of each follower, from time to time, he falls sick but every sickness does not lead you to termination of life. That is his promise, "Take the sickness as an interval to repair the body and mostly my work is to repair your bodies. I required your bodies until your bodies find their Golden bodies. I repair your bodies until you find your Diamond body". This is another dimension of work which is conducted with the help of the prayer on the side of the life principle.

There is another dimension of Uranus. Please go through whatever I have given about Uranus the Alchemist of the Age. There is nothing that Uranus does not touch. Uranium is the metal state of the principle of Uranus. Therefore, he touches all the planes relating to awareness. He touches all the planetary principles in you. He touches the planetary principles in the solar system also. He has excellent cooperation coming from all the planets of the solar system. Uranus does not belong to our system. It aids our system. Today we take Uranus as a part of our study. It belongs to five solar systems. It aids our solar system. It aids our planet. It is the Master who got stimulated in his heart center and transfers that energy to ensure that your heart is kept intact as long as you are in a program relating to the Master. Your heart is in safe custody of the Master. Your life is in the safe custody of the Master. Your awareness is in the safe custody of the Master. Such is the beauty, that he takes an overall guardianship relating to us and ensures that our evolution is speeded up. It is hastened without any disturbance to the existing laws of nature. He did it in a subtle manner that nothing is disturbed in the outer world but there is a subtle chemical action within us when we relate to the prayer. Just utter forth the sound key, things start pouring in and then the repair work keeps on happening, happening, happening. On one side you keep receiving teaching, on the other side your vitality is improved, your life force is improved, the blood cells are transformed, your kundalini finds greater vitality. The active fire in you and the latent fire in you they are synthesized for the rise of Kundalini Fire which would enable you to enter into the invisible, subtle, Divine dimensions of your own being.

He established a spiritual channel to invoke the Cosmic Prana Principle, to aid the working of his vehicles or the followers. Not that we are all vehicles of the Master. He transforms us to be his vehicles to fulfill, not only our individual plan but also the Planetary Plan. He told the Hierarchy, "Don't you worry I supply every century thousand vehicles, for you to work with. Every century, I supply thousand vehicles to work with". He has already prepared five thousand channels for the energy to pass through and then do Goodwill work. He looks to be so stable, so still. But his energy is impermeable and penetrates into everything. It causes stimulation to the mineral kingdom, to the plant kingdom, to the animal kingdom; because all forms are souls and they all have to evolve. He wants that we humans be responsible to the lower kingdoms, which is an ancient teaching. So, this prana dimension of Master CVV is as much a dimension as the dimension of awareness. Both are important. That is why he said, "Prana Treat, Yoga Teach". On one side he causes expansion of consciousness, expansion of our awareness, which normally the deity of the planet, Jupiter, does it.

This he does on one side and on the other side he fortifies your prana at all states of existence and ensures that you move in all three parts of your being, which is very important for us, to move up and down, gain knowledge, manifest it on the planet, not only through teaching but also through action. All knowledge is for manifestation. There is a part of knowledge, which is speculative. There is a part of knowledge, which is operative. The operative part of knowledge shall have to be operated upon. That is possible when we also cooperate for our own benefit because the whole thing is intended for our progress. The Master is Master, is ever with Brahman.

That is why whenever there is a disturbance to prana, he has given a prayer, which we keep uttering and he suggested that during the sleep hours we relate to this prayer so that you tend to be gradually good healers. Master CVV followers tend to be a good example, not in terms of teaching but also healing. There are as much healers as they are teachers because he prepares them in two dimensions. It is an ancient practice that every teacher is a healer by nature and every healer is a teacher. They are not two different functions. In fact, there was a time that every king was a prophet, every prophet was a king. Then, through time the kingly function, which is the firstly function, then the secondary function of initiate, they are divided. Then, came the third class, which is called the business class. The three, stand divided with their own programs today. The business tries to control the government. The government tries to control the business. Wisdom resigned itself into forests. No one conceives a prophet, no one conceives a wise man in the mad game that we have today between power and business. The antidote for power and for business is in the Second Ray. When second ray dominates, there was a time on the planet where the prophet was also the king, the prophet was also governing the business. The prophets were set aside. Kings came up, they deferred the prophets. They were handling law with business. Together they exploited. The law of Nature suffered in the hands of overzealous business principle and the principle of rulership. It is a doctrine by itself of degeneration, which has to be revised. Unless the governance looks for wisdom, unless they honor the wise people of their nations, they can never find solutions because governance is subservient to business. All governance is subservient to business and business promotes itself in terms of nocturnal activities, drugs, creating diseases, creating medicines, creating a rat race of sicknesses, drug making, drug business, more sicknesses, more drugs. It is a game. In every dimension so many games are being played because wisdom is missing. That wisdom has to come back in a greater measure in us that we tend to come out of the attitude business. This is what I have meant in the morning when I said, "Please delink your work with money". If you delink your work with money, you gain one dimension, which is the sublime dimension of Third Ray.

Remember, Third Ray is one of the primary three rays. If you are able to gain a state of mind where you keep working, not looking for the results of it, only looking for the welfare of others. That is the original understanding of action. Karma means action. It is a Divine action. A teacher never looked for money when he taught the children. A teacher never looked for money even when he taught Wisdom. A doctor never looked for money to treat the patients. Today educational institutions are overpowered by money. Education itself is money oriented. Medical education much more money oriented. Everything is money based. As long as things are based on money, we can never overcome Kali. If you are convinced that you are doing good to the surroundings, just keep doing it. That is the fundamental dictum of Krishna, which Master EK, all the Masters, follow. They don't link to money. They do their work. Nature is so bountiful, all resources come to you when you mind your work. The third chapter of Bhagavad Gita, Krishna says the same thing for the benefit of Indians I relate, meaning "You have the right to act, that is all. You have the right to act, that is the right given to you. Not to look for results". Don't manipulate your action for results", that is the third statement. Don't manipulate work for results, keep doing it with the utmost sincerity and truthfulness. Don't manipulate it. If you manipulate your actions, you get manipulated and you get into karma.

Therefore, you do your work. Don't look for results. Because you carry the conviction that what you do is good for you and for others. That is the first thing. Don't look to results. Keep doing. The beauty of action is not well realized by humanity. They only act for results. All management experts, they tell you how to gain more and more and more results, setting targets and making you slave of money. Come out of the money dimension.

Master EK gave out that experiment once, but he found out it was not possible with the present humans. He said, "Move your awareness from money to wealth". Wealth is your awareness, it builds trust. It builds bridges with the surrounding nature and whatever resources you need they come to you. It is an experiment he tried. Master MN, He never cared for money. He just went on working for justice in the court and people came up. Some came up with vegetable seeds. Some people came up with rice bags. He never looked for them, whatever they gave. He lived a splendorous life. In his house there was always hundred people doing yoga. To them, daily breakfast, lunch and dinner, he was serving. At home. Feeding hundred people on a daily basis, conducting his worship unmindful of money, it is not a small example. Why, because he is not dealing with money. Master CVV demonstrated such dealing. He was born in a very rich family and he had the entire street owned by him. There were some 30-33 houses. It was a botheration to him. They sold away all and distributed it in terms of food, that's all. He only retained one house for the family. I said to Master EK that he never thought of holding a house. He said, "for a man of wisdom, he need not hold or own anything on earth. The body itself is enough to do the work". Keep doing, doing, doing, doing. He did not believe in building a house. The disciples, we insisted. He agreed but he hardly lived in that house, hardly. But we, as disciples of these grand Masters are stuck with money, are stuck with sex. We are also stuck with comfort; money, sex and comfort have been great weapons in the hands of Kali and they hold you on.

But the Masters of wisdom, when we care to look into their lives, they have overcome. They are not attached to anything on the planet. On the contrary, they bring down from Higher Circles and transmit it into our circles and their work is mostly to uplift the humans because their trust in humans is far, far, far superior than our trust in humanity. They have so much trust in us that we can help along with them all the beings on the planet. They look for responsible humans. The Hierarchy looks for responsible humans. It is not a fashion to relate to them. It is not to seek something from them. It is to cooperate with them. They would like us to cooperate with them. They want to extend their hand to us, their strength to us, their knowledge to us, their ability to act with us so that we too can help the fellow humans, the animals, the plants and the minerals. There is a lot of evolution that has happened in these matters in these 112 years. A lot of evolution has happened with the plants. A lot of evolution has happened with the animals. It is for this reason we cannot eat the animals anymore because they are also evolved. We don't need to eat animals because we don't need physical strength as such. Our strength is intellectual, mental, which can gain the connection to infusion with the help of the teachings and function as big brothers to other members of the planet. That is how they look at it.

Therefore, in us they restore a lot of prana. They restore prana so in those disciples who see the dimensions relating to humanity. That is why he said, "Every night after all your activity is over, just take to this prayer of Influx of Plenty of Prana into us". "Master please let us receive". 'Let us', means we as a group. The Vedic prayers are always group prayers. They are not individualistic prayer. When we say, Sahana Vavatu, means Let Us Be Protected Together. Sahanau Bhunaktu, Let Us Eat Together. Saha Viryam Karavavahai, Let Us Work Together. Tejasvi Navaditamastu, Let It Be No Hindrance in Our Getting Enlightened. Ma Vidvishavahai, Let There Be No Malice Between Us. Between the group members there should be no malice. There should be a cordial collective

upliftment of all the group. There should be a common working program by which they cooperate, not compete. Let them be protected together. First protection they say, Sahana Vabatu. Let us be protected together. Sahanau Bunaktu, let us share our joy together. Saha Viryam Karavavahai, let us work together. Let enlightenment be together. Let no malice prevail. What more do you want? Like this, we have so many Upanishadic invocations which always say we, we, we and not I, I, I. I business is ignorance. Even when we chant Gayatri we say, Dhiyo Yonah Prachodayat, meaning, Our Wills Be Alerted. Our wills, not my will. This competitive business is not there in spirituality. It is only ignorance that keep people individualistic. The Wise Man would believe in group activity to realize the grand Soul activity. That is why they insist in groups, groups, groups. Every teacher prepares groups, but it becomes an island. It doesn't relate to other groups of other teachers. But we, in the WTT we are willing to relate to every group, any group of any Master. Although we follow the work of a Master, at the higher level we see the common work of all the Masters. Therefore, our altar contains as many Masters who try to relate as much wisdom as it is expressed by the Hierarchy ever since the beginning of Kali Yuga. So, we have not set limits. We have not circumscribed ourselves. As much as we circumscribe, so much we stand limited.

Therefore, this activity leads us to simultaneous expansion into all planes. It gives such an expansion that you are not displaced from your ground, you are as much aware of the ground realities. You are as much aware of the areas in which others are. Some are emotional. Some are mental. Some are intellectual. Some are trying to break their brains. Some are moving forward into synthesis. These are all things which are according to their state. They are given with love and with compassion a little more prana, a little more awareness. It is a grand work which we cannot see when we are busy with our own daily mundane life. It is a dimension. It is a dimension that we have to enter into. Therefore, in the night hours, when you don't have anything else to do, except sleeping, the Master says, "Submit to me and sleep". "Maser please, let us receive the Influx of Thy Plenty of Prana into our systems. So that we may resist disease, decay and death, realize the Highest of Truth, the Pure Love, and the Bliss of Existence". For what? "To serve Humanity according to thy Plan". These are all gifts given to us, provided we have pledged to serve the Plan. Not for you to aggrandize. To realize the Highest Truth, the Bliss of Existence. For what? To serve the Plan. To serve according to the Plan. To serve Humanity according to Thy Plan. Just before sleep, it doesn't take much time to say this. Lying in bed you can say it. It gives multiple opportunities to restructure you during your sleep hours. Know that the Masters of Wisdom do not intimidate. If you invite, they come. If you don't, they do not. They inform. They do not influence you. They don't try to impress you. They express. They have very high level of ethics, etiquette, which we cannot imagine. They respect your individual will. They respect your individual freedom. They don't set towards you unless you set towards them. They have many more things to do. If you do so regularly there are schools that are run in the night hours relating to you, in which you can be admitted, where in your subconscious level, psychic level, you are trained, you are given certain better ideas because during the wakeful hours our mind is an obstruction to us. Our mind is a funny thing. It has some good strengths, it has also its weaknesses. In sleep hours the mind is at rest. They can relate easily, get into your subconscious state, implant some ideas, some seeds, by which when you wake up in the morning you think you got an idea. It is not your idea. It has come from elsewhere. You take to the idea. You work it out.

There are schools run by Masters of Wisdom in every part of the globe and then you are recruited according to your Ray quality and you are taught through impression. There is what is called, Teaching by Impression, which happens to you if you regularly submit yourself during the night hours to the Master. Late nights are not recommended. If you see the writings of Master Djwhal Khul, the ideal time to retire is 10:30 in the evening and make sure that you are awake by 5 o'clock in the morning. That is the ideal time he said. Ten thirty at night. Five o'clock is the latest in the morning. If

you can wake up earlier is still better. Ten thirty to five, before you do that, if you get into this prayer, generally the schools are operative at a local time between 2:00 o'clock to 4:00 o'clock. Between 2:00 o'clock to 4:00 o'clock the schools are open for sincere students to participate in the classes run by the Masters of Wisdom. Mind you, if you see the book on Spiritual Astrology, it is written that Master Morya conducts even schools on Mars. In the planet Mars he has schools. Likewise, every Master has schools in the related planet from where the Sixth Ray devotion, consecration and commitment is brought to enforce your will so that, with the help of Sixth Ray you can rise up to First Ray or Second Ray. Likewise, they have so many things to help us. Depending upon our orientation we get into that. Therefore, we should take the double principle of prana and awareness as the two dimensions upon which the master helps you, not only on the physical but also in all planes up to the Cosmic plane. Causal Prana helps you on the causal plane. Solar Prana helps you on the Solar plane. Planetary prana helps you on the Planetary plane.

Here is the Master who connected the Cosmic prana to all the Seven Principles in the humans. He has such cooperation coming from higher circles. He has cooperation of Saturn. He has cooperation of Venus. He has cooperation from Mercury. All that cooperation which I have mentioned in the book Uranus is the cooperation that he gained and gave it out. There is no planet through which the Master cannot work. He functions through the Sun. He functions through the Moon. He functions through Mars, through Mercury. Of course, Jupiter is his main stay. He functions with Venus. He functions with Saturn. Whatever is relevant for us, he makes adjustments. He makes his own adjustments in you because you allowed him by invoking him. The moment you invoke, he is ready to come, enter into you, stay in the heart center and cause all the needed adjustments, which by yourself you cannot do. Even if you are given this information, you cannot do it. It has been given from must-ancient times. It was all summarized, synthesized and given out in Bhagavad Gita five thousand years ago. Every Master of Wisdom came out and what is relevant to your place, to your time, they have emphasized on it. Whatever, progress has been dismal. According to Madam Blavatsky, every century humanity has been able to produce 10-12 Masters. At that rate, wonder how they can cover the humanity. Therefore, this energy has come to give a great push.

Therefore, we need to take this a little more seriously than we normally take it. Don't make it a routine. Make it your passion. The morning and evening prayer should be your passion. You relating to the prana before sleep should be your passion and then see what happens over the years. It can be done silently, not making much noise. Even if your spouse in the bed is not oriented, it doesn't matter, you can do your job. It can be silent prayers, doing Master CVV only utterance of the sound key. It can be mental utterance. It need not be physical utterance. In a group, we do it physically, vocally but when Master MN was giving the sound, he was not saying anything, just when he brings the two hands together it is understood that that man is passing the energy coming from the Higher Circles via CVV into all of us. That's all. After the transmission is over and the adjustments were done, he used to say, "Thank you". That's all. It could be sometimes a long duration. When Master MN was giving initiations, people were levitating. The group members of the group were levitating and touching the top roof of the room. Master EK modulated it so that we are not at horror to the surroundings. He modulated it. Master EK modulated quite a bit and gave it out. With Master CVV there were instant clues. He brought his son back to earth from the Cosmic plane, twice. He brought his disciple who passed away. From the higher planes he brought him back. He himself left the body eighteen times. Not one time or two times, eighteen times he left the body! The doctors measured, according to our medical science, he is dead. But once he is declared dead in four minutes time he stood up. Like that, eighteen times he said there is no death. He showed it upon his disciples. He showed it upon his own child at the instant of his lady. He said, "When the purpose is over, you can leave this body and live in another body". He was emphasizing upon continuity of consciousness for a

continuous evolution. On the way, you gain these bodies, but work with it. I am here to fulfill. The most liked word by Master CVV is Fulfillment. I spoke about these things during May Calls many times. The disciples asked, "What do you like that word?". He said, "Fulfillment means there is filling even after it is full". Full, fill. If there is a glass like this water, he would not only stop at the brim of the water. He keeps on pouring and pouring until you are fulfilled and you say, "It's enough, it's enough!". That is the beauty in every dimension of life. He fulfills you of your personality life. He fulfills you of your alignment of the Soul with the Super Soul. He fulfills you to be a helper at the planetary level and join the Hierarchy of Masters who are conducting the work over thousands of years. It is not selfish attitude! Not caring for the recognition of the outer world.

It was only when Blavatsky came that the world knew about these Divine Masters. Before that, they were all hidden in the Puranas. Of the eighteen Puranas, only in three puranas, Veda Vyasa mentions about them, Maitreya, Maru and Devapi. Djwhal Khul, Saint Germain, Jesus, they were all later manifestations. The original triangle is: Lord Maitreya, Lord Morya and Koot Hoomi and they are guided by Sanat Kumara, that is the nucleus. They went on developing from humans and many humans are all ascended Masters. When they have ascended from being human to semi human, it means it should be possible for us also. What is needed is the will, which is embedded in the planet Mars, which is presided over by Master Morya. While he's a First Ray master, he believes in Sixth Ray consecration which leads you to commitment. This commitment has to be all-through. It cannot be a part-time commitment. When they feel that you are committed, they say "yes". When you are consecrated, they bless you. When they see that there is enough commitment in us, they start cooperating. Then, many things are revealed to you and you have to act upon whatever revelations that have come to you, slowly your personality life heals you, your karma heals you. That is why he says, "When you are in this program, your karma also gets neutralized". Needs not necessarily precipitate. That is why he says, "Karma is neither purged nor postponed but neutralized". Work with Occult Mediations without fail daily, it has all wisdom of all religions, of all regions. You pick it up just like is an assorted chocolate box in which you have Vedic utterances, Puranic utterances, Vaastu wisdom, Hebrew utterances, Egyptian utterances, Mayan utterances, utterances of Old Testament, utterances of New Testament also. He did not neglect what is relevant that has happened upon the planet and he remained mystical till date. He continues to be mystical.

Whatever he graces so much only we receive. He reveals and we know and no one can know fully about him. That is the understanding. That is what I heard from Master EK who had very good touch with Gayatri, very good touch of Lord Krishna and also the touch of the Hierarchy. When I asked him about Master CVV in the Visakhapatnam beach, in the sand, he just became silent. He just became silent for two minutes and said, "Just keep it with you. This earth is a sand particle to Master CVV". Can you imagine? Note that Master EK worked for so many other masters also. But when it came to Master CVV, the one thing he told me in Visakhapatnam beach when we were sitting together in the sands and I asked him, "Master would you please tell me a little more about Master CVV" -because we have this kind of inquisitiveness to know- He became silent. Later, he picked up the same sand particle and said, "This earth is this much when you compare to the Master. Keep with you this understanding. You can never gauge him. You can never gauge him but he is a grand, grand, grand Master" I came to know through the teachings of Master Djwhal Khul, from his books, that the Avatar of Synthesis is Christ to Christ, meaning is Maitreya to Maitreya. At least on May Call Day we should relate to him and reveal whatever he intends to reveal. That we have been doing it for so many years. In India I started in 1971. It tends to be 50 years now. With you all I started in 1988 in pre-Alps in Italy, 12 plus 21, 33 years. May Call has been our main stay. Later came the December Call. Later came the Equinoxes. These are all original festivals and they are localized, they are slightly distorted. Master CVV conducted May Call, December Call, Equinoxes and the Solstices, so that we are linked to

the system. Not to do a festival that doesn't really link you to the planetary system and solar system. Why do we do things which do not link us to a higher system. You take to these six nodal points for group prayers as far as possible, be in groups, do these prayers. Gain the attunement with the planetary system. Then, you get what the planet offers. The planet itself, according to Puranas, is a mustard seed in the Universe. The ladies know what is the size of a mustard seed. The Puranas say, "The entire Universe is but a mustard seed". Within that mustard seed we are billions of beings but in us Brahman is there. Since Brahman is within us, from being a mustard seed, from that state, you can grow, grow, grow, grow to be one with Brahman. How much compassion He has, the Brahman to be with us even in this smallest form, most micro form to the macro form he's pervading. "Anor Aniyam, Mahato Mahiyam", that is how The Vedic inscription is, "He is as much in micro as it is in macro". Therefore, we don't have to feel ourselves mustard seeds. The mustard is but the form around it but you can grow. The chick in the egg grows, breaks the egg and grows further. We can grow, grow, grow, grow up to the seven planes of our existence and then we can grow further.

That is why in the books that have come to you from Bailey and Madam Blavatsky, they told you that in this seventh sub plane of the physical plane he has the touch of the feet of the Cosmic Person. Imagine the Cosmic Person, his feet touch your highest plane in the human form on this planet. That is the fulfillment as far as planetary existence is concerned but there are beings who have gone further. From the feet of the Cosmic Person there are beings who have ascended over there in continuous pursuit up to the heart of the Cosmic Person. That is our abode. The heart of the Cosmic Person is what every soul keeps on working out with much thrust until we reach the feet. After we reach the feet there is a further progress. The Cosmic Person is existing in four-fold manner. Your touching is in his base on our part. Look to the interaction of Cosmic Fire or some here and there what madam Blavatsky has said and I have given through Bhagavata teachings in Indian classes entirely about constitution of Cosmic Person and how it relates to our Sahasrara. That is how reaching here you touch the feet of the Cosmic Person. That is Sahasrara. After that the Master will continue with you. Therefore, please take it as a discipline. Relate to him the way he informed us. He is not a man who gets into you without your invitation. Not only he, no Master ever enters and intimidates into your activity unless he is heartily invited. That is now it is.

I have exceeded my time limit by 10 minutes. Be with the Master. Keep moving. Keep doing whatever comes to you in terms of Goodwill. Keep relating to him in prayers. You get knowledge afresh, like freshly baked bread, which you collect very early in the morning. You don't bring the bread the day before, no. people first go by the time bakery is open, you have hot bread, bring it home and eat it. The Master said, "All wisdom I will teach you from inside. Don't look for wisdom just work it out with me. Do what I say. Wisdom comes to you. Abilities come to you. Much work can happen to you, in the process you are also uplifted, let it happen to all of us. It should happen to all of our groups, wherever they are, in whatever personality condition they are. Let us all relate to the Master so that we are uplifted from our personality crisis into soul awareness and the soul relates to the Super Soul, who's center is also in you. That's it. The Super Soul and the soul can surely bring you down to repair your personality faster. The Master says, "Ten years are enough to set your personality", provided how committed you are, how consecrated you are. So, we have to see how much we are into it. If you are into this stream, this stream leads you.

Once again, I wish you good luck. I extend best wishes I want that all of us relate afresh and then ensure that we do our practices, which are simple. He simplified all practices. Relate to all the material relating to him that I gave you. Is not given out of fancy. It is all given because it was intended to be given by him, starting with Aquarian Master, Occult meditations, the New Dimensions of Yoga, the Saturn Regulations, so many things to relate to. There are also other things. For a

change, you can also relate to the teachings of the other Masters like Violet Flame, Seventh Ray activity, teachings of all the Masters. Be more and more with the energy of Hierarchy and be relating to Master CVV. We are in a safe ground. We stand protected and we keep moving in the path of Light that leads you to the Soul. Thank you one and all. Namaskarams to all of you. Namaskarams to the Master.
